1 Introduction

The MSCI USA ESG Select Index (the 'Index') is designed to maximize exposure to positive environmental, social and governance (ESG) factors while exhibiting risk and return characteristics similar to those of the MSCI USA Index. The Index is constructed by selecting constituents of the MSCI USA Index through an optimization process that aims to maximize exposure to ESG factors for a target tracking error budget under certain constraints.

The Index is sector-diversified and targets companies with high ESG ratings in each sector. Companies involved in a defined set of controversial businesses are not eligible for inclusion into the Index¹.

The MSCI USA Extended ESG Select Index², is derived from this methodology with additional customizations, including enhanced optimization constraints, a minimum 20% improvement in ESG Score and the application of conditional issuer capping. This capping is also applied on an "as needed" basis at the end of each business day, based on defined concentration thresholds.

¹ The Index is governed by a set of methodology and policy documents ("Methodology Set"), including the present index methodology document. Please refer to Appendix VII for more details.

² For more details, please refer to Appendix IV

2 Constructing the Index

Constructing the Index involves the following steps:

- Defining the underlying MSCI Parent Index ('Parent Index');
- Defining the exclusion criteria;
- Defining the optimization constraints; and
- Determining the optimized index

2.1 Defining the Parent Index

The Parent Index for the Index is the MSCI USA Index.

2.2 Defining the Exclusion Criteria

The Index uses company ratings and research provided by MSCI Solutions LLC ("MSCI Solutions")³ to determine eligibility for index construction .

2.2.1 Controversial Business Involvement Criteria

The Index uses MSCI Business Involvement Screening Research and MSCI Climate Change Metrics to identify companies that are involved in the following business activities. Companies that meet the business involvement criteria are excluded from the Index. Please refer to Appendix III for details on these criteria.

- Controversial Weapons
- Civilian Firearms
- Nuclear Weapons
- Tobacco
- Alcohol
- Conventional Weapons
- Gambling
- Nuclear Power
- Fossil Fuel Extraction
- Thermal Coal Power

³ See Section 4 for further information regarding sustainability and climate data used in the Indexes that MSCI Limited and MSCI Deutschland GmbH source from MSCI Solutions LLC, a separate subsidiary of MSCI Inc. MSCI Solutions is solely responsible for the creation, determination and management of such data as a provider to MSCI Limited and MSCI Deutschland GmbH. MSCI Limited and MSCI Deutschland GmbH are the benchmark administrators for the MSCI indexes.

2.2.2 Controversies Score Eligibility

The Index uses MSCI Controversies Scores to identify companies that are involved in very serious controversies involving the environmental, social, or governance impact of their operations and/or products and services. Existing constituents of the Index are required to have an MSCI Controversies Score above 0 to remain in the index, while companies that are currently not constituents of the Index are required to have an MSCI Controversies Score above 2 to be eligible for inclusion.

2.3 Defining the Optimization Constraints

The Index is constructed using an optimization process that applies the following objective and constraints:

- The Index has a higher exposure (without a defined upper bound) to industry adjusted ESG scores relative to the Parent Index, subject to maintaining similar risk and return characteristics under an ex-ante tracking error constraint of 1.8%.
- The maximum weight of an Index constituent will be 5%⁴
- The minimum weight of an Index constituent will be 0.1%
- The maximum number of Index constituents will be 350 securities.
- The sector weight of the Index will not deviate by more than +/- 3% relative to the Parent Index
- The one-way turnover of the Index is constrained to a maximum of 10% at May and November Index Review and to a maximum of 5% at the February and August Index Review
- One way transaction cost is set to 0.5% which aims to achieve a balance between turnover and ESG Scores
- An AS/CF (Asset Selection/Common Factor) Risk Aversion Ratio of 10 is applied

Please refer to Appendix I for the description of handling infeasible optimizations.

2.4 Determining the Optimized Index

The Index is constructed using the most recent release of the Barra Open Optimizer⁵ in combination with the relevant Barra Equity Model. The optimization uses the MSCI USA Index after application of the exclusion criteria as described in section 2.2 above, as the universe of eligible securities and the specified optimization objective and constraints to determine the constituents of the Index.

