1 Introduction

The MSCI USA Momentum SR Variant Index Methodology aims to reflect the performance of the MSCI USA Momentum Index, wherein all changes driven by the index rebalances of the MSCI USA Momentum Index are distributed over multiple days leading into the rebalancing effective date. This index distributes the turnover at every index rebalance over multiple days with an aim to facilitate easier implementation of the changes resulting from the rebalancing considerations.

The MSCI USA Momentum SR Variant Index is constructed by staggering the changes in securities' number of shares due to rebalancing, in equal proportion over three days leading into and including the effective date of the rebalancing of MSCI USA Momentum Index. The MSCI USA Momentum Index is constructed and rebalanced according to the MSCI Momentum Indexes Methodology¹. The MSCI Momentum Indexes aim to reflect the performance of the Momentum factor with a simple and transparent methodology while maintaining reasonably high investment capacity and liquidity of constituent companies, with moderate Index turnover.

¹ For more details, please refer to the MSCI Momentum Indexes Methodology at <http://www.msci.com/index-methodology>

2 Constructing the MSCI USA Momentum SR Variant Index

MSCI USA Momentum SR Variant Index is constructed in following steps:

- 1) Identifying the Reference Index
- 2) Rebalancing the Reference Index
- 3) Staggering the Reference Index rebalancing results

2.1 IDENTIFYING THE REFERENCE INDEX

The Reference Index for the MSCI USA Momentum SR Variant Index is the MSCI USA Momentum Index.

2.2 REBALANCING THE REFERENCE INDEX

The Reference Index - MSCI USA Momentum Index rebalances in accordance with the MSCI Momentum Indexes Methodology.

2.3 STAGGERING THE REFERENCE INDEX REBALANCING RESULTS

The rebalance changes of the MSCI USA Momentum Index are then staggered for implementation by spreading the change in Index Number of Shares (NOS) for each security over three days leading into the rebalancing effective date (T). The change is distributed equally among the three days as compared to the Reference Index, where all the changes are effective on the rebalancing date (T).

For each $t \in \{3 \text{ days of staggering}\}$, number of shares for each security included in the MSCI USA Momentum SR Variant Index (*Staggered Index NOS (t)*) are calculated as below:

$$\textit{Staggered Index NOS (t)} = \textit{Reference Index NOS (t)} + [\textit{Adjusted Reference Index NOS (T)} - \textit{Reference Index NOS (t)}] * (N/3)$$

Where:

t : *Effective date of the staggering*

T : *Rebalancing effective date of the Reference Index*

Reference Index NOS (t): It is the number of shares of a security in the Reference Index effective on t (as of close t – 1). It is calculated as a product of the end of day security number of shares on t – 1 and Full Market Cap Adjustment Factor² in the Reference Index on t

Adjusted Reference Index NOS (T) : Reference Index NOS (T) adjusted for change in number of shares due to events like Rights Issues, Split , Consolidation , Stock Dividend, effective between t and T

N = nth day of staggering

² Full Market Cap Adjustment Factor (FMCAF): A factor that is used in index constituent weighting calculation defined as (Inclusion Factor (i.e. FIF)) *(Constraint Factor)*(Variable Weighting Factor). For more details, please refer to section 2.7 of the MSCI corporate Events Methodology book at <http://www.msci.com/index-methodology>

3 Maintaining the MSCI USA Momentum SR Variant Index

3.1 INDEX REVIEWS

3.1.1 SEMI-ANNUAL INDEX REVIEWS

The MSCI USA Momentum SR Variant Index follows the rebalancing schedule of the reference Index – MSCI USA Momentum Index.

The MSCI USA Momentum Index is rebalanced on a semi-annual basis, usually as of the close of the last business day of May and November, coinciding with the May and November Semi-Annual Index Review (SAIR) of the MSCI Global Investable Market Indexes. The MSCI USA Momentum SR Variant is generally rebalanced over three days T-2, T-1 and T, where T is the effective date of the May and November Semi-Annual Index Review (SAIR) of the MSCI Global Investable Market Indexes.

