1 INTRODUCTION

The MSCI World ex Australia ex Fossil Fuel Select SRI and Low Carbon Capped Index aims to represent the performance of a set of companies that have high Environmental, Social and Governance (ESG) performance. The index is also designed to select companies with low carbon emissions relative to sales and low potential carbon emissions per dollar of market capitalization, while excluding companies that own fossil fuel reserves used for energy purposes. The index aims to achieve diversification by controlling for the maximum weight assigned to each security, thereby avoiding concentration risk.

2 CONSTRUCTING THE MSCI WORLD EX AUSTRALIA EX FOSSIL FUEL SELECT SRI AND LOW CARBON CAPPED INDEX

The MSCI World ex Australia ex Fossil Fuel Select SRI and Low Carbon Capped Index (the “Index”) is constructed from the MSCI World ex Australia Index (the “Parent Index”) in the following steps.

2.1 APPLYING THE ESG SCREENING

MSCI ESG Research evaluates companies for exclusion from the MSCI World ex Australia ex Fossil Fuel Select SRI and Low Carbon Capped Index, based on their involvement in certain businesses that meet the specified criteria as detailed in the Appendix 1.

2.2 APPLYING THE MSCI SRI INDEXES METHODOLOGY

The MSCI SRI Indexes methodology¹ is applied to the securities selected from the previous step, with the following customization:

- The selection rules per section 3 of the MSCI SRI Indexes methodology are applied on the securities directly, as opposed to creating regional indexes and aggregating those as detailed in section 3.3 of the MSCI SRI Indexes methodology.
- The index targets 15% of the free float adjusted market capitalization of each Global Industry Classification Standard (GICS®) sector of the underlying securities, instead of 25%. In line with section 4.1.1.2 of the MSCI SRI Indexes methodology, securities are selected from the ranked universe in the following order until 15% coverage by cumulative free-float adjusted market capitalization target is reached:
 - Securities in the top 10.5%
 - ‘AAA’ and ‘AA’ rated securities in the top 15%
 - Current Index constituents in the top 19.5%
 - Remaining securities in the eligible universe

2.3 APPLYING THE CARBON SCREEN

From the securities selected from the previous step, companies with low exposure to carbon risk, identified as companies with low carbon emission intensity and low potential emissions per dollar of market capitalization, are selected for inclusion in the index. The selection is

¹ Please refer to the MSCI SRI Indexes methodology at www.msci.com/index-methodology

done in accordance with sections 3.3.1 and 3.3.2 of the MSCI Global Low Carbon Leaders Indexes methodology².

2.4 APPLYING THE CAPPING

The maximum weight of any security in the Index is capped at 5% in accordance with the MSCI Capped Indexes methodology³. The excess weight of the capped securities is distributed among the remaining constituents in proportion of their free float market capitalization.

² Please refer to the MSCI Global Low Carbon Leaders Indexes methodology at www.msci.com/index-methodology

³ Please refer to the MSCI Capped Indexes methodology at www.msci.com/index-methodology

3 MAINTAINING THE MSCI WORLD EX AUSTRALIA EX FOSSIL FUEL SELECT SRI AND LOW CARBON CAPPED INDEX

3.1 ONGOING INDEX REVIEWS

The Index is reviewed on a quarterly basis, coinciding with the May and November Semi-Annual Index Reviews and the February and August Quarterly Index Reviews of the Parent Index. The pro forma index is typically announced nine business days before the effective date.

In general, MSCI uses MSCI ESG Research data (including MSCI ESG Ratings, MSCI ESG Controversies Scores and MSCI Business Involvement Screening Research) as of the end of the month preceding the Index Reviews for the rebalancing of the MSCI World ex Australia ex Fossil Fuel Select SRI and Low Carbon Capped Index. For some securities, such data may not be published by MSCI ESG Research by the end of the month preceding the Index Review. For such securities, MSCI will use ESG data published after the end of month, when available, for the rebalancing of the MSCI World ex Australia ex Fossil Fuel Select SRI and Low Carbon Capped Index.

3.1.1 MAY SEMI ANNUAL INDEX REVIEW

At the May Semi-Annual Index Review, the MSCI Global ex Fossil Fuels Indexes methodology is first applied on the Parent Index. The next step is the application of the MSCI SRI Indexes methodology, which includes an annual reconstitution in order to target 15% free float-adjusted cumulative market capitalization of each sector. As described in the MSCI SRI Indexes methodology, a buffer of 30% is used on the target coverage of 15% to minimize turnover⁴.

The carbon screening and the capping as described in sections 2.3 and 2.4 are applied on the updated universe selected by the SRI methodology.

