

MSCI unveils new AI connectors transforming access to proprietary data

- *Clients can access through MSCI ONE and leading AI services*
- *IndexAI Insights is first solution in expanding roadmap across MSCI's products and services*

New York – February 24, 2026 – MSCI Inc. (NYSE: MSCI) is now offering clients AI connectivity to engage MSCI's proprietary data to ask questions, measure performance and perform analysis with seamless integration into their existing workstreams.

Clients can access MSCI's insights via the [MSCI ONE](#) cloud-based platform or through leading AI providers, including the MSCI app in OpenAI's ChatGPT and the MSCI connector in Claude.

Debuting on this new connectivity framework is **MSCI IndexAI Insights**, a conversational AI interface designed to transform how clients interact with MSCI index data. MSCI IndexAI Insights brings MSCI's trusted index data together with advanced Large Language Models to deliver fast, intuitive access to insights. Through conversational interaction, clients can ask plain-language questions about index performance, exposures, constituents and methodologies and get insights that are grounded directly in MSCI's proprietary data.

"Today's announcement marks a key step in our journey to scale AI capabilities across MSCI's broader solutions set and reflects our commitment to AI-driven innovation that transforms how clients engage with our data and models," **said Alvise Munari, Chief Product Officer at MSCI.** "By building secure connectivity into leading AI services, we are enabling clients to access MSCI insights wherever they work. The launch of IndexAI Insights is the first of a series of AI-enabled offerings that we will build on this foundation."

MSCI plans to expand this connectivity across additional product areas, including Private Assets, where AI capabilities will help accelerate insights across the investment lifecycle, from due diligence and underwriting to analytics and reporting. The firm will continue to introduce new AI integrations and enhancements designed to give clients greater flexibility in how they access, customize and apply MSCI's proprietary data and models.