The pro forma MSCI USA Momentum SR Variant Index in general is announced nine business days before T (T-9).

3.1.2 CONDITIONAL REBALANCING

MSCI USA Momentum SR Variant Index will also stagger the implementation of any conditional rebalancing of the MSCI USA Momentum Index.

In addition to the two Semi-Annual Index Reviews in May and November, MSCI USA Momentum Index undergoes ad-hoc rebalancing subject to meeting certain trigger criteria. The details of the ad-hoc rebalancing are provided in Appendix III of the MSCI Momentum Indexes Methodology. The trigger condition for ad-hoc rebalancing is checked every month as detailed in Appendix III of the MSCI Momentum Indexes Methodology.

The pro forma MSCI USA Momentum SR Variant Index for the conditional rebalancing is also announced nine business days before T (T-9), where T is the effective date of the conditional rebalancing of the Reference Index.

3.1.3 TREATMENT OF SCHEDULED EXCHANGE HOLIDAYS (FULL / PARTIAL)

In case, any of the three consecutive business days leading into and including T is preceded by a scheduled exchange holiday³ (either full or partial), the start date of the

³ An exchange holiday is defined as any day, on which any of the exchanges where securities in the MSCI USA Momentum SR Variant Index are listed, have a trading holiday (either full or partial).

staggering will be advanced to ensure that the implementation continues to be staggered over three days, none of which are preceded by a scheduled exchange holiday.

For example, generally the rebalancing of the Reference Index effective on T is staggered to be effective on T-2, T-1 and T in the MSCI USA Momentum SR Variant Index as below:

Proportion Staggered	Effective Date
1/3rd	T-2
1/3rd	T-1
1/3rd	T

Assuming T-3 is an exchange holiday and T-2 is a partial exchange holiday, the staggering start date will be shifted to T-4 and staggering will be effective as follows:

Proportion Staggered	Effective Date
1/3rd	T-4
1/3rd	T-3
0	T-2
0	T-1
1/3rd	T

3.2 ONGOING EVENT RELATED CHANGES

Corporate event treatment for the MSCI USA Momentum SR Variant Index depends on whether the effective date of the event falls within the Staggering Period or outside the Staggering Period. Staggering Period is the time period starting from the first day of the staggering until T (the effective date of the rebalancing of the Reference Index).

3.2.1 EVENTS EFFECTIVE OUTSIDE THE STAGGERING PERIOD

The general treatment of corporate events effective outside the staggering period in the MSCI USA Momentum SR Variant Index aims to minimize turnover outside of Index Reviews. The methodology aims to appropriately represent an investor’s participation in an event based on relevant deal terms and pre-event weighting of the index constituents that are involved. Further, changes in index market capitalization that occur as a result of corporate event implementation will be offset by a corresponding change in the Variable Weighting Factor (VWF) of the constituent.

Additionally, if the frequency of Index Reviews in the Parent Index (MSCI USA Index) is greater than the frequency of Index Reviews in the MSCI USA Momentum SR Variant

Index, the changes made to the Parent Index during intermediate Index Reviews will be neutralized in the MSCI USA Momentum SR Variant Index.

The following section briefly describes the treatment of common corporate events within the MSCI USA Momentum SR Variant Index.

No new securities will be added (except where noted below) to the Index outside the Staggering Period. Parent Index deletions outside the staggering period will be reflected simultaneously.

EVENT TYPE

EVENT DETAILS

New additions to the Parent Index

A new security added to the parent index (such as IPO and other early inclusions) will not be added to the index.

Spin-Offs

All securities created as a result of the spin-off of an existing Index constituent will be added to the Index at the time of event implementation. Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

Merger/Acquisition

For Mergers and Acquisitions, the acquirer's post event weight will account for the proportionate amount of shares involved in deal consideration, while cash proceeds will be invested across the Index.

If an existing Index constituent is acquired by a non-Index constituent, the existing constituent will be deleted from the Index and the acquiring non-constituent will not be added to the Index.

