1 INTRODUCTION

The MSCI Japan Empowering Women (WIN) Select Index (the “Index”) aims to represent the performance of those Japanese companies that either exhibit a commitment towards promoting and maintaining a high level of gender diversity among their workforce or have strongly increased their investment on capital goods or R&D while maintaining high level of sales growth and gender diversity. The constituents of the index are weighted in proportion to their market capitalization, sector relative Gender Diversity Score¹ and sector relative MSCI Quality Score², designed to maintain high financial quality as defined by MSCI.

¹ Please refer to section 2.1 for description of Gender Diversity Score and section 3.4.1 of the MSCI Japan Empowering Women (WIN) Index Methodology for description of sector relative Gender Diversity Score. The methodology for the MSCI Japan Empowering (WIN) Index is available at <https://www.msci.com/msci-japan-empowering-women-index>.

² For a brief description on MSCI Quality Score please refer to Appendix I. For detailed information on sector relative MSCI Quality Score, please refer to MSCI Quality Indexes methodology book available at <https://www.msci.com/index-methodology>.

2 MSCI ESG RESEARCH

MSCI ESG Research provides in-depth research, ratings and analysis of the environmental, social and governance-related business practices of thousands of companies worldwide. It consists of an integrated suite of tools and products to efficiently manage research, analysis and compliance tasks across the spectrum of ESG factors.

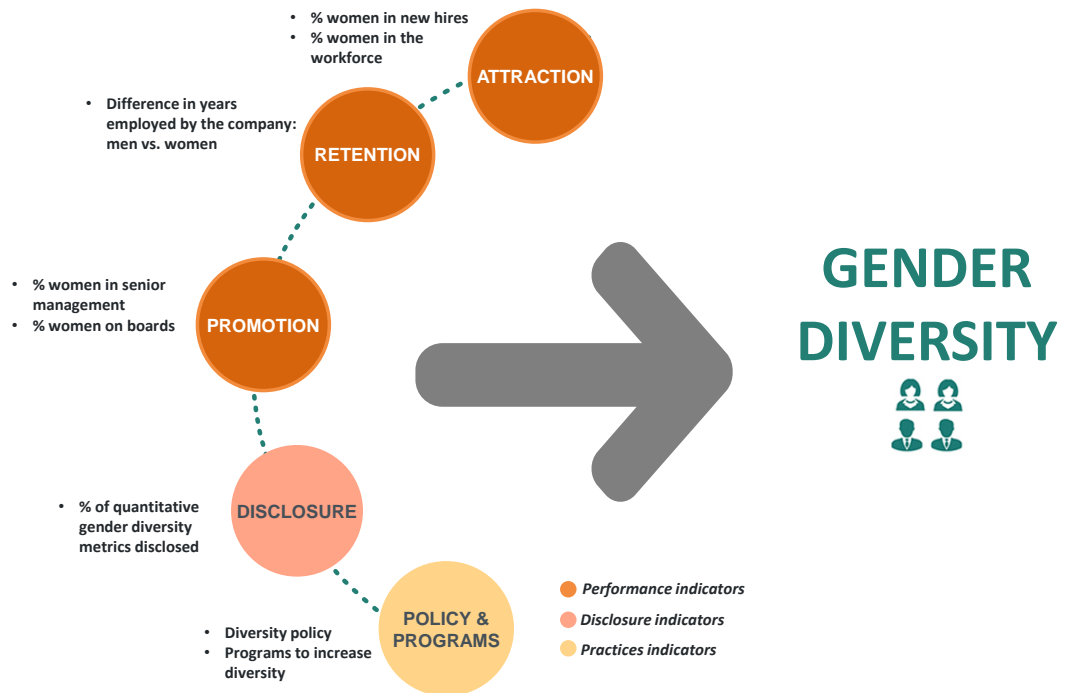

The Index uses company research provided by MSCI ESG Research. In particular, this index uses MSCI ESG Research’s gender diversity assessment and its MSCI ESG Controversies score.

For details on MSCI ESG Research’s full suite of ESG products, please refer to: http://www.msci.com/products/esg/about_msci_esg_research.html

2.1 MSCI ESG RESEARCH GENDER DIVERSITY SCORE

MSCI ESG Research provides a gender diversity score for companies in Japan based on their gender diversity performance and practices assessment across core elements of the employment cycle: Attraction, retention, and promotion.

Gender Diversity Assessment Framework

For more details on the gender diversity assessment scores, please refer to Appendix II of the MSCI Japan Empowering Women (WIN) Index Methodology.

2.2 MSCI ESG CONTROVERSIES

MSCI ESG Controversies (previously known as MSCI ESG Impact Monitor) provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with “0” being the most severe controversy. For more details on MSCI ESG Controversies Score, please refer to <https://www.msci.com/esg-integration>

3 INDEX CONSTRUCTION

3.1 APPLICABLE UNIVERSE

The applicable universe includes all the existing constituents of the MSCI Japan IMI Top 500 Index (the “Parent Index”). This approach aims to provide an opportunity set of the top 500 Japanese companies by free float adjusted market capitalization.

