 - 3.2 Quarterly Index Review 6
 - 3.3 Ongoing Event Related Changes 7
- Appendix I: Liquidity Criteria for MSCI Saudi Arabia IMI 9

1 INTRODUCTION

The MSCI Tadawul 30 Index (the “Index”) is constructed from the MSCI Saudi Arabia IMI Index¹ (the “Parent Index”). The Index aims to include approximately the 30 largest stocks from the Parent Index based on their free float-adjusted market capitalization, subject to a cap on the weight of individual constituents.

¹ For details on the MSCI Saudi Arabia IMI Index, please refer to the MSCI Global Investable Market Indexes (GIMI) Methodology, available at <https://www.msci.com/index/methodology/latest/GIMI>

Definitions of standard terms used in GIMI index methodology are available at <https://www.msci.com/index/methodology/latest/IndexGlossary>

2 INDEX CONSTRUCTION METHODOLOGY

The index construction rules defined in sections 2.1 to 2.3 below are used to construct the MSCI Tadawul 30 Index.

2.1 APPLICABLE UNIVERSE

The applicable universe includes all the constituents of the Parent Index - MSCI Saudi Arabia IMI.

2.2 SECURITY SELECTION

The Index aims to include the 30 largest stocks from the Parent Index based on their free float-adjusted market capitalization.

2.3 SECURITY WEIGHTING

The selected Index constituents are assigned weights in the proportion of their free float-adjusted market capitalization. The weight of each constituent security is capped at 15%.

3 MAINTAINING THE INDEXES

3.1 ANNUAL INDEX REVIEW

The MSCI Tadawul 30 Index is rebalanced on an annual basis, usually as of the close of the last business day of November, coinciding with the November Index Review of the MSCI Global Investable Market Indexes.

The pro forma Index is in general announced nine business days before the effective date.

During the Annual Index Review, the target number of constituents can range from 30 to 35 and is determined based on following criteria:

- If the current number of securities in the Index is equal to or less than 30 then the target number is equal to 30
- If the current number of securities in the Index is greater than 30 but less than 35 then the target number is equal to current number of constituents in the index
- If the current number of securities in the Index is equal to or greater than 35 then the target number is equal to 35

For example

Number of current Index constituents prior to the Annual Index Review	Target number of Index constituents at the Annual Index Review
24	30
28	30
30	30
32	32
35	35
38	35

Index constituents are selected from the Parent Index in descending order of free float-adjusted market capitalization. In case the Parent Index has less than 30 constituents, all the Parent Index constituents are included in the Index.

The selected Index constituents are assigned weights in the proportion of their free float-adjusted market capitalization. The weight of each constituent security is capped at 15%.

3.2 QUARTERLY INDEX REVIEW

In addition to the Annual Index Review, the Index is reviewed on a quarterly basis, usually as of the close of the last business day of February, May and August coinciding with the February, May and August Index Review of the MSCI Global Investable Market Indexes.

During a Quarterly Index Review, the number of constituents is allowed to range from 25 to 35 based on following criteria:

- If the current number of constituents in the Index is less than 25, then additional securities are added to the Index such that the number of securities reaches 30. New Index constituents are selected from the Parent Index in the order of free float-adjusted market capitalization. If the current number of securities in the Index is less than 25 and the Parent Index has less than 30 constituents then all the Parent Index constituents are included in the Index.
- If the current number of securities in the Index is greater than 35, then the 35 largest securities in the order of free float-adjusted market capitalization are retained from the current Index constituents.

For example

Number of current Index constituents prior to the Quarterly Index Review	Treatment at the Quarterly Index Review
25	No change in Index constituents
28	No change in Index constituents
35	No change in Index constituents
38	Retain largest 35 current Index constituents, based on free float-adjusted market capitalization
24	Add largest 6 non-constituent Parent Index securities, based on free float-adjusted market capitalization

The selected Index constituents are assigned weights in the proportion of their free float-adjusted market capitalization. The weight of each constituent security is capped at 15%.

The Index is available in the “Price” return variant only. The MSCI Index Calculation methodology book is available at:

<https://www.msci.com/index/methodology/latest/IndexCalc>

3.3 ONGOING EVENT RELATED CHANGES

The following section briefly describes the treatment of common corporate events within the MSCI Tadawul 30 Index.