2.5 Treatment of Unrated Companies

Companies not assessed by MSCI Solutions on data for any of the following MSCI Sustainability and Climate products are not eligible for inclusion in the Index.

⁴ This constraint is not applied for the MSCI USA Extended ESG Select Index. Please refer to Appendix IV for details on security capping for the MSCI USA Extended ESG Select Index

⁵ Please refer to Appendix V and VI for more details.

- MSCI ESG Ratings
- MSCI Controversies
- MSCI Climate Change Metrics
- MSCI Business Involvement Screening Research (BISR)

3 Maintaining the Index

3.1 Index Reviews

The Index is reviewed on a quarterly basis to coincide with the regular Index Reviews of the MSCI Global Investable Market Indexes. The changes are implemented at the end of February, May, August and November. The pro forma indexes are in general announced nine business days before the effective date.

In general, MSCI uses MSCI Solutions data (including MSCI ESG Ratings, MSCI Controversies Scores, MSCI Business Involvement Screening Research and MSCI Climate Change Metrics) as of the end of the month preceding the Index Reviews for the rebalancing of the Index. For some securities, such data may not be published by MSCI Solutions by the end of the month preceding the Index Review. For such securities, MSCI will use data published after the end of month, when available, for the rebalancing of MSCI USA ESG Select Index.

At each Index Review, the optimization process outlined in Section 2 is implemented. Companies can only be added to the Index at regular Index Reviews.

3.2 Ongoing Event-Related Maintenance

The general treatment of corporate events in the Index aims to minimize turnover outside of Index Reviews. The methodology aims to appropriately represent an investor’s participation in an event based on relevant deal terms and pre-event weighting of the index constituents that are involved. Further, changes in index market capitalization that occur as a result of corporate event implementation will be offset by a corresponding change in the Variable Weighting Factor (VWF) of the constituent.

Additionally, if the frequency of Index Reviews in the Parent Index is greater than the frequency of Index Reviews in the MSCI USA ESG Select Index, the changes made to the Parent Index during intermediate Index Reviews will be neutralized in the Index.

The following section briefly describes the treatment of common corporate events within the Index.

No new securities will be added (except where noted below) to the Index between Index Reviews. Parent Index deletions will be reflected simultaneously.

There are no deletions from the Index between Index Reviews on account of a security becoming ineligible because of decrease in MSCI Controversies Score and/or change in business involvement.

Event Type	Event Details
New additions to the Parent Index	A new security added to the parent index (such as IPO and other early inclusions) will not be added to the index.
Spin-Offs	All securities created as a result of the spin-off of an existing Index constituent will be added to

Merger/Acquisition

the Index at the time of event implementation. Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

For Mergers and Acquisitions, the acquirer’s post event weight will account for the proportionate amount of shares involved in deal consideration, while cash proceeds will be invested across the Index.

If an existing Index constituent is acquired by a non-Index constituent, the existing constituent will be deleted from the Index and the acquiring non-constituent will not be added to the Index.

Changes in Security Characteristics

A security will continue to be an Index constituent if there are changes in characteristics (country, sector, size segment, etc.) Reevaluation for continued inclusion in the Index will occur at the subsequent Index Review.

Further detail and illustration regarding specific treatment of corporate events relevant to this Index can be found in the MSCI Corporate Events Methodology book under the sections detailing the treatment of events in Capped Weighted and Non-Market Capitalization Weighted indexes.

The MSCI Corporate Events methodology book is available at:
<https://www.msci.com/index/methodology/latest/CE>.

4 MSCI Solutions

The Index is a product of MSCI Inc. that utilizes information such as company ratings and research produced and provided by MSCI Solutions LLC (“MSCI Solutions”), a subsidiary of MSCI Inc. In particular, the Index uses the following MSCI Sustainability and Climate products: MSCI ESG Ratings, MSCI Controversies, MSCI Business Involvement Screening Research and MSCI Climate Change Metrics. MSCI Indexes are administered by MSCI Limited MSCI Deutschland GmbH.

