ESG Focus Indexes

Getting Focused on ESG investing
GETTING FOCUSED ON ESG INVESTING

As institutional investors evaluate the risk and opportunities associated with environmental, social, and governance (ESG) characteristics, the challenge some investors face is how to integrate ESG into their investment process and maintain equity market-like exposure at the same time. The MSCI ESG Focus Indexes are designed to help investors address this investment problem and focus on maximizing their exposure to ESG leaders while targeting risk and return characteristics similar to those of the underlying parent market cap weighted index.

MSCI ESG FOCUS INDEXES

The MSCI ESG Focus Indexes are designed to target companies with positive environmental, social and governance (ESG) factors while maintaining the risk and return profile of the underlying parent index. Each index is constructed through an optimization process that aims to maximize its exposure to ESG, subject to a target tracking error and other constraints. Companies with involvement in tobacco and controversial weapons are not eligible for inclusion. The Bloomberg Barclays MSCI ESG Fixed Income Indexes also include ESG Focus Indexes.

- MSCI EAFE ESG Focus Index
- MSCI EM (Emerging Markets) ESG Focus Index
- MSCI USA ESG Focus Index
- MSCI World ESG Focus Index
- MSCI Taiwan ESG Focus Index
- MSCI ACWI ESG Focus Index
- Bloomberg Barclays MSCI US Corporate ESG Focus Index
- Bloomberg Barclays MSCI US Corporate 1-5 Year ESG Focus Index

MSCI EXTENDED ESG FOCUS INDEXES

The MSCI Extended ESG Focus Indexes are a variation of the MSCI ESG Focus Indexes. In addition to tobacco and controversial weapons companies, those with ties to civilian firearms production and retailing are not eligible for inclusion.

- MSCI USA Small Cap Extended ESG Focus Index
- MSCI USA Extended ESG Focus Index
- MSCI EAFE Extended ESG Focus Index
- MSCI Emerging Markets Extended ESG Focus Index

For more information, please see the full MSCI ESG Focus Index Methodology
KEY ESG FEATURES OF THE MSCI USA ESG FOCUS INDEX

Designed to target companies with positive ESG profiles while maintaining the risk and return characteristics of the underlying parent index.

Targets no exposure to controversial weapons, firearms, or tobacco.

This brochure may contain analysis of historical data, which may include hypothetical, backtested or simulated performance results. There are frequently material differences between backtested or simulated performance results and actual results subsequently achieved by any investment strategy. Past performance — whether actual, backtested or simulated — is no indication or guarantee of future performance. None of the information or analysis herein is intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision or asset allocation and should not be relied on as such. Results may be different for the other indexes in the MSCI ESG Focus Index family.

ABOUT MSCI ESG RATINGS

MSCI ESG Ratings helps investors identify ESG risks and opportunities within their portfolio. We research and rate companies on a 'CCC' (industry laggard) to 'AAA' (industry leader) scale according to their exposure to business-relevant ESG risks and their ability to manage those risks relative to industry peers.

MSCI ESG Ratings cover 7,000 companies (13,000 issuers including subsidiaries) and more than 650,000 equity and fixed income securities globally.
MSCI ESG indexes (under the integration category as shown in the above diagram) aim to incorporate broad ESG issues by leveraging companies’ MSCI ESG Ratings as part of the index methodology. Specifically, the indexes are designed to:

- target positive ESG exposure through optimization (MSCI ESG Focus)
- tilt the weight of index constituents based on their ESG profile and ESG trend (MSCI ESG Universal)
- select companies with the highest ESG Ratings in each sector (MSCI ESG Sustainability)

MSCI ESG indexes also provide institutional investors with transparency into ESG sustainability and values alignment, together with the ability to compare holdings.
The ESG integration indexes aim to maintain the key characteristics of the parent free float market capitalization indexes, either through an explicit tracking error constraint (MSCI ESG Focus) or by targeting sector weights that reflect the underlying parent indexes, designed to limit the systematic risk introduced by the ESG selection process.

Other indexes focus on single themes or issues, such as the MSCI Low Carbon Target indexes, which are designed to achieve a target level of tracking error while minimizing carbon exposure. Indexes in the integration category are designed to help investors efficiently integrate ESG considerations into their core asset allocation without deviating from broad market characteristics.

The value category aims to help investors to align their personal or ethical values, or faith, with their investment processes. These include the MSCI SRI Index, MSCI KLD 400 Index and the MSCI ex Controversial Weapons Index.

The impact category groups indexes, such as the MSCI Sustainable Impact Index, that include companies whose core business addresses at least one of the world’s social and environmental challenges, as defined by the United Nations Sustainable Development Goals.
