1 Introduction

The MSCI Taiwan Select ESG Sustainability High Yield Top 30 Index (herein, the “Index”) aims to reflect the performance of a strategy that selects 30 stocks from the MSCI Taiwan Index (herein, the “Parent Index”) which have high Dividend Yield, ESG Controversy Score greater than or equal to 3 and ESG Ratings equal to or better than ‘BB’. The constituents of the Index are assigned weights in proportion of the score calculated from the historic Dividend Yield of the constituents.

The Index staggers the changes in securities’ number of shares due to rebalancing, in equal proportion over five days leading into and including the effective date of the Index Review.

2 ESG Research Framework

The MSCI Taiwan Select ESG Sustainability High Yield Top 30 Index uses company ratings and research provided by MSCI ESG Research. The Index uses the following MSCI ESG Research products: MSCI ESG Ratings, MSCI ESG Controversies.

For details on MSCI ESG Research’s full suite of ESG products, please refer to:

<https://www.msci.com/esg-investing>

2.1 MSCI ESG RATINGS

MSCI ESG Ratings provides research, analysis and ratings of how well companies manage environmental, social and governance risks and opportunities.

MSCI ESG Ratings provides an overall company ESG rating - a seven-point scale from ‘AAA’ to ‘CCC’. In addition, the product provides scores and percentiles indicating how well a company manages each key issue relative to industry peers.

For more details on MSCI ESG Ratings, please refer to: <https://www.msci.com/esg-ratings>

2.2 MSCI ESG CONTROVERSIES

MSCI ESG Controversies (formerly known as MSCI Impact Monitor) provides assessments of controversies concerning the negative environmental, social, and/or governance impact of company operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with “0” being the most severe controversy.

For more details on MSCI ESG Controversies, please refer to:

<https://www.msci.com/documents/10199/acbe7c8a-a4e4-49de-9cf8-5e957245b86b>

3 Constructing the Index

3.1 IDENTIFYING THE REFERENCE INDEX

The Reference Index is constructed from the MSCI Taiwan Index (the “Parent Index”). The following steps are applied at initial construction and subsequent reviews of the Reference Index.

- Eligible Universe Screening
- Security Selection
- Security Weighting

3.1.1 ELIGIBLE UNIVERSE SCREENING

3.1.1.1 ESG RATINGS ELIGIBILITY

The Index uses MSCI ESG Ratings to identify companies that have demonstrated an ability to manage their ESG risks and opportunities. Companies having MSCI ESG Rating of ‘BB’ and above are eligible for inclusion in the Index. Unrated companies (companies not assessed by MSCI ESG Research on MSCI ESG Rating) are excluded from the eligible universe.

3.1.1.2 ESG CONTROVERSIES SCORE ELIGIBILITY

Companies are required to have an MSCI ESG Controversies Score of 3 or higher to be eligible for inclusion in the Index. Unrated companies (companies not assessed by MSCI ESG Research on MSCI ESG Controversies Score) are excluded from the eligible universe.

3.1.1.3 SIZE ELIGIBILITY

Securities with closing full market capitalization greater than or equal to USD 700 million are eligible for inclusion in the Index.

3.1.1.4 EARNINGS PER SHARE ELIGIBILITY

Securities with positive annual Earnings Per Share¹ are eligible for inclusion in the Index.

Securities in the Parent Index that fulfill all the above criteria form the Eligible Universe.

If the number of securities in the Eligible Universe is less than 20, stocks with highest Earnings Per Share from the remaining stocks in the Parent Index which fulfill the

¹ Please refer to the MSCI Fundamental Data methodology at <https://www.msci.com/index-methodology>

ESG Ratings Eligibility, ESG Controversies Score Eligibility and Size Eligibility are added sequentially to the Eligible Universe until the number of securities in the Eligible Universe reaches 20.

3.1.2 SECURITY SELECTION

From the securities in the Eligible Universe, 30 securities in descending order of the following Dividend Score are selected for inclusion in the Index.

$$\text{Dividend Score} = 0.25 * \text{Dividend Yield}^2 + 0.75 * (\text{Average Dividend Yield of last 3 yrs})$$

If the number of stocks in the Eligible Universe is less than 30, the Index will have as many stocks as in the Eligible Universe.

3.1.3 SECURITY WEIGHTING

The securities selected for inclusion in the Index are weighted in proportion of the Dividend Score at every Index Review.

The final weights of each security in the MSCI Taiwan Select ESG Sustainability High Yield Top 30 Index will be capped at 15%.

3.2 STAGGERING THE INDEX REBALANCING RESULTS

The rebalance changes of the Index are then staggered for implementation by spreading the change in Index Number of Shares (NOS) for each security over five days leading into the rebalancing effective date (T). The change is distributed equally among the five days as compared to the Reference Index, where all the changes are effective on the rebalancing date (T).

