1 Introduction

The MSCI Europe Select Green ex Controversies Index and the MSCI USA Select Green ex Controversies Index (herein, 'MSCI Select Green ex Controversies Indexes') aims to represent the performance of a selection of securities from their parent index that offer products and services that contribute to an environmentally sustainable economy through efficient use of limited global natural resources. The MSCI Select Green ex Controversies Indexes also exclude companies that are involved in the production of controversial, nuclear or conventional weapons, as well as those that are involved in environmental controversies. The indexes are free-float market capitalization weighted. The MSCI Europe Select Green 50 Index (herein, 'MSCI Select Green 50 Index') aims to represent the performance of the largest 50 stocks by free-float market capitalization within MSCI Europe Select Green ex Controversies Index and aims to avoid concentration by capping the weight of securities within the index to a maximum of 5%.

The MSCI Europe Select Green 50 5% Decrement Index, MSCI Europe Select Green 50 5% Decrement Index (Gross), the MSCI USA Select Green 50 3% Decrement Index, the MSCI USA Select Green 50 4% Decrement Index and the MSCI Europe Select Green 50 3.5% Decrement Index (herein, 'MSCI Select Green 50 Decrement Indexes') aim to represent the performance of the MSCI Select Green 50 Index while applying a constant markdown ('synthetic dividend') on an annual basis, expressed as a percentage of performance.

2 MSCI ESG Research

The MSCI Select Green ex Controversies Indexes, MSCI Europe Select Green 50 Index and MSCI Select Green 50 Decrement Indexes use company research provided by MSCI ESG Research LLC. In particular, these indexes use the MSCI Business Involvement Screening Research product.

For details on MSCI ESG Research's full suite of ESG products, please refer to: http://www.msci.com/products/esg/about_msci_esg_research.html

2.1 MSCI ESG BUSINESS INVOLVEMENT SCREENING RESEARCH

MSCI ESG Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions reliably and efficiently.

For more details on MSCI ESG Business Involvement Screening Research, please refer to http://www.msci.com/resources/factsheets/MSCI_ESG_BISR.pdf

3 Constructing the Indexes

The MSCI Select Green ex Controversies Indexes, MSCI Select Green 50 Index and MSCI Select Green 50 Decrement Indexes are constructed from their respective parent indexes, as shown in the table below (each a “Parent Index”):

Index Name	Parent Index
MSCI Europe Select Green ex Controversies Index	MSCI Europe IMI
MSCI Europe Select Green 50 Index	
MSCI Europe Select Green 50 5% Decrement Index	
MSCI Europe Select Green 50 5% Decrement Index (Gross)	
MSCI Europe Select Green 50 3.5% Decrement Index	
MSCI Europe Select Green 50 4% Decrement Index	
MSCI USA Select Green ex Controversies Index	MSCI USA IMI
MSCI USA Select Green 50 3% Decrement Index	

The following steps are applied at initial construction as well as subsequent Quarterly and Semi-Annual Index Reviews of the “MSCI Select Green ex Controversies Index”.

- Eligible Universe Screening
- Business Involvement Exclusions

In addition to the above steps, the following steps are applied to the MSCI Select Green ex Controversies Index at initial construction as well as subsequent Quarterly and Semi-Annual Index Reviews to construct the MSCI Select Green 50 Decrement Index.

- Security Selection
- Applying the Capping
- Applying the Decrement

3.1 ELIGIBLE UNIVERSE SCREENING

The eligible universe for the MSCI Select Green ex Controversies Index is obtained by applying the MSCI Global Environment Index Methodology¹ on the Parent Index, with a customization to include companies that derive 10% of more of their revenue cumulatively from the five CleanTech (CT) themes as noted in Section 3.3 of the MSCI Global Environment Index Methodology.

3.2 BUSINESS INVOLVEMENT EXCLUSIONS

From the eligible universe, companies are excluded based on their involvement in the production of controversial, nuclear and conventional weapons, as well as those involved in environmental controversies. The details of these criteria are described in Appendix 1.

The securities included after the application of the above exclusions are weighted in proportion of their free-float adjusted market capitalization to form the “MSCI Select Green ex Controversies Index”.

The following steps are then applied to the MSCI Select Green ex Controversies Index to construct the MSCI Select Green 50 Decrement Index.

3.3 SECURITY SELECTION

The largest 50 securities ranked in the descending order of their free-float adjusted market capitalization are selected for inclusion in the Index.

3.4 APPLYING THE CAPPING

The maximum weight of any security in the Index is capped at 5% in accordance with the MSCI Capped Indexes methodology². The excess weight of the capped securities is distributed among the remaining constituents in proportion of their free float market capitalization to form the capped index - MSCI Select Green 50 Index.

¹ Please refer to the MSCI Global Environment Index Methodology at <http://www.msci.com/index-methodology>.

² Please refer to the MSCI Capped Indexes Methodology at <http://www.msci.com/index-methodology>.

3.5 APPLYING THE DECREMENT

4 Maintaining the Indexes

4.1 QUARTERLY INDEX REVIEWS

The MSCI Select Green ex Controversies, the MSCI Select Green 50 Index and the MSCI Select Green 50 Decrement Indexes are reviewed on a quarterly basis as described in Section 3, coinciding with the May and November Semi-Annual Index Reviews and the February and August Quarterly Index Reviews of the Parent Index.

The pro forma Indexes are typically announced nine business days before the effective date.

In general, MSCI uses MSCI ESG Research data (MSCI Business Involvement Screening Research) as of the end of the month preceding the Index Reviews. For some securities, such data may not be published by MSCI ESG Research by the end of the month preceding the Index Review. For such securities, MSCI will use ESG data published after the end of month, when available.

4.2 ONGOING EVENT RELATED CHANGES

The general treatment of corporate events in the MSCI Select Green ex Controversies, MSCI Select Green 50 Index and e MSCI Select Green 50 Decrement Indexes aims to minimize turnover outside of index Reviews. The methodology aims to appropriately represent an investor's participation in an event based on relevant deal terms and pre-event weighting of the index constituents that are involved.

The following section briefly describes the treatment of common corporate events within the MSCI Select Green ex Controversies Index, MSCI Select Green 50 Index and MSCI Select Green 50 Decrement Indexes.

No new securities will be added to the Indexes between Index Reviews. For cases where additions are noted below, securities will be added to the index only if added to the parent index.

Parent Index deletions will be reflected simultaneously.

EVENT TYPE

EVENT DETAILS

New additions to the Parent Index

A new security added to the parent index (such as IPO and other early inclusions) will not be added to the index.

Spin-Offs

All securities created as a result of the spin-off of an existing Index constituent will not be added to the Index at the time of event implementation.

Merger/Acquisition

For Mergers and Acquisitions, the acquirer's post event weight will account for the proportionate amount of shares involved in deal consideration, while cash proceeds will be invested across the Index.

If an existing Index constituent is acquired by a non-Index constituent, the existing constituent will be deleted from the Index and the acquiring non-constituent will not be added to the Index.

Changes in Security Characteristics

A security will be removed from the Index if there are changes in its characteristics (country, sector, size segment, etc.) Reevaluation for inclusion in the Index will occur at the subsequent Index Review.

Further detail and illustration regarding specific treatment of corporate events relevant to this Index can be found in the MSCI Corporate Events Methodology book under the sections detailing the treatment of events in Capped Weighted and Non-Market Capitalization Weighted indexes.

The MSCI Corporate Events methodology book is available at:
<https://www.msci.com/index-methodology>

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investable assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of www.msci.com.
