

MSCI GBP Investment Grade Corporate Bond Index

The MSCI Corporate Bond Indexes are designed to serve as a measure of performance of the credit markets. They aim to represent relative performance at various levels of the investment process. The indexes are rules based with consideration towards factors like size, maturity and credit rating and are designed to be replicable by investors irrespective of their domicile.

*Over rebalance of last 12 months

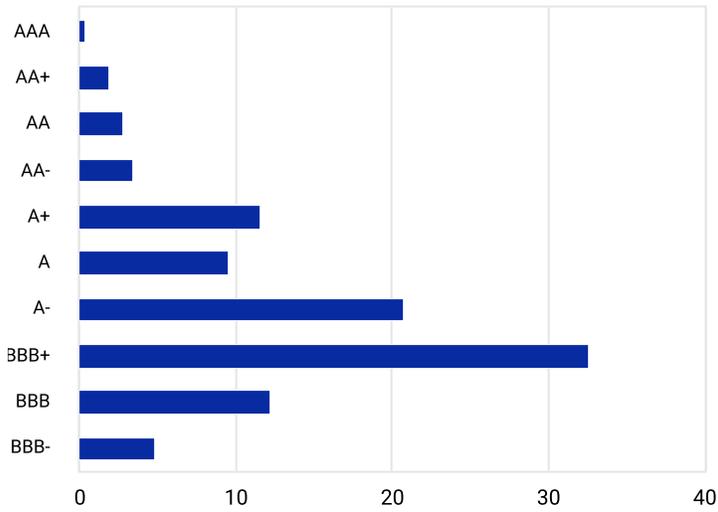

The MSCI GBP Investment Grade Corporate Bond Index was launched on Oct 20, 2020. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance -- whether actual or back-tested -- is no indication or guarantee of future performance.

Index Framework

The MSCI Corporate Bond Index will include securities selected from the global credit universe. In general, the universe includes all bullet, callable, and puttable fixed rate coupon bonds. Issues with tax-advantages, index-linked and perpetual bonds are excluded. In terms of capital structure, only senior secured, senior unsecured and subordinated (both junior and senior) debt are included. Capital securities, such as preferred stock, are not eligible to be part of the index. Securities are selected in the MSCI Corporate Bond Index based on the criteria like credit rating, country of domicile, size and maturity. The composition of the MSCI Corporate Bond Index is reviewed monthly, with the Rebalancing Date being the first business date of the month.

This summary is provided for illustrative purposes only and does not include all material elements of the index or its methodology. For a complete description of the index methodology, please see [Index methodology - MSCI](#).