For each $t \in \{5 \text{ days of staggering}\}$, number of shares for each security included in the Index (*Staggered Index NOS (t)*) are calculated as below:

$$\text{Staggered Index NOS (t)} = \text{Reference Index NOS (t)} + [\text{Adjusted Reference Index NOS (T)} - \text{Reference Index NOS (t)}] * (N/5)$$

Where:

t : Effective date of the staggering

² Please refer to the MSCI Fundamental Data methodology at https://www.msci.com/eqb/methodology/meth_docs/MSCI_Fundamental_Data_Methodology_Mar_2018.pdf

T: Rebalancing effective date of the Reference Index

Reference Index NOS (t): It is the number of shares of a security in the Reference Index effective on t (as of close t – 1). It is calculated as a product of the end of day security number of shares on t – 1 and Full Market Cap Adjustment Factor³ in the Reference Index on t

Adjusted Reference Index NOS (T) : Reference Index NOS (T) adjusted for change in number of shares due to events like Rights Issues, Split , Consolidation , Stock Dividend, effective between t and T

N = nth day of staggering

³ Full Market Cap Adjustment Factor (FMCAF): A factor that is used in index constituent weighting calculation defined as (Inclusion Factor (i.e. FIF)) *(Constraint Factor)*(Variable Weighting Factor). For more details, please refer to section 2.7 of the MSCI corporate Events Methodology book at <http://www.msci.com/index-methodology>

4 Maintaining the Index

4.1 SEMI ANNUAL INDEX REVIEWS

The Reference Index is rebalanced on a semi-annual basis as per the steps described in Section 3, usually as of the close of the last business day of May and November, coinciding with the May and November Semi-Annual Index Review (SAIR) of the MSCI Global Investable Market Indexes. The MSCI Taiwan Select ESG Sustainability High Yield Top 30 Index is generally rebalanced over five days T-4, T-3, T-2, T-1 and T, where T is the effective date of the May and November Semi-Annual Index Review of the MSCI Global Investable Market Indexes.

In general, MSCI uses MSCI ESG Research data (including MSCI ESG Ratings MSCI ESG Controversies Scores) as of the end of the month preceding the Index Reviews for the rebalancing of the Index. For some securities, such data may not be published by MSCI ESG Research by the end of the month preceding the Index Review. For such securities, MSCI will use ESG data published after the end of month, when available, for the rebalancing of the Index.

The pro forma index is in general announced to subscribers nine business days before the effective date.

4.1.1 BUFFER RULES

To reduce Index turnover and enhance Index stability, buffer rules are applied at 16.66% of the fixed number of securities in the MSCI Taiwan Select ESG Sustainability High Yield Top 30 Index.

For example, the MSCI Taiwan Select ESG Sustainability High Yield Top 30 Index targets 30 securities and the buffers are applied between rank 26 and 35. The securities in the Parent Index with a Dividend Score rank at or above 25 will be added to the MSCI Taiwan Select ESG Sustainability High Yield Top 30 Index on a priority basis. The existing constituents that have a Dividend Score rank between 26 and 35 are then successively added until the number of securities in the MSCI Taiwan Select ESG Sustainability High Yield Top 30 Index reaches 30. If the number of securities is below 30 after this step, the remaining securities in the Parent Index with the highest Dividend Score rank are added until the number of securities in the MSCI Taiwan Select ESG Sustainability High Yield Top 30 Index reaches 30.

4.2 ONGOING EVENT-RELATED CHANGES

Corporate event treatment for the Index depends on whether the effective date of the event falls within the Staggering Period or outside the Staggering Period. Staggering Period is the time period starting from the first day of the staggering until T (the effective date of the rebalancing of the Reference Index).

4.2.1 EVENTS EFFECTIVE OUTSIDE THE STAGGERING PERIOD

The general treatment of corporate events effective outside the staggering period in the Index aims to minimize turnover outside of Index Reviews. The methodology aims to appropriately represent an investor’s participation in an event based on relevant deal terms and pre-event weighting of the index constituents that are involved. Further, changes in index market capitalization that occur because of corporate event implementation will be offset by a corresponding change in the Variable Weighting Factor (VWF) of the constituent.

Additionally, if the frequency of Index Reviews in the Parent Index is greater than the frequency of Index Reviews in the Index, the changes made to the Parent Index during intermediate Index Reviews will be neutralized in the Index.

The following section briefly describes the treatment of common corporate events within the Index.

No new securities will be added (except where noted below) to the Index between Index Reviews. For cases where additions are noted below, securities will be added to the index only if added to the parent index. Parent Index deletions will be reflected simultaneously.

There are no deletions from the Index between Index Reviews on account of a security becoming ineligible because of any change in the ESG data.

EVENT TYPE

EVENT DETAILS

New additions to the Parent Index

A new security added to the Parent Index (such as IPO and other early inclusions) will be added to the index with an estimated full market capitalization adjustment factor on the date of security inclusion.

Spin-Offs

All securities created as a result of the spin-off of an existing Index constituent will be added to the Index at the time of event implementation. Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

Merger/Acquisition

For Mergers and Acquisitions, the acquirer’s post event weight will account for the proportionate amount of shares involved in deal

consideration, while cash proceeds will be invested across the Index.