No new securities will be added (except where noted below) to the Index between Index Reviews. For cases where additions are noted below, securities will be added to the Index only if added to the Parent Index.

Parent Index deletions will be reflected simultaneously in the Index.

EVENT TYPE

EVENT DETAILS

New additions to the Parent Index

A new security added to the Parent Index (such as IPO and other early inclusion) will be added to the Index at an estimated full market capitalization adjustment factor on the date of security inclusion.

Spin-Offs

All securities created as a result of the spin-off of an existing Index constituent will be added to the Index at the time of event implementation. Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review of the corresponding underlying Index.

Merger/Acquisition

For Mergers and Acquisitions, the acquirer's post event weight will account for the proportionate amount of shares involved in deal consideration, while cash proceeds will be invested across the Index.

If an existing Index constituent is acquired by a non-Index constituent, the existing constituent will be deleted from the Index and the acquiring non-constituent will be added to the Index. Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

Changes in Security Characteristics

A security will continue to be an Index constituent if there are changes in characteristics (country, sector, size segment, etc.). Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review of the corresponding Parent Index.

Further detail and illustration regarding specific treatment of corporate events relevant to this Index can be found in the MSCI Corporate Events Methodology book under the sections detailing the treatment of events in Capped Weighted and Non-Market Capitalization Weighted indexes.

The MSCI Corporate Events methodology book is available at:

APPENDIX I: LIQUIDITY CRITERIA FOR MSCI SAUDI ARABIA IMI

Liquidity Measure ¹	Eligibility criteria for new index constituents	Eligibility criteria for existing index constituents
12M ATVR	$\geq 15\%$	$\geq 10\%$
3M ATVR	$\geq 15\%$	$\geq 5\%$
3M Frequency of Trading	$\geq 80\%$	$\geq 70\%$

- Annual Traded Value Ratio (ATVR)
 - First, monthly median traded values are computed using the median daily traded value, multiplied by the number of days in the month that the security traded. The daily traded value of a security is equal to the number of shares traded during the day, multiplied by the closing price of that security. The median daily traded value is the median of the daily traded values in a given month.
 - Second, the monthly median traded value of a security is divided by its free float-adjusted security market capitalization at the end of the month for each month, giving the monthly median traded value ratio.
 - Finally, the 12-month ATVR is obtained by taking the average of the monthly median traded value ratios of the previous 12 months – or the number of months for which this data is available (previous 6 months, 3 months or 1 month) – and annualizing it by multiplying it by 12. The 3-month ATVR is obtained by taking the average of the monthly median traded value ratios of the previous 3 months – or 1 month if 3 months of data are not available – and annualizing it by multiplying it by 12.
- Frequency of Trading
 - The 3-month Frequency of Trading is determined by dividing the number of days a security traded during a 3-month period by the maximum possible number of trading days within this period. If 3 months of data are not available, 1 month of data is used for the calculation of 3-month Frequency of Trading.

¹ For more details on liquidity measures, please refer to MSCI Index Calculation methodology book and MSCI Global Investable Market Indexes (GIMI) methodology. The MSCI Index Calculation methodology book is available at <https://www.msci.com/index/methodology/latest/IndexCalc> and MSCI Global Investable Market Indexes (GIMI) methodology is available at <https://www.msci.com/index/methodology/latest/GIMI>

NOTICE AND DISCLAIMER

- This document and all of the information contained in it, including without limitation all text, data, graphs, charts (collectively, the “Information”) is the property of MSCI Inc. or its subsidiaries (collectively, “MSCI”), or MSCI’s licensors, direct or indirect suppliers or any third party involved in making or compiling any Information (collectively, with MSCI, the “Information Providers”) and is provided for informational purposes only. The Information may not be modified, reverse-engineered, reproduced or redisseminated in whole or in part without prior written permission from MSCI.
- The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.
- The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.
- Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.
- Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.
- The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.
- None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.
- It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, “Index Linked Investments”). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.
- Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.
- The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.
- Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.
- Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.
- MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.’s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.’s company filings on the Investor Relations section of www.msci.com.
- MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI’s products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.
- Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor’s. “Global Industry Classification Standard (GICS)” is a service mark of MSCI and Standard & Poor’s.