3.2 PHYSICAL INVESTMENT GROWTH UNIVERSE

Companies in the applicable universe which demonstrate strong growth in physical capital investment as well as in their sales are eligible for selection in the index. These companies must meet each of the following conditions:

- High Capex Growth – Companies in the top 20th Percentile of the Applicable Universe in Capex Growth

Capex growth is measured as the percentage change in capex investment over the last three years. When a company changes its fiscal year, the capex numbers are considered for the truncated year.

If two securities have identical Capex growth, the security with a higher free float adjusted market capitalization is awarded a higher rank. Companies where Capex investment for the current year or current year-3 is not available are excluded from the ranking process.

- Positive Capex Growth – Capex growth of the company, as calculated above, must be positive
- High Sales Growth – Companies in the top 50th Percentile of the Applicable Universe in Sales Growth

Sales growth is measured as the percentage change in sales over the last three years. When a company changes its fiscal year, the sales numbers are considered for the truncated year.

If two securities have identical Sales growth, the security with a higher free float adjusted market capitalization is awarded a higher rank. Companies where Sales for the current year or current year-3 is not available are excluded from the ranking process.

Certain companies do not report Sales. For such companies, Sales growth is substituted by the company’s operating income growth.

As per the MSCI Fundamental Data Methodology, MSCI does not provide sales data for certain financial sector companies (GICS Industry Group 4010 - Banks, GICS

Industry Group 4020 – Diversified Financials, except sub industry group 40201030 – Multi-Sector Holdings).

For details please refer to MSCI Fundamental Data Methodology at <https://www.msci.com/index-methodology>.

- Positive Sales Growth – Sales growth, as calculated above, must be positive
- High Gender Diversity Score - Companies in the top 50th Percentile of the Applicable Universe in gender diversity score

If two securities have identical Gender Diversity Score, the security with a higher free float adjusted market capitalization is awarded a higher rank. Companies where the Gender Diversity Score is either unavailable or zero are excluded from the ranking process.

- Companies must not have faced:
 - Very severe ESG Controversies (as defined by the MSCI ESG Controversies methodology)
 - Very severe or severe ongoing/structural controversies related to human rights (as defined by the MSCI ESG Controversies methodology)
 - Very severe, severe or moderate ongoing/structural controversies related to labor rights (as defined by the MSCI ESG Controversies methodology)

For further details please refer to Section 3.3.3 of the MSCI Japan Empowering Women (WIN) Index Methodology.

- Companies must not be classified as a “REIT” as defined in Section 3.3.2 of the MSCI Japan Empowering Women (WIN) Index Methodology.

3.3 MSCI JAPAN EMPOWERING WOMEN UNIVERSE (WIN UNIVERSE)

All securities that are a part of the MSCI Japan Empowering Women (WIN) Index constitute the WIN Universe.

3.4 COMBINED UNIVERSE

The combined universe includes all securities that are either a part of the WIN Universe (Section 3.3) or the Physical Investment Growth Universe (Section 3.2) and do not satisfy any of the following financial and liquidity exclusion criteria:

- Negative Operating Income –Companies which are operating at a loss (as measured by the company’s annual operating income) in each of the last 3 fiscal years.
- Net Loss –Companies that have reported a net loss (as measured by the company’s annual income before extra-ordinary items) in each of the last 3 fiscal years.

- Negative Book Value –Companies that have reported a negative book value in any of the last 3 fiscal years.
- Frequency of Trading³ – Securities that have traded on fewer than 80% of the trading days in the twelve months.
- Annualized Traded Value³ – Securities that have 1 year Annualized Traded Value (ATV) lesser than or equal to JPY 100,000,000,000.

3.5 SECURITY WEIGHTING

At each rebalancing, all the securities from the combined universe will be weighted as per Section 3.4 of the MSCI Japan Empowering Women (WIN) Index Methodology.

³ For detailed description of ‘Frequency of Trading’ and ‘Annualized Traded Value’ please refer to the MSCI Index Calculation Methodology at <https://www.msci.com/index-methodology>

4 MAINTENANCE OF THE INDEX

4.1 SEMI ANNUAL INDEX REVIEWS

The Index is rebalanced on a semi-annual basis, as per Section 4.1 of the MSCI Japan Empowering Women (WIN) Index Methodology. In addition, at each semi-annual review, for each security in the applicable universe -

- Fundamental Data – Physical Capital Investment, Sales, Operating Income, Net Profit and Book Value are considered as of the latest annual report from the close of the most recent fiscal year. For the majority of companies in Japan, the fiscal year ends on 31st March.
- Liquidity Data – Frequency of Trading and Annualized Traded Value are considered as of the last business day of April and October.

