

UPDATE: *The MSCI | Moody's Private Credit Risk Assessment is now live.*
Original announcement continues below.

MSCI and Moody's to Launch Independent Risk Assessments for Private Credit Investments

Solution to Promote Transparency and Strengthen Investors' Private Credit Asset Allocation Strategies

NEW YORK – April 21, 2025 – MSCI Inc. (NYSE:MSCI) and Moody's Corporation (NYSE:MCO) will jointly create a first-of-its-kind solution to provide independent risk assessments for private credit investments at scale.

As the private credit market continues to evolve and grow, the need for consistent standards and better tools has become essential for investors to assess, compare and communicate the risk of their investments.

MSCI offers a unique and comprehensive universe of high-quality private capital data, sourced from original documents provided by managers, including data on more than 2,800 private credit funds and 14,000+ individual underlying companies. As part of this joint offering, Moody's will extend its flagship EDF-X models into MSCI's private credit solutions. EDF-X delivers risk insights using best-in-class credit models and early warning signals to help investors assess the financial strength of public and private companies globally.

The combination of Moody's flagship EDF-X credit risk modeling solutions with MSCI's universe of private credit investment data will produce proprietary third-party risk assessments for private credit investments available at the underlying company and facility level using transparent metrics.

"As the private credit market evolves, investors are looking for trusted independent assessments to help benchmark credit risk and inform investments and monitor portfolios," **said Rob Fauber, President and CEO of Moody's.** "Our partnership with MSCI will play a critical role in providing these insights, helping market participants make informed decisions."

"The rapid growth of private credit continues to transform the global investment landscape while highlighting the need for increased transparency, consistent standards and independent risk assessment," **said Henry A. Fernandez, Chairman and CEO of MSCI.**

“We are proud to partner with Moody’s to deliver innovative solutions that can help drive greater clarity and confidence.”

The solution will be distinct from the services provided by Moody’s Ratings, the credit rating agency, to the issuers in the private credit market.

About Moody’s Corporation

“Safe Harbor” statement under the Private Securities Litigation Reform Act of 1995

Certain statements contained in this document are forward-looking statements and are based on future expectations, plans and prospects for Moody’s business and operations that involve a number of risks and uncertainties. Such statements involve estimates, projections, goals, forecasts, assumptions and uncertainties that could cause actual results or outcomes to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements. Stockholders and investors are cautioned not to place undue reliance on these forward-looking statements. The forward-looking statements and other information in this document are made as of the date hereof, and Moody’s undertakes no obligation (nor does it intend) to publicly supplement, update or revise such statements on a going-forward basis, whether as a result of subsequent developments, changed expectations or otherwise, except