4.1 MSCI ESG Ratings

MSCI ESG Ratings aim to measure entities’ management of environmental, social and governance risks and opportunities. MSCI ESG Ratings use a weighted average key issue calculation that is normalized by industry to arrive at an industry-adjusted ESG score (0-10), which is then translated to a seven-point scale from ‘AAA’ to ‘CCC’, indicating how an entity manages relevant key issues relative to industry peers.

The MSCI ESG Ratings methodology can be found at:

<https://www.msci.com/legal/sustainability-and-climate-resources-and-disclosures>.

4.2 MSCI Controversies

MSCI Controversies provide assessments of controversies concerning the potential negative environmental, social, and/or governance impact of company operations, products and services. The evaluation framework used in MSCI Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI Controversies Score falls on a 0-10 scale, with “0” being the most severe controversy.

The MSCI Controversies methodology can be found at: <https://www.msci.com/legal/sustainability-and-climate-resources-and-disclosures>.

4.3 MSCI Business Involvement Screening Research

MSCI Business Involvement Screening Research (BISR) aims to enable institutional investors to manage environmental, social and governance (ESG) standards and restrictions reliably and efficiently.

For more details on MSCI Business Involvement Screening Research, please refer to

<https://www.msci.com/legal/sustainability-and-climate-resources-and-disclosures>.

4.4 MSCI Climate Change Metrics

MSCI Climate Change Metrics provide climate data & tools to support institutional investors seeking to integrate climate risk & opportunities into their investment strategy and processes. This includes investors seeking to achieve a range of objectives, including measuring and reporting on climate risk

exposure, implementing low carbon and fossil fuel-free strategies, alignment with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

The dataset spans across the four dimensions of a climate strategy: transition risks, green opportunities, physical risks and 1.5° alignment.

For more details on MSCI Climate Change Metrics, please refer to:

<https://www.msci.com/legal/sustainability-and-climate-resources-and-disclosures>

4.4.1 Fossil Fuels and Power Generation Metrics

MSCI Solutions identifies companies involved in fossil fuel-related assets and activities including fossil fuel reserves, resource extraction, power generation and generation capacity, revenue from such assets and activities and capital investments in such assets and activities. The metrics are based on disclosed activities, disclosed revenue and estimates of revenue that are extrapolated from company disclosures and eligible third-party sources (such as NGOs).

Appendix I: Handling Infeasible Optimizations

During the Quarterly Index Review, in the event that there is no optimal solution that satisfies all the optimization constraints defined in Section 2.3, the tracking error will be relaxed in steps of 0.2% until an optimal solution is found⁶.

⁶ Please refer to Appendix IV for details on the process followed to address infeasible optimizations in the MSCI USA Extended ESG Select Index.

Appendix II: Methodology Transition

May 2012 – May 2013

The MSCI USA ESG Select Index transitioned to the methodology described in the above document starting from the May 2012 Index Review. As part of the enhancements to the MSCI USA ESG Select Index Methodology, the annual turnover budget is reduced from 50% to 30% (10% at Semi-Annual Index Reviews and 5% at Quarterly Index Reviews). The lower annual turnover budget of 30% will be applied starting from the May 2012 Index Review.

June 2016

Effective at the May 2016 Index Review, the MSCI USA ESG Select Index reflected enhancements to the MSCI Controversies (formerly known as MSCI Impact Monitor). The details of the changes are as given below.

The changes to MSCI Controversies included adjusting the scoring model to align the scores with individual controversy case levels, including the introduction of an Orange flag, and the removal of specific controversial business involvement (CBI) criteria from the model to refocus the Controversies scores on event-driven controversies.

MSCI implemented the following changes to the MSCI USA ESG Select Index methodology effective June 1, 2016 to maintain consistency with the existing index construction objectives:

1. As per the old MSCI ESG Impact Monitor methodology, securities which had an Impact Monitor score of 0 and 1 had a Red controversy flag. Under the new methodology, only securities with an controversies score of 0 have a Red controversy flag. For indexes where constituents were ineligible to be included in the index if their Impact Monitor score was 0 or 1 (current Red controversy flag), the exclusion criteria was changed to Controversies score = 0 in order to continue to only exclude securities with Red controversy flag in the MSCI USA ESG Select Index.
2. Additional exclusion rules based on the controversial business involvement criteria related to alcohol, gambling, nuclear power, conventional weapons and controversial weapons that were incorporated in the old MSCI Impact Monitor scores were introduced as part of the methodology of the MSCI USA ESG Select Index. Since, the rule for exclusion of securities with tobacco involvement was already more stringent in MSCI USA ESG Select methodology, it was not included. The details of the exclusion rules are mentioned in Appendix III.

