CONSULTATION ON FURTHER WEIGHT INCREASE OF CHINA A SHARES IN THE MSCI INDEXES

September 2018

This consultation may or may not lead to the implementation of any or all of the proposed changes in MSCI’s indexes. Consultation feedback will remain confidential. MSCI may publicly disclose feedback if so requested by the provider of the feedback. In that case, the relevant feedback would be published together with the final results of the consultation.
INTRODUCTION

• The 5% initial inclusion of China A shares was **successfully implemented** in May and August 2018 with **overwhelming positive feedback** from market participants

• MSCI is now launching this consultation on a **further weight increase of China A shares in the MSCI Indexes**

• MSCI welcomes feedback from the investment community on the proposal by **February 15, 2019** and plans to announce its decision on or before **February 28, 2019**

• This consultation **may or may not result in changes** in the MSCI Global Investable Market Indexes
**CONSULTATION PROPOSALS**

<table>
<thead>
<tr>
<th>Proposal</th>
<th>Timing</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1.</strong> Increase the inclusion factor of China A Large Cap securities from 5% to 20% in two phases*</td>
<td>May 2019 and August 2019</td>
</tr>
<tr>
<td><strong>2.</strong> Add ChiNext to the list of eligible stock exchange segments</td>
<td>May 2019</td>
</tr>
<tr>
<td><strong>3.</strong> Add China A Mid Cap securities with a 20% inclusion factor in one phase</td>
<td>May 2020</td>
</tr>
</tbody>
</table>

*7.5 percentage points in each phase*
RATIONALE FOR THE PROPOSAL

The broad participation in, and successful implementation of, the initial 5% inclusion provided strong evidence of positive market accessibility of the China A shares market via Stock Connect.

Stock Connect Robustness

Stock Connect has proven to be a robust channel to access China A shares. Currently, Stock Connect daily quota and CNH liquidity are sufficient to address an inclusion factor that is a multiple of the current size.

Market Accessibility Improvements

Quadrupling of the Stock Connect daily limit, visible reduction in trading suspensions and successful implementation of a closing auction mechanism on the Shanghai Stock Exchange.
Since the announcement of the MSCI China A shares inclusion, more than 4,600 new Stock Connect accounts have been opened to trade China A shares and the total Northbound Connect portfolio value grew by US$46 billion.
With an increase of the inclusion factor of China A Large Cap securities to 20%, the pro forma index weight of China A shares in the MSCI Emerging Market Index would be 2.8% in August 2019. The addition of China A Mid Cap securities with an inclusion factor of 20% in May 2020 would increase the pro forma weight further to 3.4%.
The pace of market opening continued to accelerate in 2018 with more than 10 opening measures year to date
VISIBLE IMPROVEMENT IN TRADING SUSPENSIONS

# of trading suspensions in MSCI China A International IMI Index

- Blue line: # of large cap suspensions
- Yellow line: # of mid cap suspensions
- Red line: # of small cap suspensions (Right)

- 9 Jul 2015: Large Cap: 56
  Mid Cap: 76
  Small Cap: 794

- 1 June 2017: Large Cap: 16
  Mid Cap: 12
  Small Cap: 119

- 5 Sep 2018: Large Cap: 0
  Mid Cap: 0
  Small Cap: 2
CHINETX REPRESENTS 20% OF THE CHINA A SHARES INVESTMENT OPPORTUNITY SET

- The ChiNext board represents around one-fifth of the total China A shares opportunity set in terms of number of stocks and free float adjusted market capitalization. It has a larger free float adjusted market capitalization than the Shenzhen main and SME boards.

- ChiNext securities are currently accessible through the expansion of Stock Connect. There are currently 194 ChiNext stocks eligible to be traded via Stock Connect.

Data as of September 3, 2018; Based on all listed China A shares in Shanghai and Shenzhen Stock Exchanges
COMPARISON OF LISTING REQUIREMENTS

- Listing requirements of ChiNext board are not materially lower than the main board/SME board
- Most tech companies made their debut in ChiNext, which is positioned as China’s “Nasdaq”

KEY DISCUSSION QUESTIONS

• Is 20% inclusion factor for both Large and Mid Cap securities appropriate for the next phase of A shares inclusion?
  – Are you anticipating any accessibility constraints that could make the proposed weight increase challenging?

• The proposed implementation of the increase in inclusion factor to 20% for China A Large Cap securities would coincide with the reclassification of the MSCI Saudi Arabia and MSCI Argentina Indexes to Emerging Markets.
  – Is the management of potential turnover an important consideration?

• Is the differentiated treatment between China A Large and Mid Cap securities appropriate?
  – How much time would you require to be ready to cover the additional 168 China A Mid Cap securities?

• Do you agree with the addition of ChiNext to the list of eligible stock exchange segments for China?
  – Are you already invested in ChiNext securities?
The China A shares market has achieved significant progress in market opening. However, MSCI believes further progress could be made with respect to its market accessibility standards and is seeking feedback from international institutional investors as to what further improvements could facilitate the implementation of the proposal.

1. **Trading suspensions**: while there has been visible improvement lately, trading suspensions in the China A shares market remain unique when compared to other emerging markets. As a reminder, MSCI does not include and will remove stocks in prolonged suspension from the index.

