Global Intel drives our suite of analytical solutions and enables you to evaluate the risk and opportunities which that market may represent for your investment strategy. It is designed to provide insights into real estate data that are consistent and comparable, robust and tailorable.

#### Consistent database, consistent methodology

We have a consistent methodology across all markets we operate in. Global Intel encompasses more than 100 comparable measures globally, providing like-for-like comparisons across different geographies and property types to help you solve these use cases:

- Asset Allocation for Institutional investors our consistent methodology across markets and a range of performance and risk measures help to inform your investment strategy.
- Strategy Development, Testing and Marketing for Asset managers the ability to run analysis on specific locations, location types or asset characteristics (lot size, type) help frame, test and communicate your unique strategies to investors.
- Risk management for Banks using our granular data to create tailored asset value growth
  indexes based on the location, asset type and last valuation date of loan collateral as an input
  to loan default monitoring.
- Regulatory Reporting for Risk Managers the coverage, granularity and long time-series of MSCI Private Real Assets Indexes help calibrate internal risk models and support regulatory reporting against Solvency II, Basel III and AIFMD.
- Transaction Underwriting for Lenders and Asset Managers actual data and percentile range of fundamental measures of asset performance like vacancy, income, rental growth and yields to provide real-world inputs into underwriting models.

#### Robust and tailorable

Global Intel is built on the key performance indicators of assets of private real estate investments.

- Real data: We collect performance data from investors on their assets, reviewed by our specialists to insure high data quality and delivered through our platform or direct to your system.
- Global: We preserve the specific characteristics of different markets across the world, whilst
  maintaining underlying consistency.
- Custom build dataset: You can analyze data across multiple segments or custom build dataset
  that meets your needs. You can create an analysis to test an assumption, refresh it, adapt it and
  save different versions of it.

#### **About MSCI**

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 50 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.
