1 INTRODUCTION

MSCI Indexes are constructed and maintained in accordance with the MSCI Global Investable Market Indexes (GIMI) Methodology and calculated as per the MSCI Index Calculation Methodology. This methodology book provides a description of the rules and guidelines followed by MSCI for the construction and maintenance of the Invesco Revenue Weighted Global Index, Invesco Revenue Weighted International Index and Invesco Revenue Weighted Emerging Markets Index (herein, “Invesco Revenue Weighted Indexes”) which aim to reflect the performance of Invesco’s strategy.

2 INDEX CONSTRUCTION METHODOLOGY

2.1 DEFINING THE SECURITY UNIVERSE

The applicable universe includes all the existing constituents of an underlying MSCI Parent Index (herein, the “Parent Index”). This approach aims to provide an opportunity set with sufficient liquidity and capacity.

The Invesco Revenue Weighted Indexes include all the constituents of their respective MSCI Parent Indexes, as shown in the table below, with the exception of those securities whose trailing 12-month sales is either undefined or zero. Please refer to Appendix I for definition of security trailing 12-month sales.

Index	Parent Index
Invesco Revenue Weighted Global Index	MSCI ACWI Index
Invesco Revenue Weighted International Index	MSCI EAFE Index
Invesco Revenue Weighted Emerging Markets Index	MSCI EM Index

2.2 SECURITY WEIGHTING SCHEME

The included securities are assigned weights in proportion to trailing 12-month sales. For any security included in the parent index with a partial inclusion factor, its corresponding revenue is also adjusted by applying the same inclusion factor to its aggregate revenue.

Additionally, issuer weights are capped at 5%. At construction and at each rebalancing, if the weight of any issuer in the Indexes is greater than 5%, its weight will be capped at 5%. For the capped issuers, securities are weighted in proportion to their trailing 12-month sales. The weight of the uncapped securities will be increased in proportion to their weight prior to such capping. For more details on MSCI Capped Index Methodology, please refer to <https://www.msci.com/index-methodology>

3 MAINTAINING THE INDEX

3.1 QUARTERLY INDEX REVIEWS

The Invesco Revenue Weighted Indexes are rebalanced on a quarterly basis, usually as of the close of the last business day of February, May, August and November to coincide with the Quarterly Index Reviews of the Parent Index. The pro forma Indexes are generally announced nine business days before the effective date.

3.2 ONGOING EVENT RELATED CHANGES

The general treatment of corporate events in the Invesco Revenue Weighted Indexes aims to minimize turnover outside of Index Reviews. The methodology aims to appropriately represent an investor’s participation in an event based on relevant deal terms and pre-event weighting of the index constituents that are involved. Further, changes in index market capitalization that occur as a result of corporate event implementation will be offset by a corresponding change in the Variable Weighting Factor (VWF) of the constituent.

Additionally, if the frequency of Index Reviews in the Parent Index is greater than the frequency of Index Reviews in the **Invesco** Revenue Weighted Indexes, the changes made to the Parent Index during intermediate Index Reviews will be neutralized in the **Invesco** Revenue Weighted Indexes.

The following section briefly describes the treatment of common corporate events within the **Invesco** Revenue Weighted Indexes.

No new securities will be added (except where noted below) to the Index between Index Reviews. Parent Index deletions will be reflected simultaneously.

EVENT TYPE

EVENT DETAILS

New additions to the Parent Index

A new security added to the parent index (such as IPO and other early inclusions) will not be added to the index.

Spin-Offs

All securities created as a result of the spin-off of an existing Index constituent will be added to the Index at the time of event implementation. Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

Merger/Acquisition

For Mergers and Acquisitions, the acquirer’s post event weight will account for the proportionate amount of shares involved in deal consideration, while cash proceeds will be invested across the Index.

If an existing Index constituent is acquired by a non-Index constituent, the existing constituent will be deleted from the Index and the acquiring non-constituent will not be added to the Index.

Changes in Security Characteristics

A security will continue to be an Index constituent if there are changes in characteristics (country, sector, size segment, etc.) Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

Further detail and illustration regarding specific treatment of corporate events relevant to this Index can be found in the MSCI Corporate Events Methodology book under the sections detailing the treatment of events in Capped Weighted and Non-Market Capitalization Weighted indexes.

APPENDIX I: DEFINITION OF SECURITY TRAILING 12-MONTH SALES

For more details on the MSCI definition of issuer sales, please refer to MSCI Fundamental Data Methodology at <https://www.msci.com/index-methodology>

For companies from the Financials sector, where MSCI does not report sales as per MSCI Fundamental Data Methodology, the total operating revenue of the company will be used as proxy for issuer sales. It largely includes interest and fees on loans, interest on bank deposits, income from trading accounts, foreign exchange income, investment securities gains/losses and commissions & fees.

Issuer sales per share is calculated from issuer sales using issuer number of shares taking into consideration all equity share classes from the issuer. Security sales are then computed using security number of shares and issuer sales per share. MSCI uses security sales as of the end of the month preceding the Index Reviews for the rebalancing of the Invesco Revenue Weighted Indexes.

$$\text{Security Sales} = \text{Security Number of Shares} \times \frac{\text{Issuer Sales}}{\text{Issuer Number of Shares}}$$

The following sections have been modified since June 2017:

- Appendix II in the previous version of the methodology book describing the Corporate Events treatment has been deleted. The details on the Corporate Events treatment are now included in Section 3.2.
- Appendix I is updated to clarify the reference date for security sales

The following sections have been modified since August 2017:

Section 2.2: Security Weighting Scheme

- Clarification about the treatment of China A Stock Connect listings in Index.

The following sections have been modified since May 2018:

Section 2.2: Security Weighting Scheme

- Clarification about the treatment of all securities in the index included with a partial inclusion factor.

Update to reflect the name change of the OFI Revenue Weighted Indexes to Invesco Revenue Weighted Indexes.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of www.msci.com.
