

Emerging markets

THE MODERN INDEX STRATEGY

Modern index strategy

MSCI indexing offers a modern, seamless and fully integrated approach to measuring the full equity opportunity set, with no gaps or overlaps.

Modern

Evolves to measure and capture equity markets as they exist today

Our indexes are built using an innovative maintenance methodology that provides superior balance between the need for a stable index that is flexible enough to adjust quickly to a constantly changing opportunity set. We provide timely and consistent treatment of corporate events and synchronized rebalancings, globally.

Seamless

Covers the full opportunity set and all its segments, including GICS® sectors

All of MSCI's indexes are created using the Global Industry Classification Standard (GICS®), an industry classification system developed by MSCI and S&P Global, which provides a common framework to classify stocks. They offer exhaustive coverage of the investable opportunity set with non-overlapping size and style segmentation.

Integrated

Consistent methodology for every market

Where other providers use either a long- or short-term liquidity measure to assess the eligibility of stocks for their indexes, MSCI uses both, recognizing the differences in liquidity between developed and emerging markets and enhancing the investability and replicability of our indexes. MSCI puts strong emphasis on investability and replicability of its indexes through the use of size and liquidity screens.

MSCI delivers the modern index strategy

The MSCI Emerging Markets Index is designed to represent the performance of large- and mid-cap securities in 26 Emerging Markets.¹ As of December 2018, it had more than 1100 constituents and covered approximately 85% of the free float-adjusted market capitalization in each country.

The index is built using MSCI's Global Investable Market Index (GIMI) methodology, which is designed to take into account variations reflecting conditions across regions, market-cap segments, sectors and styles.

the index matters

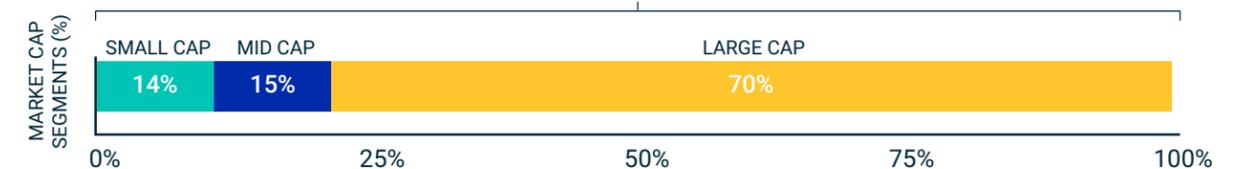

For the past 30 years, emerging markets have evolved from a marginal consideration to a cornerstone of diversified equity portfolios. To capitalize on the unique attributes of these vibrant economies—namely, superior growth potential, low correlation and relative scarcity of information—investors need reliable tools to mine the full opportunity set and navigate the risks inherent in investing far afield. Using a reliable index that continuously adapts to reflect both the composition and appeal of these markets is key to understanding the unique drivers of risk and return and to making better-informed investment decisions. **Informing the world's leading investment decision-makers.**

The MSCI Global Equity Indexes are used by professional investors worldwide for investment analysis, performance measurement, asset allocation, hedging and the creation of a wide range of index derivatives, funds, ETFs and structured products. From market cap-weighted regional, country and sector indexes to indexes based on strategies such as factor and environmental, social, governance (ESG) investing, the Modern Index Strategy enables clients to construct and monitor portfolios in a cohesive and consistent manner, avoiding benchmark misfits and uncompensated risks.

The MSCI Emerging Markets suite of indexes offers large-cap, mid-cap, small-cap and investable-market (IMI) indexes.⁴

MSCI's index

advantages and benefits

Global coverage

With more than 200,000 indexes to choose from, MSCI offers extensive representation of the global equity opportunity set.

Consistent framework

All of MSCI's Global Investable Market Indexes offer a building-block approach with a rules-based, consistent methodology designed to allow institutional investors to identify unintended bets, risks, gaps or overlaps.

Research

For more than 45 years, MSCI's research-based indexes and analytics have helped the world's leading institutional investors build and manage better portfolios.

Replicability

Minimum free-float requirements for eligibility and free float-adjusted capitalization weighting to reflect the size of each investment opportunity and facilitate replicability of the indexes.