November 2017

In order to meet its objective, the MSCI USA ESG Select Index construction, since inception, made use of the Barra Global Equity Model (GEM2L) within the optimization setup. However, starting from the November 2017 Semi-Annual Index Review, the index construction used an optimization setup that used the Barra Global Equity Model for Long-Term Investors (GEMTL). The change of optimization setup was completed without any change in the prevailing index methodology.

December 2021

Effective from the November 2021 Index Review, the controversial business involvement criteria have been enhanced to reflect the framework designed by MSCI Solutions to define significant involvement in controversial activities. According to this framework, there are four restrictiveness levels: Most Restrictive, Highly Restrictive, Moderately Restrictive, Least Restrictive. Also, screens for Fossil Fuel Reserves, Fossil Fuel Extraction and Thermal Coal Power were added.

Appendix III: Controversial Business Involvement Criteria

Companies whose activities meet the following values and climate-based criteria, as evaluated by MSCI Solutions, are excluded from the Indexes:

Values-based Exclusion criteria

- **Controversial Weapons**
 - All companies with any tie to Controversial Weapons (cluster munitions, landmines, depleted uranium weapons, biological/chemical weapons, blinding lasers, non-detectable fragments and incendiary weapons), as defined by the methodology of the MSCI Global Ex-Controversial Weapons Indexes available at <https://www.msci.com/index/methodology/latest/XCW>
- **Civilian Firearms**
 - All companies with any tie to Civilian Firearms, covering the production and distribution (wholesale or retail) of firearms or small arms ammunitions intended for civilian use, as well as ownership of or by another company with involvement. It does not include companies that cater to the military, government, and law enforcement markets
- **Nuclear Weapons**
 - All companies that manufacture nuclear warheads and/or whole nuclear missiles
 - All companies that manufacture components that were developed or are significantly modified for exclusive use in nuclear weapons (warheads and missiles)
 - All companies that manufacture or assemble delivery platforms that were developed or significantly modified for the exclusive delivery of nuclear weapons
 - All companies that provide auxiliary services related to nuclear weapons
 - All companies that manufacture components that were not developed or not significantly modified for exclusive use in nuclear weapons (warheads and missiles) but can be used in nuclear weapons
 - All companies that manufacture or assemble delivery platforms that were not developed or not significantly modified for the exclusive delivery of nuclear weapons but have the capability to deliver nuclear weapons
 - All companies that manufacture components for nuclear-exclusive delivery platforms
- **Alcohol**
 - All companies deriving 10% or more revenue from the production of alcohol-related products
- **Conventional Weapons**
 - All companies deriving 10% or more revenue from the production of conventional weapons and components
- **Gambling**
 - All companies deriving 10% or more revenue from ownership of operation of gambling-related business activities

- **Nuclear Power**
 - All companies deriving 10% or more revenue from the ownership or operation of nuclear power plants
- **Tobacco**
 - All companies classified as “Producer” or “Licensor”
 - All companies classified as “Distributor”, “Retailer”, or “Supplier” that earn 15% or more of revenues from tobacco products
 - All companies classified as “Ownership by a Tobacco Company” or “Ownership of a Tobacco Company”

Climate Change- based Exclusions Criteria

- **Fossil Fuel Extraction**
 - All companies deriving 5% or more aggregate revenue (either reported or estimated) from thermal coal mining and unconventional oil and gas extraction.
 - Thermal Coal Mining: Revenue from the mining of thermal coal (including lignite, bituminous, anthracite and steam coal) and its sale to external parties. It does not cover revenue from metallurgical coal; coal mined for internal power generation (e.g. in the case of vertically integrated power producers); intra-company sales of mined thermal coal; and revenue from coal trading
 - Unconventional Oil & Gas Extraction: Revenue from oil sands, oil shale (kerogen-rich deposits), shale gas, shale oil, coal seam gas, and coal bed methane. It does not cover all types of conventional oil and gas production including Arctic onshore/offshore, deep water, shallow water and other onshore/offshore.
- **Thermal Coal Power**
 - All companies deriving 5% or more revenue (either reported or estimated) from thermal coal-based power generation.

