### INDEX METHODOLOGY

The TIAA ESG Indexes are constructed and maintained in accordance with the MSCI Global Investable Market Indexes Methodology and calculated as per the MSCI Index Calculation Methodology. The TIAA ESG Indexes are designed to reflect the performance of TIAA's strategy that seeks to increase exposure to positive environmental, social and governance (ESG) factors, as well as exhibit lower carbon exposure, relative to their corresponding Parent MSCI Value or Growth Indexes. Their index construction is also aimed at minimizing the tracking error of this strategy relative to the corresponding Parent Indexes. The TIAA ESG Indexes are rebalanced quarterly coinciding with the regular Index Reviews of the MSCI Global Investable Market Indexes.