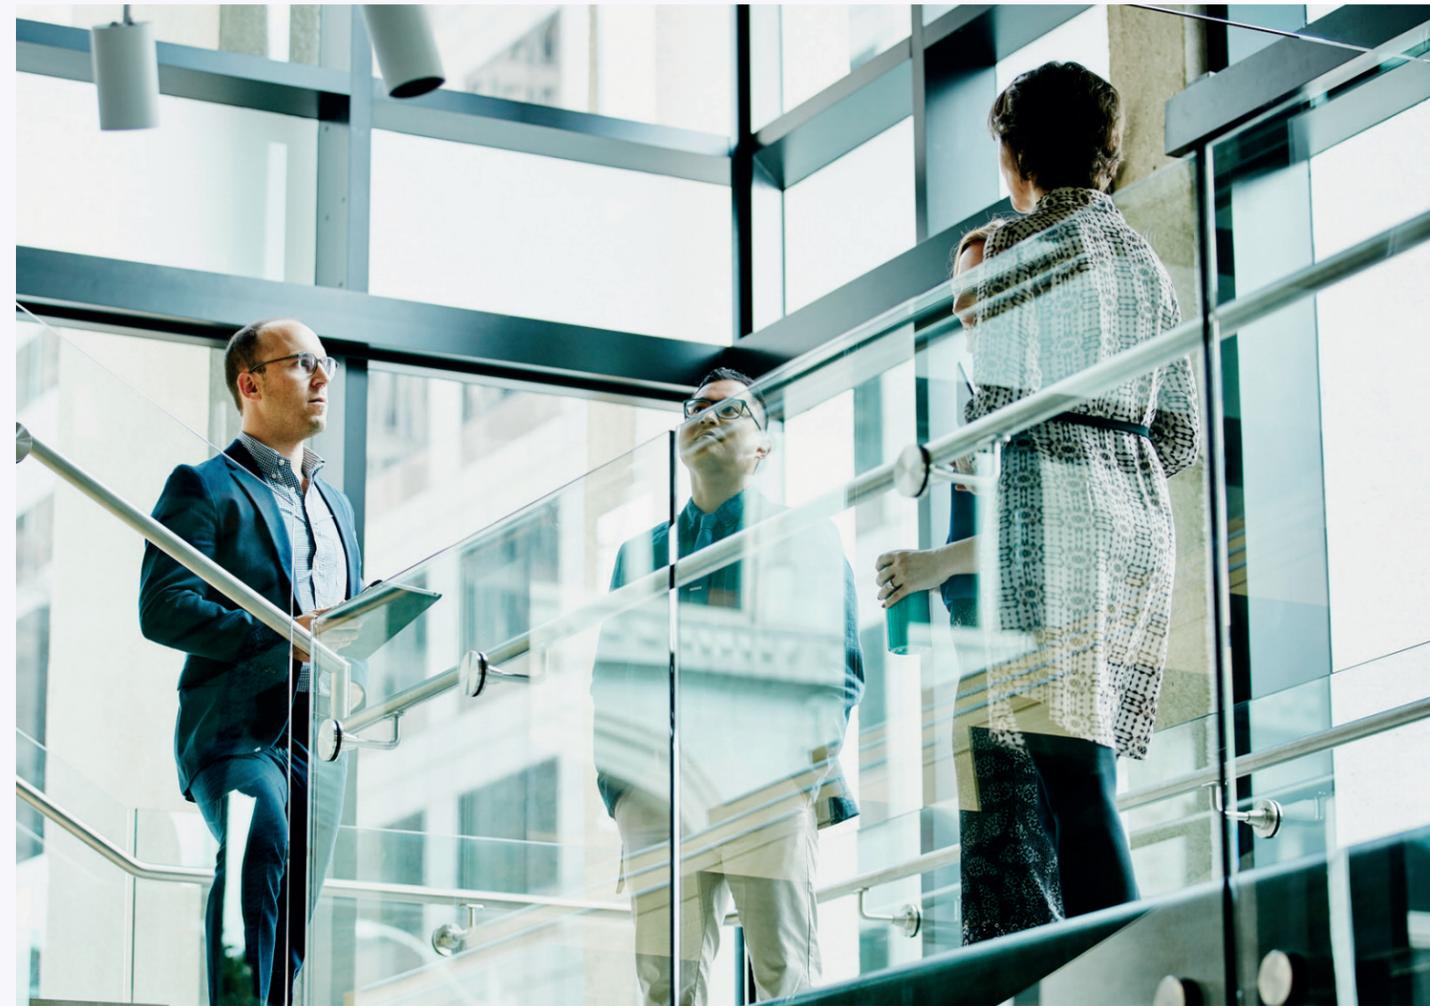

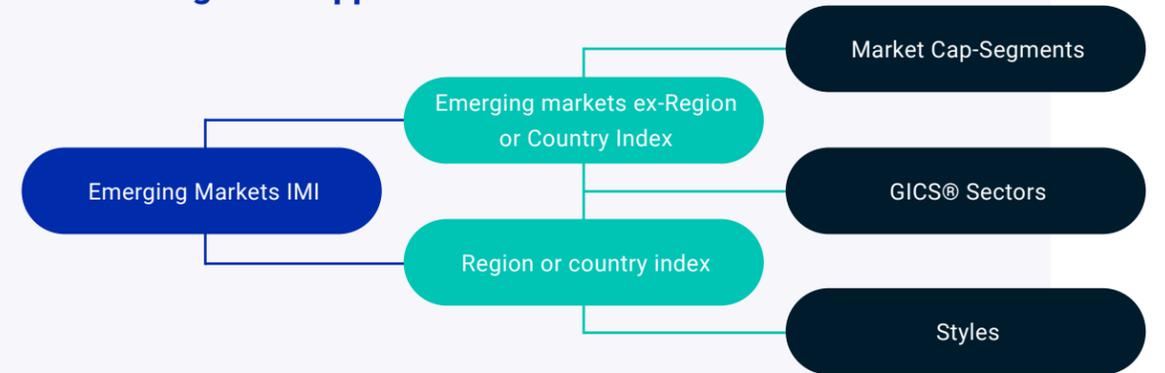

Product development

MSCI has created innovative indexes that can be utilized by the passive investment industry.

Performance measurement and attribution

Industry-leading indexes for global mandates - with regional, country, sector and other subsets - are available for more-targeted investment mandates.

Our building block approach

About MSCI Inc.

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.