Appendix IV: Methodology for MSCI USA Extended ESG Select Index

The MSCI USA Extended ESG Select Index follows the MSCI USA ESG Select Index methodology with the following differences:

Optimization Constraints

Effective June 2, 2025, the MSCI USA Extended ESG Select Index will follow the optimization constraints outlined in Section 2.3 with the following changes:

- Minimum ESG Score Improvement relative to the Parent Index will be at least 20% at each Index Review.
- Active weight security capping relative to the Parent Index⁷ will be +/- 5% at each Index Review

Handling infeasible optimizations

During Quarterly Index Reviews, in the event that there is no optimal solution that satisfies all the optimization constraints, the following relaxation steps will be applied:

- The turnover constraint will be relaxed in steps of 1% up to a maximum of 30%.
- The ex-ante tracking error constraint will be relaxed in steps of 0.2% up to a maximum of 5 times of the original ex-ante tracking error.

The turnover constraint and the ex-ante tracking error constraint are alternately relaxed until a feasible solution is achieved.

In the event that no optimal solution is found after the above relaxations are exhausted, the Index will not be rebalanced for that Index Review.

Applying Conditional Capping

At each Quarterly Index Review, issuers in the MSCI USA Extended ESG Select Index are assessed to determine whether conditional capping is required.

If the combined weight of issuers with individual weights above 4.5% exceeds 22.5% of the MSCI USA Extended ESG Select Index, then this combined weight is capped⁸ at 22.5%.

⁷ Changed the security capping from absolute 5% to +/-5% active weight relative to the Parent Index

⁸ The ESG Score improvement constraint is applied during regularly scheduled Index Reviews, and this ensures that the index achieves a guaranteed minimum ESG Score improvement of at least 20% relative to the MSCI USA Index.

Additionally, capping is also applied on an “as needed” basis (“Daily Capping”) after market close on each business day⁹ to ensure that the combined weight of issuers with individual weights above 5% does not exceed 25% of the Index.

If this threshold is breached at the end of a business day, rebalancing will be triggered, and pro-forma rebalancing results will be announced at the end of that business day. The rebalance will be effective at the market open on the third business day following the breach, providing two business days of advance notice.

The capping methodology follows a systematic approach using an iterative process which minimizes index turnover but also the tracking error and extreme deviation from the Parent Index. The process consists of analyzing all possible capping combinations, following the approach used in other MSCI capped methodologies, such as the MSCI 10/40 Indexes methodology¹⁰, with different constraints, and then determines the optimal weight that complies with the required 5/25 investment restrictions.

Monthly Review of Controversies

Effective November 1, 2023, the MSCI USA Extended ESG Select Index constituents are reviewed on a monthly basis for involvement in controversies¹¹. Existing constituents will be deleted if they are assessed as having involvement in controversies that are classified as Red Flags (MSCI Controversies Score of 0). A Red Flag indicates an ongoing, Very Severe controversy implicating a company directly through its actions, products, or operations.

MSCI uses MSCI Controversies data as of the end of the month preceding the review (e.g., end of June data for the July monthly review). For some securities, such data may not be published by MSCI Solutions by the end of the month preceding the review. For such securities, MSCI will use data published after the end of month, when available, for the monthly review of the Index.

The pro forma indexes are generally announced nine business days before the effective date and Daily Capping is applied after the monthly review once securities with a Controversy Score of 0 are deleted.

