

The Evolving Fixed Income Landscape

Featuring: **Jay Dermody**, Executive Director, Fixed Income and Multi-Asset Product at MSCI

Interviewer: Joining us today is Jay Dermody, Executive Director from MSCI, who'll discuss the evolution of fixed income and how investors are using these solutions in the global search for yield. Jay, thank you so much for joining us.

Jay: Absolutely, thank you for having me here today.

Interviewer: Yeah, so Jay, let's tell me some of the basics. What are the fixed income instruments that investors seeking yield are using today?

Jay: Absolutely. So the fixed income investment class is very, very diverse. There's lots of different sub-asset types. So that ranges anywhere from treasuries where clients can get exposure to kind of pure interest rate exposure through corporate debt, can get some credit risk, get higher yields from that to securitized products. You know, still a very large instrument type in significant investments there where clients can get higher yields, higher returns. And then for tax advantage strategies, you can use missile bonds in order to gain higher yields in a way that you can pay less taxes due to their nature.

Interviewer: From a historical perspective Jay, how are these instruments evolved and what are some of the challenges seen in accessing and implementing these instruments?

Jay: Absolutely. Well, the fixed income space is very old, right? It goes all the way back to the revolutionary war when the early nation, right, before it was even a nation needed to raise debt in order to fund the war effort. And so there's been this period with treasuries in particular where it evolved over time trying to raise capital for various different government initiatives and enabling clients to gain yield by investing into those securities. Obviously corporate debt also, very old instrument, companies into raising debt since companies existed. But enabling clients to invest in them as in more recent occurrence to the modernization of the bond market of the 1900's for example. And that's continued to evolve over time as additional instruments come online, different types of products, the securitized products base for example, you know, obviously grew very, very large over the last 20 years contributing significantly to the financial crisis, but still nine trillion dollars' worth of outstanding debt in the US bond market is just securitized products. Now as a consequence of that blow-up in the financial crisis, we have these sustained low yield environment, right? Where across most of our political now we're even in negative yields. And so the way that clients can get access to yields has evolved over time as we've needed— as investors have needed to find yield they've gone to new places. They've gone into different places. And so we're starting to see even increased diversity in the fixed income space now as new products come online or service that need.

Interviewer: And we're also seeing a lot of growth in private debt. I want to talk about that for a moment. Is this growth outpacing education and implementation?

Jay: Absolutely, as I mentioned, the explosion in different types, different types, the private in particular where we have private equity, private real estate and private debt now growing, in order to provide those returns that the public markets aren't providing as much to large investors. And as we have seen these new products come online, there has been a gap in where the transparency is not there compared to the public current parts. The amount of understanding of what the primary drivers are of risk and return for these instruments is unclear. And so even something as simple as kind of bank loans, a very much growing asset class of in the-- investment universe, it can be very hard to get that tight transparency into what really is driving the return profiles associated with these instruments.

Interviewer: And lastly Jay, MSCI serves some of the largest investors globally. I wonder, what are some of the main areas that you're working on with your clients to move the asset class forward?

Jay: Absolutely. So that's one of the things I'm really excited about is the work that we've done enabling our large-- our very kind of large clients in the world, so the large sovereign wealth funds, the large pension funds that we service, to be able to understand how these new products interact with the rest of their portfolio. So providing transparency into their bank loans, into their private instruments, understanding what's driving those pieces and then aligning those risk and return drivers with the rest of the portfolio. So that way they can really have a comprehensive view of risk and return in order to enable them to make better investment decisions.

Interviewer: Well, Jay, thank you so much for your insights into the fixed income landscape and how it's evolving. I have a lot more questions for you, but we'll have to have you back on to discuss your work further. Thank you so much.

Jay: Absolutely, looking forward to that. Thank you.

About MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 45 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective

portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process. To learn more, please visit www.msci.com.

The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of www.msci.com.

MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc.
