

# **MSCI'S FEEDBACK ON ESMA CONSULTATION PAPER RELATED TO REGULATION (EU) 2016/1646**

MSCI

**July 2019**

## INTRODUCTION

MSCI appreciates the opportunity to comment on the consultation paper related to the Regulation (EU) 2016/1646, which specifies the main indices and recognized exchanges pursuant to paragraph 8 of Article 197 of the Capital Requirements Regulation (EU) 575/2013 (CRR).

## ABOUT MSCI

MSCI is a leading provider of investment decision support tools to institutional investors globally, including asset managers, banks, hedge funds and pension funds. MSCI products and services include indexes, ESG research and tools, and portfolio risk and performance analytics. MSCI is headquartered in New York, with research and commercial offices around the world.

### *DRAFTING NOTE*

MSCI's flagship equity indexes include the MSCI Global Equity Indexes and MSCI has been calculating indexes for more than 50 years. MSCI Global Equity Index families include country and regional indexes, size indexes (large cap, small cap, and micro-cap), sector indexes, style (value/growth) indexes, strategy indexes, thematic indexes and ESG indexes. MSCI also calculates custom indexes at the request of clients, by applying client screens and constraints to MSCI Global Equity Indexes.

MSCI Global Equity Indexes are used worldwide by:

- assets owners to help them with their mandate decisions and with reviewing their managers' performance;
- active asset managers so that they can actively manage their funds against an index and report performance;
- passive fund managers to issue passive funds and ETFs based on the indexes;
- broker dealers for providing trading execution services, creating OTC and non-OTC derivative financial products and writing research more generally;
- stock exchanges to create equity index linked futures and options contracts; and
- CCPs to calculate the risks of its positions for index linked futures and options contracts.

During 2013 and 2014, MSCI implemented the IOSCO Principles, was externally audited during each of 2014, 2015 and 2016 for the MSCI equity indexes and select MSCI private real estate indexes and posted the adherence statements and audit reports on the Index Regulation page of [www.msci.com](http://www.msci.com). During 2017 and 2018, MSCI devoted those resources to

implementing the BMR, and MSCI posted the IOSCO adherence statements on the Index Regulation page of [www.msci.com](http://www.msci.com).

On 5 March 2018, MSCI Limited, which is a UK subsidiary of MSCI Inc., was granted authorization by the UK FCA as a UK administrator under the EU benchmark regulation ("BMR") for all of the MSCI equity indexes. MSCI was the first major global equity index provider to become authorized under the BMR.

### MSCI'S FEEDBACK

Question Number	Question	MSCI response
Q1	Do you agree with the calibration of the parameters specified in new methodology proposed by ESMA to select the main indices for the purpose of the ITS? Please provide a detailed feedback	<p>MSCI welcomes the introduction of reduced size requirements under test "b" of Option B. Such change would allow broader indexes to become eligible for classification as "main indices".</p> <p>While MSCI agrees that it is critical to maintain relevant liquidity requirements, which are also part of MSCI Global Investable Market Index construction methodology and serves as a basis of construction the MSCI Country and Composite Indexes, MSCI suggests a different approach for the liquidity screening.</p> <p>The test "b" in the proposal aims at "capturing those indices that are composed predominantly of small cap stocks which have a minimum level of liquidity measured by the ADT". The proposed size requirements would positively enhance coverage of securities available for a potential use as collateral. However, the proposed liquidity requirements may to a large extent undermine this objective.</p> <p>Smaller securities often naturally have lower ADT due to their size. However, absolute holding amounts in less sizeable companies are generally smaller, thus requiring lower absolute volumes to trade efficiently.</p>

		<p>Therefore, for the purpose of index construction, MSCI prefers assessing liquidity relative to the size of a security. Under the MSCI Global Investable Market Indexes (GIMI) methodology, this is expressed as a ratio of a trading value over a security's free float-adjusted market capitalization (further details could be found in Section 2.2.5 of the MSCI GIMI methodology, available at <a href="https://www.msci.com/index-methodology">https://www.msci.com/index-methodology</a>).</p> <p>While the test "b" partially recognizes this effect by splitting securities into two size categories, MSCI believes this may not be sufficient and either:</p> <ul style="list-style-type: none"> <li>• more granular size/liquidity tiers may be appropriate, or</li> <li>• a relative measure of liquidity may be applied</li> </ul> <p>For example, the least liquid constituents of the MSCI USA Investable Market Index (IMI), covering both larger and smaller companies in the U.S., have an ADT of approximately EUR 150,000. Based on MSCI's relative liquidity criteria, that had been validated through consultations with market participants, small securities with ADT as low as EUR 45,000 may be considered as sufficiently liquid.</p> <p>While the proposed ADT threshold of EUR 500,000 may be appropriate for most securities with free float-adjusted market capitalization of approximately EUR 1,000,000,000 and above, this requirement may be too stringent for smaller securities, potentially significantly reducing the set of eligible securities and thus indexes.</p>
Q2	Do you agree with the list of indices analyzed (please refer to the list provided in Table 6 in Annex V? If you believe that there should be additional indices to be	<p>MSCI would like to seek clarification on how the list of indexes in Table 2 – List of indices, Table 5, and Table 6 and Table 7 in Annex V was populated. More specifically:</p> <ul style="list-style-type: none"> <li>- (1) How were the indexes selected for inclusion in the tables, and hence the</li> </ul>

