

MSCI ESG Climate Change Solutions

FROM MSCI ESG RESEARCH LLC

A holistic toolkit to enable clients to build more resilient portfolios

For more than 20 years, MSCI ESG Research has worked with institutional investors to incorporate climate change considerations in their investment process by providing an extensive view of climate change risks and opportunities across multiple dimensions: emissions data, fossil fuel exposure, forward-looking strategy assessment and clean technology exposure. Our climate change solutions are designed to support investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, and factoring climate change research into their risk management processes. MSCI has acquired Carbon Delta, a leading environmental fintech and data analytics firm specializing in climate change scenario analysis. Carbon Delta's services will be provided through MSCI ESG Research.

Key features and benefits

Forward-looking strategy assessment

Assessment of corporate issuers' climate change exposure and management practices to identify leaders and laggards when it comes to preparedness for transition to a low carbon economy.

Climate risk vulnerability

Access climate risk exposure in the form of Scope 1, 2 and 3 carbon emissions and intensities, both as reported and estimated. Access quantitative data on reserves by fossil fuel type and revenue screens, as well as granular power generation data.

Climate opportunity exposure

Obtain detailed information on the percentage of revenue companies derive from alternative energy, energy efficiency, green building, pollution prevention or sustainable water.

Low carbon transition score

Access a single signal that helps interpret the various dimensions of low carbon transition risks and opportunities and compare companies within and across sectors.

Integrated analytics

Climate change research is available on various MSCI platforms, including: MSCI Beon™, BarraOne, Risk Manager and BPM, to help clients streamline climate risk management processes, construct portfolios and conduct TCFD stress test.

Identify Targets for Engagement

Climate change solutions can help institutional investors prioritize their engagement strategies, allowing them, for example, to identify large reserve holders and emitters in their portfolios that also lack a strong carbon management strategy.

Extensive Equity and Fixed Income Coverage

Our climate change solutions offer evaluation of +9,000 companies and 200 sovereign issuers, covering over 95% of equity and fixed income market value. Research is produced 100% in-house, updated on an annual basis and submitted to companies for factual accuracy.

Integrating climate change across the investment process

MSCI Climate Change Solutions are designed to support a diversity of approaches

Engage

- Engage companies and external stakeholders to promote a more resilient world

Integrate

- Integrate climate change considerations into company assessments
- Develop Low Carbon and Fossil Fuel Free strategies (active and indexed)
- TCFD Climate Scenarios Stress testing

Assess

- Assess exposure to climate change risk and opportunities
- Peer benchmarking

Allocate

- Define climate change strategy across asset classes
- Allocate to low carbon investments

An extensive range of tools

MSCI provides investors with a wide range of data and tools designed to enable investors to achieve a variety of climate-related objectives and investment approaches, from screening, risk exposure analysis, and engagement. Tools include data on fossil fuel exposure, carbon emissions, and carbon risk management, as well as environmental indexes and portfolio reporting tools.

Climate change metrics

Select from carbon management assessment, carbon and clean tech metrics and fossil fuel screens.

Carbon portfolio analytics

Measure the climate change risk and opportunities exposure of your portfolio.

Climate indexes

Choose from a range of climate change, environmental and thematic indexes

Risk analytics

Streamline climate risk management processes and conduct TCFD stress test.

About MSCI ESG Research products and services