3.1.2 NOVEMBER SEMI ANNUAL INDEX REVIEW

At the November Index Review, the MSCI Global ex Fossil Fuels Indexes methodology is first applied to the Parent Index, followed by the MSCI SRI Indexes methodology. Existing constituents of the Index are deleted from the Index if they do not meet the eligibility criteria described in section 3.2 of the MSCI SRI Indexes methodology. Additions, from the eligible securities as per section 3.2 of the MSCI SRI Indexes methodology, are made only to

⁴ For further details on application of buffer, please refer to section 4.1.1.2 of the MSCI SRI Indexes methodology, available at www.msci.com/index-methodology

those sectors where the current market capitalization coverage is less than 13.5%, until the 15% target is reached. Market price movements may cause small deviations in the sector coverage between Index Reviews. Therefore, in order to minimize turnover, a buffer of 10% is used on the target coverage of 15% to define under-representation.

The carbon screening and the capping as described in sections 2.3 and 2.4 are applied on the updated universe selected after applying the MSCI SRI Indexes methodology.

3.1.3 QUARTERLY INDEX REVIEWS

At the quarterly Index Reviews, coinciding with the February and August Quarterly Index Reviews, existing constituents are deleted from the Index if they do not meet the eligibility criteria described in section 3.2 of the MSCI SRI Indexes methodology or are screened out due to the MSCI Global ex Fossil Fuels Indexes methodology.

3.2 ONGOING EVENT RELATED CHANGES

The general treatment of corporate events in the MSCI World ex Australia ex Fossil Fuel Select SRI and Low Carbon Capped Index aims to minimize turnover outside of Index Reviews. The methodology aims to appropriately represent an investor's participation in an event based on relevant deal terms and pre-event weighting of the index constituents that are involved. Further, changes in index market capitalization that occur as a result of corporate event implementation will be offset by a corresponding change in the Variable Weighting Factor (VWF) of the constituent. There will be no additions to the Index in between Index Reviews.

Additionally, if the frequency of Index Reviews in the Parent Index is greater than the frequency of Index Reviews in the MSCI World ex Australia ex Fossil Fuel Select SRI and Low Carbon Capped Index, the changes made to the Parent Index during intermediate Index Reviews will be neutralized in the MSCI World ex Australia ex Fossil Fuel Select SRI and Low Carbon Capped Index.

The following section briefly describes the treatment of common corporate events within the MSCI World ex Australia ex Fossil Fuel Select SRI and Low Carbon Capped Index.

No new securities will be added (except where noted below) to the Index between Index Reviews. Parent Index deletions will be reflected simultaneously.

EVENT TYPE

EVENT DETAILS

New additions to the Parent Index

A new security added to the parent index (such as IPO and other early inclusions) will not be added to the index.

Spin-Offs

All securities created as a result of the spin-off of an existing Index constituent will be added to the Index at the time of event implementation. Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

Merger/Acquisition

For Mergers and Acquisitions, the acquirer’s post event weight will account for the proportionate amount of shares involved in deal consideration, while cash proceeds will be invested across the Index.

If an existing Index constituent is acquired by a non-Index constituent, the existing constituent will be deleted from the Index and the acquiring non-constituent will not be added to the Index.

Changes in Security Characteristics

A security will continue to be an Index constituent if there are changes in characteristics (country, sector, size segment, etc.) Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

Further detail and illustration regarding specific treatment of corporate events relevant to this Index can be found in the MSCI Corporate Events Methodology book under the sections detailing the treatment of events in Capped Weighted and Non-Market Capitalization Weighted indexes.

The MSCI Corporate Events methodology book is available at:
<https://www.msci.com/index-methodology>

APPENDIX 1 – ESG SCREENING CRITERIA

Companies, whose activities meet the following criteria, as determined by MSCI ESG Research, are excluded from the Index:

- All companies excluded by the application of the MSCI Global ex Fossil Fuels Indexes methodology
- All companies that derive a part of their revenue (either reported or estimated) from the mining of thermal coal (including lignite, bituminous, anthracite and steam coal) and its sale to external parties
- All companies with evidence of owning fossil fuel reserves regardless of their industries, including companies that own less than 50% of a reserves field
- All companies that derive a part of their revenue (either reported or estimated), from oil and gas related activities, including distribution / retail, equipment and services, extraction and production, petrochemicals, pipelines and transportation and refining but excluding biofuel production and sales and trading activities

The following sections have been modified since December 2017:

Section 2.1: Applying the ESG Screening

- Update to include new criteria for screening companies based on their involvement in certain businesses related to oil and gas.

Section 2.2: Applying the MSCI SRI Indexes Methodology

- Update to clarify the rules for selection of securities per the MSCI SRI Indexes Methodology.

Appendix 1: ESG Screening Criteria

- Added an appendix detailing the ESG Screening Criteria.

The Information may not be modified, reverse-engineered, reproduced or disseminated in whole or in part without prior written permission from MSCI.
- The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.
- The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.
- Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.
- Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.
- The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.
- None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.
- It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, “Index Linked Investments”). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.
- Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.
- The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.
- Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.
- Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.
- MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.’s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.’s company filings on the Investor Relations section of www.msci.com.
- MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI’s products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.
- Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD, FEA, InvestorForce, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor’s. “Global Industry Classification Standard (GICS)” is a service mark of MSCI and Standard & Poor’s.
