

China Tech Indexes

How do you approach investment when a country has entirely transformed their economy? As the second largest economy in the world, China is said to contribute 19% of the global GDP by 2024, and could be the only major economy with a positive growth with the COVID-19 pandemic.

The country is in the midst of a defining structural change, a technological transformation. Led by rapid technological developments, China is transforming from export oriented and fixed asset investment depended on the economy to domestic consumption and technology innovation focus.

As the nation with one of the most advanced digital ecosystems today, home to more than 850 million active internet and smart phone users, China is a leading force of technological innovation across the globe. Particularly in areas like connectivity, industrial automation, digital health and more. Many investors believe the time to invest in China is now, but in order to maximize the opportunity of China's evolution, investors need more innovative solutions.

For nearly half a century, MSCI has been on a mission to empower investors by facilitating assets to a truly global opportunity set. That's why we're introducing the MSCI China Tech 100 Index. So improve your investing solutions today and gain exposure to the tech companies at the cutting edge of China's evolving market now with MSCI's China Tech 100 Index.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.
