

IT ONLY TAKES ONE INDEX TO CAPTURE THE WORLD

THE MODERN INDEX STRATEGY

msci.com

MSCI DELIVERS THE MODERN INDEX STRATEGY

The **MSCI ACWI Index**, MSCI's flagship global equity benchmark, is designed to represent performance of the full opportunity set of large- and mid-cap stocks across 23 developed and 24 emerging markets.¹ As of June 2017, it covers more than 2,400 constituents across 11 sectors and approximately 85% of the free float-adjusted market capitalization in each market.

The index is built using MSCI's Global Investable Market Index (GIMI) methodology, which is designed to take into account variations reflecting conditions across regions, market-cap sizes, sectors, style segments and combinations. The ACWI Index suite, which has long been the pillar of MSCI's Modern Index Strategy, now has more than \$2.8 trillion in benchmarked assets globally.²

MSCI ACWI INDEX PERFORMANCE CHART³ - GROSS RETURNS (USD)

¹ The developed markets are: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the U.K. and the U.S. The emerging markets are: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Russia, Qatar, South Africa, Taiwan, Thailand, Turkey and the United Arab Emirates

² As of Dec. 31, 2016, as reported on March 31, 2017, by eVestment, Morningstar and Bloomberg

³ MSCI data as of June 30, 2017

MSCI ACWI INDEX COUNTRY ALLOCATION³

THE INDEX MATTERS

As globalization proceeds and financial markets become ever more integrated, companies operate increasingly across multiple countries and regions, and their performance may be tied increasingly to economic and political conditions beyond their home countries. In addition, professional investors - whether institutional, asset managers or wealth - often seek to understand unintended exposures and biases as they invest further afield. The best way to identify such unintended effects would be to leverage an index that represents the entire opportunity set, with no gaps, no overlaps and no fixed number of constituent stocks.

The MSCI Global Equity Indexes are used by professional investors worldwide for investment analysis, performance measurement, asset allocation, hedging and the creation of a wide range of index derivatives, funds, ETFs and structured products. From market cap-weighted regional, country and sector indexes to indexes based on strategies such as factor and environmental, social, governance (ESG) investing, the Modern Index Strategy enables clients to construct and monitor portfolios in a cohesive and consistent manner, avoiding benchmark misfits and uncompensated risks.

The MSCI ACWI line of indexes offers standard, large-cap, mid-cap, small-cap and investable-market (IMI) benchmarks.⁴

COMPLETE COVERAGE OF THE INVESTMENT OPPORTUNITY

⁴ They are: the MSCI ACWI Index, MSCI ACWI Investable Market Index (IMI), MSCI ACWI Large Cap Index, MSCI ACWI Mid Cap Index and MSCI ACWI Small Cap Index

MSCI is a market leader in global equity indexes and has over \$2.8 trillion in assets benchmarked to the MSCI ACWI Index suite.²

MSCI'S INDEX ADVANTAGES AND BENEFITS:

- **Global coverage:** With more than 190,000 indexes to choose from, MSCI offers extensive representation of the global equity opportunity set.
- **Performance measurement and attribution:** Industry-leading benchmarks for global mandates - with regional, country, sector and other subsets - are available for more-targeted investment mandates.
- **Research:** For more than 40 years, MSCI's research-based indexes and analytics have helped the world's leading institutional investors build and manage better portfolios.
- **Product development:** MSCI has created innovative indexes that can be utilized by the passive investment industry.
- **Consistent framework:** All of MSCI's Global Investable Market Indexes offer a building-block approach with a rules-based, consistent methodology designed to allow institutional investors to identify unintended bets, risks, gaps or overlaps.
- **Replicability:** Minimum free-float requirements for eligibility and free float-adjusted capitalization weighting to reflect the size of each investment opportunity and facilitate replicability of the indexes.

OUR BUILDING BLOCK APPROACH

MODERN INDEX STRATEGY

MSCI indexing offers a modern, seamless and fully integrated approach to measuring the full equity opportunity set, with no gaps or overlaps.

MODERN

Evolves to measure and capture equity markets as they exist today

Our indexes are built using an innovative maintenance methodology that provides superior balance between the need for a stable index that is flexible enough to adjust quickly to a constantly changing opportunity set. We provide timely and consistent treatment of corporate events and synchronized rebalancings, globally.

SEAMLESS

Covers the full opportunity set and all its segments, including GICS® sectors

All of MSCI's indexes are created using the Global Industry Classification Standard (GICS®), an industry classification system developed by MSCI and S&P Global, which provides a common framework to classify stocks. They offer exhaustive coverage of the investable opportunity set with non-overlapping size and style segmentation.

INTEGRATED

Consistent methodology for every market

Where other providers use either a long- or short-term liquidity measure to assess the eligibility of stocks for their indexes, MSCI uses both, recognizing the differences in liquidity between developed and emerging markets and enhancing the investability and replicability of our indexes. MSCI puts strong emphasis on investability and replicability of its indexes through the use of size and liquidity screens.
