*Over rebalance of last 12 months

The MSCI GBP Investment Grade Corporate Bond ESG Climate Solutions Select Index was launched on Jan 31, 2022. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance – whether actual or back-tested – is no indication or guarantee of future performance.

Index Framework

The MSCI GBP IG Corporate Bond ESG Climate Solutions Select Index is constructed by first incorporating business involvement exclusion screens based on Controversial Weapons, Nuclear Weapons, Tobacco and Fossil Fuels. The index also excludes companies involved in very severe ESG controversies. Subsequently, an ESG Climate Score is calculated which incorporates an ESG Rating based factor combined with a score based on MSCI Low Carbon Transition (LCT) score and category. Finally, the securities are reweighted by using the ESG Climate Score and an issuer capping of 5% is applied to obtain the final index. The Indexes are rebalanced on a monthly basis and the pro forma Indexes are in general announced three business days before the effective date of rebalancing.
