

LIBERTYQ GLOBAL DIVIDEND INDEX (USD)

The LibertyQ Global Dividend Index is based on the MSCI ACWI ex REITs Index, its parent index, which includes large and mid-cap stocks across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries¹. The LibertyQ Global Dividend Index is designed to reflect the performance of a Franklin Templeton strategy that seeks exposure to securities with high and persistent dividend income along with superior quality characteristics.

CUMULATIVE INDEX PERFORMANCE - NET RETURNS (USD) (FEB 2004 – FEB 2019)

ANNUAL PERFORMANCE (%)

Year	LibertyQ Global Dividend	MSCI ACWI ex REITs
2018	-7.99	-9.49

¹ The LibertyQ Indexes are custom indexes owned and calculated by MSCI, based on MSCI Parent Indexes, and aim to reflect the performance of certain Franklin Templeton strategies.

The LibertyQ Global Dividend Index was launched on Apr 18, 2016. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance -- whether actual or back-tested -- is no indication or guarantee of future performance.

INDEX METHODOLOGY

The LibertyQ Global Dividend Index targets companies with high dividend income and quality characteristics and includes companies that have higher than average dividend yield that is persistent. Index construction starts with a dividend persistence and yield screening process: Securities with a negative year-over-year ("YoY") Dividend per Share (DPS) growth in any of the last five years are excluded from the Index. Securities with a 5 year average monthly dividend less than 1.2 times the 5 year average monthly dividend yield of the Parent Index are also excluded from the Index.

Quality factor z-score is then determined for each security in the eligible universe by combining region relative z-scores of the underlying descriptors. A region relative z-score is computed for an underlying descriptor by standardizing the individual descriptor z-scores within specific sector groups for each region. The LibertyQ Global Dividend Index is constructed with a fixed number of securities approach. All the constituents in the eligible universe are ranked based on their quality factor z-score and 100 securities with the highest rank are selected. The securities included are weighted by the product of their market cap weight in the parent index and their quality factor score. Issuer weights are capped at 2%. The LibertyQ Global Dividend Index is rebalanced on a semi-annual basis, as of the close of the last business day of May and November.

ABOUT MSCI

For more than 40 years, MSCI' research-based indexes and analytics have helped the world' leading investors build and manage better portfolios. Clients rely on our offerings for deeper insights into the drivers of performance and risk in their portfolios, broad asset class coverage and innovative research. Our line of products and services includes indexes, analytical models, data, real estate benchmarks and ESG research. MSCI serves 99 of the top 100 largest money managers, according to the most recent P&I ranking. For more information, visit us at www.msci.com.