2. **Alignment of international settlement cycle**: China currently operates on a T+0/1 settlement cycle. Despite the availability of market solutions on T+1/2 DVP/RDVP through Stock Connect, the short settlement cycle onshore continues to pose operational challenges to global investors, especially for those based outside Asian time zones.

3. **Access to hedging and derivatives vehicles**: Exchange restrictions placed on China A shares index licensing of certain listed futures and options as well as certain leveraged and inverse leveraged investment instruments, whether onshore or offshore, continue to hamper investors’ ability to manage risk and gain exposure beyond the cash market.

4. **Access to CNY for stock settlement**: The current pool of CNH liquidity remains sufficient to address an inclusion multiple the size of 5%. However, direct access to CNY for stock settlement could represent a more efficient FX option for international investors and financial intermediaries.

**REVIEW OF EXISTING ACCESSIBILITY CONSTRAINTS**
5. **Trading Holidays**: As Mainland China and Hong Kong observe different holiday schedules, Stock Connect is not open to international investors when Hong Kong is on holiday.

6. **Access to IPOs and ETFs**: IPOs and ETFs remain outside the scope of Stock Connect.

7. **Stock Lending and Borrowing**: While short selling is technically allowed, there is no functioning stock lending and borrowing market. This hampers investors’ ability to implement their investment views.

8. **Stability of the Stock Connect universe**: Given that the eligibility universe of Northbound Connect is tied to non-MSCI indexes, there is a dependency and forced turnover issue in the maintenance of MSCI Indexes.

9. **Omnibus in Stock Connect**: Given the implementation of the Broker-to-Client Assigned Number (BCAN) in Stock Connect, a functioning omnibus structure may need to be developed to allow for efficient transactions and achieving best execution.

Data as of September 3, 2018. GICS changes effective September 28, 2018
A HYPOTHETICAL FULL INCLUSION SCENARIO

MSCI China (including A shares) could have a weight of 40% in MSCI Emerging Markets Index.
APPENDIX

Turnover Analysis
INCLUSION TIMING OF A SHARES WITH SAUDI ARABIA

- While each market classification decision is independent, unsynchronized timing in the inclusion of the MSCI Saudi Arabia and Argentina Indexes and further inclusion of China A large cap shares could create additional market volatilities for a longer period of time.
- Synchronized rebalancing could save turnover by US$ 3.3 billion on a pro forma basis.

Index weights are based on data as of 3 September 2018. Portfolio flows are estimated based on assets benchmarked to MSCI indexes as of Dec 31, 2017, as reported on March 31, 2018 by eVestment, Morningstar and Bloomberg. The USD 3.3 billion turnover compares total capital movements impacted by the synchronized vs. unsynchronized rebalancing.
APPENDIX

AN UPDATE ON TRADING SUSPENSIONS
VISIBLE REDUCTION IN TRADING SUSPENSIONS SINCE 2015

- Compared to 2015, overall suspension instances have declined by 80% in 2018.
- Reduction in trading suspensions is observed across different durations.
- Most suspension instances in China rarely last for only one day.
- There remain many cases of suspensions exceeding 3 months in duration.

Suspension Instances by Duration (Investable Universe)

- High # of 1-day suspension due to annual shareholding meeting.
Recent improvements in trading suspensions can be attributed to tighter enforcement of suspension policies announced in 2016

Reasons for improved trading suspension performance

1. **Improved quality of suspension disclosures** – listed companies are now required to disclose restructuring details related to the underlying assets, counterparties, transaction methods and content of restructuring agreements. Exchanges strive to strictly control information disclosure consistency to curb “arbitrary suspension announcements”

2. **Narrowed scope for trading suspension** – non-public offerings, transfer of control rights and external investments are examples that do not justify long term trading suspension. Exchanges have been guiding listed companies to reduce reliance on trading suspension when planning major corporate actions

3. **Enhanced role of phased information disclosure** – to reduce unnecessary suspension, exchanges urge listed companies to speed up audit work and follow the approval procedures thereby shortening the duration of trading suspension
PROBABILITY OF REPEATED SUSPENSION

- By analyzing the trend of trading suspensions in two consecutive years, we derive the historical trend of repeated suspensions as a proxy for measuring probability of repeated suspension.

- The probability of a large cap A shares to be suspended repeatedly has dropped to 10% in 2017 from 78% in 2014.

- The probability of a large cap SOE A shares to suspended repeatedly has dropped to 12% in 2017 from 69% in 2014.

- The probability of non-SOE going into repeated suspension is higher.

Data include all companies suspended at any point in time but exclude 1 day suspensions.
TRADING SUSPENSIONS BY VARIOUS DURATION HORIZONS HAVE ALL COME DOWN

Number of Suspensions by Duration (Investable Universe)

Suspensions exceeding 3 months were removed from the MSCI Investable Universe since the new index rules were implemented.

Data include all companies suspended at any point in time but exclude 1 day suspensions.
For more than 40 years, MSCI’s research-based indexes and analytics have helped the world’s leading investors build and manage better portfolios. Clients rely on our offerings for deeper insights into the drivers of performance and risk in their portfolios, broad asset class coverage and innovative research.

Our line of products and services includes indexes, analytical models, data, real estate benchmarks and ESG research.

MSCI serves 99 of the top 100 largest money managers, according to the most recent P&I ranking.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.’s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.’s company filings on the Investor Relations section of www.msci.com.

MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI’s products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.

Any use of or access to products, services or information of MSCI requires a license from MSCI.