	<p>considered, please provide details and also specify which test (and related methodology) they meet in order to qualify as main indices.</p>	<p>analysis? i.e. why the same set of criteria was not applied across all country and key composite indexes for all index providers?</p> <ul style="list-style-type: none"> <li>- (2) Why did some MSCI Equity Indexes not pass specific criteria (some examples are mentioned below)?</li> <li>- (3) Why were some of the MSCI Equity Indexes not selected as “main indices” among other indexes, while being broader?</li> </ul> <p>The MSCI All Country World Index (ACWI) covers all markets classified by MSCI as Developed or Emerging Markets. The index construction follows a “building block” approach, i.e. all constituents of the underlying MSCI Country Indexes are included in the relevant MSCI Composite Indexes which the countries are part of.</p> <p>Section 3.2.3 of the consultation document mentions that “ESMA could not retrieve the composition of the MSCI AC Europe &amp; Middle East Index which as a consequence could not be assessed”. MSCI would like to clarify that this index is a subset of the MSCI ACWI Index, already analyzed by ESMA.</p> <p>MSCI understands that the MSCI ACWI Index is considered as a “main index” under the both current and proposed methodologies.</p> <p>What is unclear is why most of the individual country components of this index were not included in the assessment. Only indexes such as the MSCI India Index, the MSCI Indonesia Index, MSCI Philippines Index, the MSCI South Africa Index as well as the MSCI Taiwan Index were included in Table 2.</p> <p>Based on MSCI’s analysis, most, if not all MSCI Country Indexes included in the MSCI ACWI Index would pass the tests, particularly under test “a” of Option B. For example, it is unclear why the MSCI Taiwan Index fails test "a" under Option B, while based on MSCI’s assessment as of July 1, 2019, the</p>
--	--	--

		<p>smallest security in the index by free float-adjusted market capitalization was above EUR 500,000,000.</p> <p>Similarly, based on MSCI's assessment, the MSCI Emerging Markets Index would meet the proposed tests, at the same time the MSCI EM 50 Index was selected instead, which is a narrow subset of the MSCI Emerging Markets Index, as well as the MSCI ACWI Index.</p> <p>Table 5 shows selected indexes, deemed broadest across regions/markets under the different options. It is unclear why the S&amp;P 500 Index was selected, while the MSCI USA Index is broader (with 641 constituents as of July 1, 2019). Also, MSCI would like to clarify why IBOVESPA with 65 constituents was considered the most appropriate index for South America, while for example the MSCI EM Latam Index covering 118 names is broader. Similarly, FTSE RAFI Emerging Index has 357 constituents, while a potentially eligible MSCI Emerging Markets Index had 1,202 securities.</p> <p>Table 7 highlights that a number of MSCI Country Indexes which we believe would pass all the tests, such as the MSCI Emerging Markets Index, the MSCI Indonesia Index, the MSCI India Index, the MSCI Philippines Index and the MSCI South Africa Index. At the same time, they were not selected as they are "already included in the index", presumably because they are part of the already selected MSCI ACWI Index. However, it is unclear why the MSCI Russia Index considered as eligible, while also being a component of the MSCI ACWI Index.</p> <p>The MSCI Country IMI Indexes are broader as they include Small Cap securities. The MSCI ACWI IMI Index, for example, is a broader version of the MSCI ACWI Index. As per MSCI's assessment of the proposed methodology, most of the MSCI Country IMI Indexes would be ineligible, usually due to failing the liquidity tests. However, if the liquidity tests become less stringent in line with the suggestions made by MSCI for Question 1, some of the MSCI</p>
--	--	--

		Country IMI indexes, such as the MSCI USA IMI Index, containing 2,463 constituents, could become eligible.

The Information may not be modified, reverse-engineered, reproduced or disseminated in whole or in part without prior written permission from MSCI.

The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investable assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on [www.msci.com](http://www.msci.com).

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of [www.msci.com](http://www.msci.com).

MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI's products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.

Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor's.