as required by applicable law or regulation. In connection with the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995, Moody’s is identifying certain factors that could cause actual results to differ, perhaps materially, from those indicated by these forward-looking statements. These factors, risks and uncertainties include, but are not limited to: the impact of general economic conditions (including significant government debt and deficit levels, and inflation and related monetary policy actions by governments in response to inflation) on worldwide credit markets and on economic activity, including on the volume of mergers and acquisitions, and their effects on the volume of debt and other securities issued in domestic and/or global capital markets; the uncertain effectiveness and possible collateral consequences of U.S. and foreign government initiatives and monetary policy to respond to the current economic climate, including instability of financial institutions, credit quality concerns, and other potential impacts of volatility in financial and credit markets; the global impacts of the Russia - Ukraine military conflict and the military conflict in Israel and the surrounding areas on volatility in world financial markets, on general economic conditions and GDP in the U.S. and worldwide, on global relations and on the Company’s own operations and personnel; other matters that could affect the volume of debt and other securities issued in domestic and/or global capital markets, including regulation, increased utilization of technologies that have the potential to intensify competition and accelerate disruption and disintermediation in the financial services industry, as well as the number of issuances of securities without ratings or securities which are rated or evaluated by non-traditional parties; the level of merger and acquisition activity in the U.S. and abroad; the uncertain effectiveness and possible collateral consequences of U.S. and foreign government actions affecting credit markets, international trade and economic policy, including those related to tariffs, tax agreements and trade barriers; the impact of MIS’s withdrawal of its credit ratings on countries or entities within countries and of Moody’s no longer conducting commercial operations in countries where political instability warrants such actions; concerns in the marketplace affecting our credibility or otherwise affecting market perceptions of the integrity or utility of independent credit agency ratings; the introduction or development of competing and/or emerging technologies and products; pricing pressure from competitors and/or customers; the level of success of new product development and global expansion; the impact of regulation as an NRSRO, the potential for new U.S., state and local legislation and regulations; the potential for increased competition and regulation in the jurisdictions in which we operate, including the EU; exposure to litigation related to our rating opinions, as well as any other litigation, government and regulatory proceedings, investigations and inquiries to which Moody’s may be subject from time to time; provisions in U.S. legislation modifying the pleading standards and EU regulations modifying the liability standards applicable to credit rating agencies in a manner adverse to credit rating agencies; provisions of EU regulations imposing additional procedural and substantive requirements on the pricing of services and the expansion of supervisory remit to include non-EU ratings used for regulatory purposes; uncertainty regarding the future relationship between the U.S. and China; the possible loss of key employees and the impact of the global labor environment; failures or malfunctions of our operations and infrastructure; any vulnerabilities to cyber threats or other cybersecurity concerns; the timing and effectiveness of our restructuring programs, such as the 2022 - 2023 Geolocation Restructuring Program; currency and foreign exchange volatility; the outcome of any review by tax authorities of Moody’s global tax planning initiatives; exposure to potential criminal sanctions or civil remedies if Moody’s fails to comply with foreign and U.S. laws and regulations that are applicable in the jurisdictions in which Moody’s operates, including data protection and privacy laws, sanctions laws, anti-corruption laws, and local laws prohibiting corrupt payments to government officials; the impact of mergers, acquisitions, such as our acquisition of RMS, or other business combinations and the ability of Moody’s to successfully integrate acquired businesses; the level of future cash flows; the levels of capital investments; and a decline in the demand for credit risk management tools by financial institutions. These factors, risks and uncertainties as well as other risks and uncertainties that could cause Moody’s actual results to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements are described in greater detail under “Risk Factors” in Part I, Item 1A of Moody’s annual report on Form 10-K for the year ended December 31, 2024, and in other filings made by the Company from time to time with the SEC or in materials incorporated herein or therein. Stockholders and investors are cautioned that the occurrence of any of these factors, risks and uncertainties may cause the Company’s actual results to differ materially from those contemplated, expressed, projected, anticipated or implied in the forward-looking statements, which could have a material and adverse effect on the Company’s business, results of

operations and financial condition. New factors may emerge from time to time, and it is not possible for the Company to predict new factors, nor can the Company assess the potential effect of any new factors on it. Forward-looking and other statements in this document may also address our corporate responsibility progress, plans, and goals (including sustainability and environmental matters), and the inclusion of such statements is not an indication that these contents are necessarily material to investors or required to be disclosed in the Company's filings with the Securities and Exchange Commission. In addition, historical, current, and forward-looking sustainability-related statements may be based on standards for measuring progress that are still developing, internal controls and processes that continue to evolve, and assumptions that are subject to change in the future.

This press release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements relate to future events or to future financial performance and involve known and unknown risks, uncertainties and other factors that may cause MSCI's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these statements. In some cases, you can identify forward-looking statements by the use of words such as "may," "could," "expect," "intend," "plan," "seek," "anticipate," "believe," "estimate," "predict," "potential" or "continue," or the negative of these terms or other comparable terminology. You should not place undue reliance on forward-looking statements because they involve known and unknown risks, uncertainties and other factors that are, in some cases, beyond MSCI's control and that could materially affect actual results, levels of activity, performance or achievements.

Other factors that could materially affect MSCI's actual results, levels of activity, performance or achievements can be found in MSCI's Annual Report on Form 10-K for the fiscal year ended December 31, 2024 filed with the Securities and Exchange Commission ("SEC") on February 9, 2025 and in quarterly reports on Form 10-Q and current reports on Form 8-K filed or furnished with the SEC. If any of these risks or uncertainties materialize, or if MSCI's underlying assumptions prove to be incorrect, actual results may vary significantly from what MSCI projected. Any forward-looking statement in this press release reflects MSCI's current views with respect to future events and is subject to these and other risks, uncertainties and assumptions relating to MSCI's operations, results of operations, growth strategy and liquidity. MSCI assumes no obligation to publicly update or revise these forward-looking statements for any reason, whether as a result of new information, future events, or otherwise, except as required by law.