Controversial Business Involvement Criteria

Prior to the November 2021 Semi-Annual Index Review, the MSCI USA Extended ESG Select Index applied the ineligibility criteria for civilian firearms, as described below:

⁹ Daily Capping checks are performed on every business day, including during the 9-day pro forma period of regular Index Reviews. If a breach occurs during this period, a Daily Capping rebalance will be triggered in addition to the regular quarterly Index Review. Each of these may result in changes to constituent weights, as these changes will become effective on their respective implementation dates. The optimization constraints will not be applied during daily rebalancing.

¹⁰ For technical details of the capping approach, please refer to Appendix I of the MSCI 10/40 Indexes Methodology available on www.msci.com/index-methodology

¹¹ The monthly review of controversies was implemented effective November 1, 2023, and the proforma indexes were announced nine business days before the effective date. The monthly review of controversies is applied prior to conditional capping.

- **Civilian Firearms**

- All companies classified as a “Producer”
- All companies classified as a “Retailer” that earn 5% or more in revenue or more than \$20 million in revenue from civilian firearms-related products.

Turnover

In addition, during the February 2018 Quarterly Index Review, the turnover of the MSCI USA Extended ESG Select Index was calculated with respect to the constituents of the MSCI USA ESG Select Index.

Appendix V: Barra Equity Model Used in Optimization

The Indexes currently use an optimization setup using the MSCI Barra Global Equity Model for Long-Term Investors (GEMTLT).

Appendix VI: New release of Barra® Equity Model or Barra® Optimizer

A major new release of the relevant Barra Equity Model or Barra Optimizer may replace the former version within a suitable timeframe.

Appendix VII: Methodology Set

The Index is governed by a set of methodology and policy documents (“Methodology Set”), including the present index methodology document as mentioned below:

- Description of methodology set – <https://www.msci.com/index/methodology/latest/ReadMe>
- MSCI Corporate Events Methodology – <https://www.msci.com/index/methodology/latest/CE>
- MSCI Fundamental Data Methodology – <https://www.msci.com/index/methodology/latest/FundData>
- MSCI Index Calculation Methodology – <https://www.msci.com/index/methodology/latest/IndexCalc>
- MSCI Index Glossary of Terms – <https://www.msci.com/index/methodology/latest/IndexGlossary>
- MSCI Index Policies – <https://www.msci.com/index/methodology/latest/IndexPolicy>
- MSCI Global Industry Classification Standard (GICS) Methodology – <https://www.msci.com/index/methodology/latest/GICS>
- MSCI Global Investable Market Indexes Methodology – <https://www.msci.com/index/methodology/latest/GIMI>
- MSCI Global ex Controversial Weapons Indexes Methodology – <https://www.msci.com/index/methodology/latest/XCW>
- ESG Factors In Methodology*

The Methodology Set for the Index can also be accessed from MSCI’s webpage <https://www.msci.com/index-methodology> in the section ‘Search Methodology by Index Name or Index Code’.

* ‘ESG Factors in Methodology’ contains the list of environmental, social, and governance factors considered, and how they are applied in the methodology (e.g., selection, weighting or exclusion). It can be accessed in the Methodology Set as described above.

Appendix VI: Changes to this Document

The following sections have been modified as of May 2016:

Section 3.2.1: Controversial Business Involvement Criteria

- Added section

Section 3.2.3: ESG Controversies Score Eligibility

- Updated the MSCI ESG Controversies Score eligibility requirements

Appendix 3: Methodology Transition

- Added details pertaining to the methodology changes effective as of May 2016

Appendix 4: Controversial Business Screening Criteria

The following sections have been modified as of June 2016:

Section 3.2.1: Controversial Business Involvement criteria

- Added Civilian Firearms to the list of controversial business involvement criteria

Appendix 4: Controversial Business Screening Criteria

- Addition of the controversial business screening criteria pertaining to Civilian Firearms

The following sections have been modified as of May 2017:

Section 4.1: Quarterly Index Reviews

- Clarification on the use of ESG data for securities whose data were published later than at the end of the month preceding Index Review.

The following sections have been modified as of June 2017:

- The details on the Corporate Events treatment are now included in Section 4.2.

