MSCI ESG Investing
Better investments for a better world
ESG investing is growing exponentially as more investors and issuers utilize ESG and Climate data and tools to support their financial decision making.

What’s driving the growth?

The world is changing, creating new and emergent risks

Climate risks, regulatory pressures, social and demographic shifts as well as privacy and data security concerns are examples of new or increasing risks for investors. Companies face rising complexities and greater scrutiny if they are not adequately managing these risks. The financial constraints posed by the COVID-19 pandemic have exacerbated the challenges for some industries. Today’s investors are less tolerant of ESG incidents or controversies and may re-evaluate their investment approaches if these are not managed.

A new generation of investors asking more of their investments

Over the next two to three decades, the millennial generation is expected to direct between $15 trillion and $20 trillion into U.S.-domiciled ESG investments, roughly doubling the size of the U.S. equity market. A growing body of research suggests that millennials are more conscious of the impact of their investments on society and the environment and are asking more about them.

Advances in technology and data extraction driving more meaningful insights

Artificial intelligence (AI) technology and alternative data extraction techniques help minimize our reliance on voluntary disclosure from companies. Machine learning and natural language processing help us increase the timeliness and precision of data collection, validation and analysis to deliver dynamic content and financially relevant ESG insights.

Why work with MSCI and MSCI ESG Research?

Unique insights to power better investment decisions

MSCI’s ESG origins date back to 1972.

Our first ESG index was launched in 1990.

We have been rating companies based on industry material ESG risks since 1999.

We’re proud to support the ESG strategies of over 1,700 clients worldwide including leading pension funds, asset managers, consultants, advisers, banks and insurers.

Over the past three years, assets in sustainable investment funds have grown from $496bn (Q3 2017) to over $1 trillion (Q2 2020). As of December 2020, we have seen a 208% year-on-year growth in ETFs AUM tracking MSCI ESG indexes.

2 Data based on Refinitiv Universe as of December 2020; only primary listings, and not cross listings
4 ESG data, research and ratings are produced by MSCI ESG Research LLC. MSCI ESG Indexes and Analytics utilize information from, but are not provided by, MSCI ESG Research LLC. MSCI Indexes and Analytics are products of MSCI Inc. MSCI Limited (UK)
5 Through our legacy companies KLD, Innovest, IRRC, and GMI Ratings
6 The MSCI KLD 400 Social Index was launched on May 01, 1990. Learn more about our 30+ years of ESG indexes at msci.com/30-years-of-esg
7 Origins of MSCI ESG Ratings established in 1999. Produced time series data since 2007
8 MSCI/ESG Research clients as of November 2020
When it comes to ESG and climate integration, we understand that no-one-size-fits-all, but there are core ingredients which are important to you and that we strive to be the global leader in:

1. Transparent, consistent, robust and up-to-date data that provides meaningful insights beyond corporate disclosure

   Tech-enabled human insights: our analysts are aided by AI and other technologies to increase the timeliness and precision of data collection and analysis, and to review and validate the quality of the data and sources.

   Alternative data helps minimize reliance on voluntary corporate disclosure: on average 45% of the data to determine a company’s ESG Rating is derived from alternative sources e.g., regulatory or government reports, reputable media sources and customer feedback.

   Dedicated issuer communications: our issuer team and our issuer communication portal ensure there is regular dialogue with companies to oversee data verification and educate companies on our methodology, to encourage greater transparency, disclosure and standardized reporting practices.

2. Industry material ESG insights which may impact financial performance

   Dynamic, transparent rules-based model: our model, which is publicly available via our ESG industry material map, is frequently recalibrated to capture new and emerging risks most relevant to a company’s core business model. The methodology is reviewed annually as part of a formal client consultation.

   Empirical-based research: MSCI’s Foundations of ESG Investing study (published in the Journal of Portfolio Management, July 2019) found companies with high MSCI ESG Ratings had higher profitability, lower tail risk and lower systematic risk, on average, based on 10 years of data. The study also found companies with the lowest MSCI ESG Ratings were three times more likely to have experienced drawdowns over the same period.