4.2 QUARTERLY INDEX REVIEWS

The Index is reviewed on a quarterly basis in February and August as per Section 4.2 of the MSCI Japan Empowering Women (WIN) Index Methodology. Companies involved in ESG Controversies, Human Rights Controversies and Labor Rights Controversies as per Section 3.3.3 of the MSCI Japan Empowering Women (WIN) Index Methodology are excluded from the Index during Quarterly Index Review.

4.3 ONGOING EVENT-RELATED MAINTENANCE

The general treatment of corporate events in the MSCI Japan Empowering Women (WIN) Select Index aims to minimize turnover outside of Index Reviews. The methodology aims to appropriately represent an investor’s participation in an event based on relevant deal terms and pre-event weighting of the index constituents that are involved. Further, changes in index market capitalization that occur as a result of corporate event implementation will be offset by a corresponding change in the Variable Weighting Factor (VWF) of the constituent.

Additionally, if the frequency of Index Reviews in the Parent Index is greater than the frequency of Index Reviews in the MSCI Japan Empowering Women (WIN) Select Index, the changes made to the Parent Index during intermediate Index Reviews will be neutralized in the MSCI Japan Empowering Women (WIN) Select Index.

The following section briefly describes the treatment of common corporate events within the MSCI Japan Empowering Women (WIN) Select Index.

No new securities will be added (except where noted below) to the Index between Index Reviews. Parent Index deletions will be reflected simultaneously.

EVENT TYPE

EVENT DETAILS

New additions to the Parent Index

A new security added to the parent index (such as IPO and other early inclusions) will not be added to the Index.

Spin-Offs

All securities created as a result of the spin-off of an existing Index constituent will be added to the Index at the time of event implementation. Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

Merger/Acquisition

For Mergers and Acquisitions, the acquirer’s post event weight will account for the proportionate amount of shares involved in deal consideration, while cash proceeds will be invested across the Index.

If an existing Index constituent is acquired by a non-Index constituent, the existing constituent will be deleted from the Index and the acquiring non-constituent will not be added to the Index.

Changes in Security Characteristics

A security will continue to be an index constituent if there are changes in characteristics (country, sector, size segment, etc.) Reevaluation for continued inclusion in the index will occur at the subsequent index Review.

Further detail and illustration regarding specific treatment of corporate events relevant to this Index can be found in the MSCI Corporate Events Methodology book under the sections detailing the treatment of events in Capped Weighted and Non-Market Capitalization Weighted indexes.

The MSCI Corporate Events methodology book is available at:

<https://www.msci.com/index-methodology>.

APPENDIX I: DESCRIPTION OF MSCI QUALITY SCORE

The MSCI Quality Score for each security is calculated by combining the z-scores of three fundamental descriptors, Return on Equity, Debt to Equity and Earnings Variability. A given variable z-score for a security is calculated using the mean and standard deviation of the corresponding variable computed within the MSCI Parent Index. After calculating component variable z-scores, a composite z-score for each security is computed by taking an equal-weighted average of the component z-scores. The Quality Score is then computed from the composite Z score as follows:

$$\text{Quality Score} = \begin{cases} 1 + Z & , Z > 0 \\ (1 - Z)^{-1} & , Z < 0 \end{cases}$$

Where Z is the composite Z score described earlier.

Sector Relative Quality Score

The sector-relative quality score is derived from the composite quality z-score. It is arrived at by standardizing the composite quality z-score within each sector. The sector-relative quality scores are winsorized at +/- 3.

The Quality Score is then computed from the sector-relative quality score as follows:

$$\text{Quality Score} = \begin{cases} 1 + Z & , Z > 0 \\ (1 - Z)^{-1} & , Z < 0 \end{cases}$$

Where Z is the sector-relative quality score determined in the previous step.

NOTICE AND DISCLAIMER

- This document and all of the information contained in it, including without limitation all text, data, graphs, charts (collectively, the “Information”) is the property of MSCI Inc. or its subsidiaries (collectively, “MSCI”), or MSCI’s licensors, direct or indirect suppliers or any third party involved in making or compiling any Information (collectively, with MSCI, the “Information Providers”) and is provided for informational purposes only. The Information may not be modified, reverse-engineered, reproduced or disseminated in whole or in part without prior written permission from MSCI.
- The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.
- The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.
- Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.
- Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.
- The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.
- None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.
- It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, “Index Linked Investments”). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.
- Index returns do not represent the results of actual trading of investable assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.
- The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.
- Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.
- Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.
- MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.’s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.’s company filings on the Investor Relations section of www.msci.com.
- MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI’s products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.

- Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD, FEA, InvestorForce, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor's. "Global Industry Classification Standard (GICS)" is a service mark of MSCI and Standard & Poor's.
