THE MODERN INDEX STRATEGY
MSCI indexing offers a modern, seamless and fully integrated approach to measuring the full equity opportunity set, with no gaps or overlaps.

**Modern Index Strategy**

**Modern**
- Evolves to measure and capture equity markets as they exist today
- Our indexes are built using an innovative maintenance methodology that provides superior balance between the need for a stable index that is flexible enough to adjust quickly to a constantly changing opportunity set. We provide timely and consistent treatment of corporate events and synchronized rebalancings, globally.

**Seamless**
- Covers the full opportunity set and all its segments, including GICS® sectors
- All of MSCI’s indexes are created using the Global Industry Classification Standard (GICS®), an industry classification system developed by MSCI and S&P Global, which provides a common framework to classify stocks. They offer exhaustive coverage of the investable opportunity set with non-overlapping size and style segmentation.

**Integrated**
- Consistent methodology for every market
- Where other providers use either a long- or short-term liquidity measure to assess the eligibility of stocks for their indexes, MSCI uses both, recognizing the differences in liquidity between developed and emerging markets and enhancing the investability and replicability of our indexes. MSCI puts strong emphasis on investability and replicability of its indexes through the use of size and liquidity screens.
MSCI delivers

the modern index strategy

The MSCI World Index is designed to represent the performance of large- and mid-cap stocks across 23 developed markets. With more than 1,600 constituents, it covered approximately 85% of the free float-adjusted market capitalization in each country as of December 2018.

The index is built using MSCI’s Global Investable Market Index (GIMI) methodology, which is designed to take into account variations reflecting conditions across regions, market-cap segments, sectors and styles.

MSCI World Index performance chart - gross returns (USD)

The MSCI Global Equity Indexes are used by professional investors worldwide for investment analysis, performance measurement, asset allocation, hedging and the creation of a wide range of index derivatives, funds, ETFs and structured products. From market cap-weighted regional, country and sector indexes to indexes based on strategies such as factor and environmental, social, governance (ESG) investing, the Modern Index Strategy enables clients to construct and monitor portfolios in a cohesive and consistent manner, avoiding benchmark misfits and uncompensated risks.

The MSCI World suite offers standard large-cap, mid-cap, small-cap and investable-market (IMI) indexes.
With more than 200,000 indexes to choose from, MSCI offers extensive representation of the global equity opportunity set. Industry-leading indexes for global mandates — with regional, country, sector and other subsets — are available for more-targeted investment mandates.

For more than 45 years, MSCI’s research-based indexes and analytics have helped the world’s leading institutional investors build and manage better portfolios. MSCI has created innovative indexes that can be utilized by the passive investment industry.

Consistent framework
- All of MSCI’s Global Investable Market Indexes offer a building-block approach with a rules-based, consistent methodology designed to allow institutional investors to identify unintended bets, risks, gaps or overlaps.

Product development
- MSCI has created innovative indexes that can be utilized by the passive investment industry.

Replicability
- Minimum free-float requirements for eligibility and free float-adjusted capitalization weighting to reflect the size of each investment opportunity and facilitate replicability of the indexes.

Performance measurement and attribution
- Industry-leading indexes for global mandates — with regional, country, sector and other subsets — are available for more-targeted investment mandates.

Our building block approach
MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.