If an existing Index constituent is acquired by a non-Index constituent, the existing constituent will be deleted from the Index and the acquiring non-constituent will not be added to the Index.

Changes in Security Characteristics

A security will continue to be an Index constituent if there are changes in characteristics (country, sector, size segment, etc.) Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

Further detail and illustration regarding specific treatment of corporate events relevant to this Index can be found in the MSCI Corporate Events Methodology book under the sections detailing the treatment of events in Capped Weighted and Non-Market Capitalization Weighted indexes.

The MSCI Corporate Events methodology book is available at: <https://www.msci.com/index-methodology>

4.2.2 EVENTS EFFECTIVE DURING THE STAGGERING PERIOD

Events effective in the Index during the staggering period incorporate the event implementation in the Reference Index. The impact of events on the Index depends on the type of event and calculation date of the Index as elaborated below.

4.2.2.1 CALCULATION ON T-9

a) Before effective date

The pro forma Index in general is announced nine business days before T (T-9). If there is an event already confirmed on T-9 with an effective date in the staggering period, the change in numbers of shares for the security due to the rebalancing will not be staggered for such security until the event effective date. In this case, number of shares for that security in the Index will be same as that in the Reference Index. In case of multiple events, the staggering will be postponed till the effective date of the earliest event.

b) On and after effective date

In case of Rights Issues and market neutral events (like Split, Consolidation, Stock Dividend etc.) which involve change in security number of shares but does not involve change in the full market cap adjustment factor in the Reference Index,

staggering (as explained in the Section 3.2) will start from the next day of the event effective date.

For all other events, staggering (as explained in the Section 3.2) will start from the effective date of the event.

4.2.2.2 CALCULATION AFTER T-9

a) Before Effective Date

In case of an event effective in the staggering period, the numbers of shares for the security involved in the event as announced on T-9 will hold until a day before the effective date. In case of multiple events, the effective date of the earliest event will be taken into account.

b) On and after the Effective Date

In case of Rights Issues and market neutral events (like Split, Consolidation, Stock Dividend etc.) which involve change in security number of shares but does not involve a change in inclusion factor in the Reference Index, staggering (as explained in the Section 3.2) will be applied from the next day of the event effective date, taking into account the new post event number of shares in the Reference Index.

For all other events, staggering (as explained in the Section 3.2) will be applied from the effective date of the event, incorporating the post event number of shares in the Reference Index.

4.2.3 TREATMENT OF SUSPENDED SECURITIES

A suspension treatment will be applied to any security suspended on any day starting from two days before the start of the Staggering Period through T-4. On the day of suspension (t), the pro-forma Full Market Cap Adjustment Factor in the Index announced for the security for the next day (t+1) will be held constant until T. However, in case, on T-4, if a new addition to the Parent Index is reverted due to suspension and the security is no longer a part of the Parent Index on T, the security will also be deleted from the Index effective on T.

In case a security resumes suspension on or before T-2, the Full Market Cap Adjustment Factor of the security in the Index on T will be set equal to the Full Market Cap Adjustment Factor of the security in the Reference Index on T.

Suspension treatment may result in different constituents and weights for the Index on T as compared to the Reference Index on the same day (T).

The following sections have been modified since April 2020

Section 4.2 Ongoing Event-Related Changes⁴

- Updated the treatment of Corporate Event – New Additions to the Parent Index

The following sections have been modified effective June 01, 2022:

Section 1: Introduction

Section 3: Constructing the Index

- Updated the steps to clarify the construction of the Reference Index
- Added Section 3.2 to illustrate the steps in staggering the index rebalancing results

Section 4: Maintaining the Index

- Updated Section 4.1 to distinguish the maintenance rules between the Reference Index and the Index
- Updated Section 4.2 to illustrate the corporate event treatment for the Index related to the staggered index rebalancing

The following sections have been modified effective June 17, 2022:

Section 4.1: Semi Annual Index Reviews

- Provided clarification on the announcement of the pro forma index to subscribers

⁴ These changes are effective from May 2021 SAIR

For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services. The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION. Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors. Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results. The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons. None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments. Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance. The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy. Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice. Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of www.msci.com. MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI's products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body. Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor's. "Global Industry Classification Standard (GICS)" is a service mark of MSCI and Standard & Poor's. MIFID2/MIFIR notice: MSCI ESG Research LLC does not distribute or act as an intermediary for financial instruments or structured deposits, nor does it deal on its own account, provide execution services for others or manage client accounts. No MSCI ESG Research product or service supports, promotes or is intended to support or promote any such activity. MSCI ESG Research is an independent provider of ESG data, reports and ratings based on published methodologies and available to clients on a subscription basis. We do not provide custom or one-off ratings or recommendations of securities or other financial instruments upon request.

Privacy notice: For information about how MSCI collects and uses personal data, please refer to our Privacy Notice at <https://www.msci.com/privacy-pledge>.