Changes in Security Characteristics

A security will continue to be an Index constituent if there are changes in characteristics (country, sector, size segment, etc.) Reevaluation for

continued inclusion in the Index will occur at the subsequent Index Review.

Further detail and illustration regarding specific treatment of corporate events relevant to this Index can be found in the MSCI Corporate Events Methodology book under the sections detailing the treatment of events in Capped Weighted and Non-Market Capitalization Weighted indexes.

The MSCI Corporate Events methodology book is available at: <https://www.msci.com/index-methodology>

3.2.2 EVENTS EFFECTIVE DURING THE STAGGERING PERIOD

Events effective in MSCI USA Momentum SR Variant Index during the staggering period incorporate the event implementation in the Reference Index. The impact of event on the MSCI USA Momentum SR Variant Index depends on the type of event and calculation date of the Index as elaborated below.

3.2.2.1 CALCULATION ON T-9

a) Before effective date

The pro forma MSCI USA Momentum SR Variant Index in general is announced nine business days before T (T-9). If there is an event already confirmed on T-9 with an effective date in the staggering period, the change in numbers of shares for the security due to the rebalancing will not be staggered for such security until the event effective date. In this case, number of shares for that security in the MSCI USA Momentum SR Variant Index will be same as that in MSCI USA Momentum Index. In case of multiple events, the staggering will be postponed till the effective date of the earliest event.

b) On and after effective date

In case of Rights Issues and market neutral events (like Split, Consolidation, Stock Dividend etc.) which involve change in security number of shares but does not involve change in the full market cap adjustment factor in the Reference Index, staggering (as explained in the Section 2.3) will start from the next day of the event effective date.

For all other events, staggering (as explained in the Section 2.3) will start from the effective date of the event.

3.2.2.2 CALCULATION AFTER T-9

a) Before Effective Date

In case of an event effective in the staggering period, the numbers of shares for the security involved in the event as announced on T-9 will hold until a day before the effective date. In case of multiple events, the effective date of the earliest event will be taken into account.

b) On and after the Effective Date

In case of Rights Issues and market neutral events (like Split, Consolidation, Stock Dividend etc.) which involve change in security number of shares but does not involve a change in inclusion factor in the Reference Index, staggering (as explained in the Section 2.3) will be applied from the next day of the event effective date, taking into account the new post event number of shares in the Reference Index.

For all other events, staggering (as explained in the Section 2.3) will be applied from the effective date of the event, incorporating the post event number of shares in the Reference Index.

3.2.3 TREATMENT OF SUSPENDED SECURITIES

A suspension treatment will be applied to any security suspended on any day starting from two days before the start of the Staggering Period through T-2. On the day of suspension (t), the pro-forma Full Market Cap Adjustment Factor in MSCI USA Momentum SR Variant Index announced for the security for the next day (t+1) will be held constant until T. However, in case, on T-2, if a new addition to the Parent Index (MSCI USA Index) is reverted due to suspension and the security is no longer a part of the Parent Index on T, the security will also be deleted from the MSCI USA Momentum SR Variant Index effective on T.

In case a security resumes suspension on or before T-2, the Full Market Cap Adjustment Factor of the security in the MSCI USA Momentum SR Variant Index on T will be set equal to the Full Market Cap Adjustment Factor of the security in the Reference Index on T.

Suspension treatment may result in different constituents and weights for MSCI USA Momentum SR Variant Index on T as compared to the MSCI USA Momentum Index on the same day (T).

THE FOLLOWING SECTIONS HAVE BEEN MODIFIED SINCE MAY 2020:

- Updated Section 1, Section 2.3 and Section 3.2 to remove the reference to fix days of staggering
- Added Section 3.1.3 to explain the treatment of Scheduled Exchange Holidays
- Updated Section 3.2.3 to remove reference to a fix Staggering Period start date

The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investable assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of www.msci.com.

MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI's products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.

Any use of or access to products, services or information of MSCI requires a license from MSCI.