A selection of peer reviewed journal articles and client research:

- OECD 2020: ESG Investing Practices, Progress and Challenges
- MSCI 2020: Deconstructing ESG Ratings Performance Risk and Return for E, S and G by Time Horizon, Sector and Weighting
- The Journal of Index Investing
- JP Morgan 2019: Does an ESG tilt improve corporate bond portfolio outcomes?
- Barclays 2018 & 2016: The positive impact of ESG investing on bond performance
- JP Morgan 2018: Systematically investing in ESG themes within the USD high yield corporate bond market
3. Broad coverage and time-series data across regions, industries and asset classes

ESG Ratings coverage for over 14,000 issuers (8,500 companies) linked to over 680,000 equity and fixed income securities

Climate metrics for over 10,000 corporate and sovereign issuers, which is the equivalent to over 95% of the market value of equities and fixed income markets

Impact alignment metrics for over 8,600 equity and fixed income issuers, examining net contributions (positive, neutral, or adverse) towards addressing each of the 17 UN Sustainable Development Goals (SDGs)

Over 1,500 equity and fixed income indexes covering developed and emerging markets designed to represent the performance of the most common ESG investment approaches by including re-weighting or excluding companies based on ESG and Climate criteria

4. Solutions to support all aspects of the investment decision making process

We’re one of the only providers to offer in-house ESG data, ratings, analytical tools, indexes and real assets solutions to provide seamless integration of ESG to support your portfolio construction, risk management and active and passive strategies

ESG across your investment process: as we elaborate on page 10-11 our solutions are designed to work in sync to support your ESG policy and benchmark development, portfolio construction and asset allocation, company analysis, risk management, reporting and engagement requirements

5. Solutions to support regulatory, disclosure and reporting requirements

We have been actively involved in, and providing expertise to several Sustainable Finance initiatives, including the EU Sustainable Finance package committees and working groups

We were a pioneer in launching ESG transparency tools, making public ESG and Climate metrics for tens of thousands of funds, companies and indexes, helping to drive awareness, educate the market and raise ESG disclosure standards

Our flexible reporting solutions allow you to choose off-the-shelf or customizable reports. We provide self-service or a managed reporting service

6. Data, technology and flexible solutions to customize your offering

We are creating open architecture systems and modularization so you can customize your MSCI ESG and Climate Solutions and combine them with other platforms and providers

Our ESG, Climate, SDGs and Sustainable Finance Disclosure Regulation (SFDR) data can be delivered in granular form so you can create your own signal or combine datapoints with other sources
Our ESG solutions
MSCI and MSCI ESG Research16 bring transparency to ESG and Climate risks and opportunities for our clients worldwide.

MSCI delivers ESG indexes, analytics and real estate solutions, and MSCI ESG Research provides data, ratings, research and tools to help investors navigate increasing regulation, meet new client demands and assess industry material ESG risks and opportunities.

Our 49-year legacy measuring and modelling corporate ESG performance has helped to develop our solutions and technology today and shapes our research and innovations for tomorrow.

Remy Briand, Head of ESG

ESG solutions to enable you to build better portfolios
MSCI ESG Research AI-enhanced ESG and Climate data and ratings are integrated across MSCI Indexes, Analytics Systems and Real Estate Solutions

MSCI ESG Research provides ratings of companies and mutual funds to provide greater transparency and scrutiny of corporate practices for institutional investors seeking to avoid controversies and mitigate risk.

MSCI Equity Indexes are products of MSCI Inc. and are administered by MSCI UK Limited. ESG Indexes provided by MSCI Inc.

Ratings, research and metrics provided MSCI ESG Research LLC.
Our value: working with clients

Asset owners, asset managers, wealth managers and banks integrate our ESG and Climate Solutions into their investment strategy processes and stakeholder reporting in multiple ways:

**Risk manager**

- **Client use case**
  A multinational investment bank and financial services company analyzed carbon footprinting and climate risk management across all portfolios to inform quantitative portfolio construction and client reporting

**Global asset manager**

- **Client use case**
  Incorporated ESG criteria across its entire investment process with the aim of enhancing long-term returns and managing financial ESG risks for their clients

**US wealth manager**

- **Client use case**
  Integrated ESG into its online investment, brokerage and advice platform to provide ESG transparency to millions of its retail clients for assessing the ESG performance of their portfolio

**Asset management arm of an insurance firm**

- **Client use case**
  Used ESG ratings, controversies and Climate solutions to manage risks and identify opportunities across its $500bn+ portfolio. The parent company uses ESG Ratings for underwriting and due-diligence

**Consultant**

- **Client use case**
  Incorporated ESG factors to advance their manager evaluation processes in response to greater asset owner demand and created a default retirement fund

**European insurance company**

- **Client use case**
  Switched its actively managed global equity and credit portfolios to ESG benchmarks

**National pension manager**

- **Client use case**
  Adopted MSCI ESG Indexes to support engagement with corporates and managers to encourage ESG best practices and raise market standards

**Product development team**

- **Client use case**
  A leading ETF provider adopted a range of MSCI ESG Indexes to create its ESG ETF suite and used ESG research to publish the ESG characteristics of its range of ETFs globally