The following sections have been modified as of November 2017:

- Updated Appendix 3 to add the information on transition of MSCI USA ESG Select Index to GEMTL

The following sections have been modified as of May 2018:

Appendix 4: Methodology for MSCI USA Extended ESG Select Index

- New Appendix

The following sections have been modified as of November 2021:

Section 2.4: MSCI Climate Change Metrics

- New section

Section 3.2.1: Controversial Business Involvement Criteria

- Added screens for 'Fossil Fuel Extraction' and 'Thermal Coal Power'

Appendix 2: Methodology Transition

- Added details which highlight the changes to the MSCI USA ESG Select Index effective December 2021

Appendix 3: Controversial Business Involvement Criteria

- Updated the controversial business involvement criteria for each activity according to the framework designed by ESG Research
- Added screens for 'Fossil Fuel Extraction' and 'Thermal Coal Power'

Appendix 4: Methodology for MSCI USA Extended ESG Select Index

- Updated to reflect alignment with MSCI USA ESG Select Index Methodology effective December 2021

The following sections have been modified as of June 2023:

Section 3: Maintaining the MSCI USA ESG Select Index

- Methodology book was updated to reflect the transition of the MSCI Global Investable Market Indexes (GIMI) to Quarterly Comprehensive Index Reviews.
- All references to "Semi-Annual Index Reviews" and "Quarterly Index Reviews" of the MSCI GIMI were replaced with "Index Reviews".

Section 4: MSCI ESG Research

- Moved that section after the Section 3 (Maintaining the MSCI USA ESG Select Index)
- Updated descriptions of MSCI ESG Research products

The following sections have been modified as of November 2023:

Appendix 4: Methodology for MSCI Extended USA ESG Select Index

- The monthly review of ESG controversies is applied within the MSCI Extended USA ESG Select Index effective November 1, 2023 and is not applicable historically prior to that date.

The following sections have been modified as of January 2024:

Section 2.5: Treatment of Unrated Companies

- New section detailing the treatment of companies with ratings and research not available from MSCI ESG Research

Appendix V: Methodology Set

- Added details on the Methodology Set for the Indexes.

The following sections have been modified as of August 2024

Section 2.5: Treatment of Unrated Companies

- Added the treatment of companies when business involvement screening research or climate change metrics research not available from MSCI ESG Research.

The following section has been modified as of December 2024

Section 4.4: MSCI Climate Change Metrics

- Added a sub-section under Climate Change Metrics to provide additional details on Fossil Fuels related activities.

The following section has been modified as of May 2025

Section 2.3: Defining the Optimization Constraints

- Replaced “ex-ante” before “predicted” tracking error
- Added a footnote that the constraint “the maximum weight of an Index constituent will be 5%” is not applied for the MSCI USA Extended ESG Select Index and to refer to Appendix IV for details on security capping for the MSCI USA Extended ESG Select Index

Appendix IV: Methodology for MSC USA Extended ESG Select Index

- Added the +/-5% active weight security capping relative to the parent index. Prior to this change, an absolute 5% security capping was applied.
- Added a new constraint for the minimum ESG score improvement relative to the Parent Index
- Added wording relating to the handling of infeasible optimizations

The following section has been modified as of August 2025

Appendix IV: Methodology for MSC USA Extended ESG Select Index

- Added a description of conditional 5/25 capping methodology, including its application during Quarterly Index Reviews and on each business day outside the review period.

Appendix V: Barra Equity Model Used in the Optimizer

- New Appendix has been added providing details on the equity model used in the Optimizer

Appendix VI: New Release of Barra Equity Model or Barra Optimizer

- New Appendix has been added outlining the treatment of new releases of the Barra Equity Model or Barra Optimizer

The following section has been modified as of May 2026

Appendix IV: Methodology for MSCI USA Extended ESG Select Index

- Updated the description of the optimization constraints to clarify that the minimum ESG Score improvement of 20% and the +/- 5% active weight security capping apply at each Index Review.
- Updated the description and footnote for the conditional 5/25 capping methodology, including its application during Quarterly Index Reviews and on each business day outside the review period.
- The MSCI USA Extended ESG Select Index will apply a daily 5/25 capping, implemented through an iterative process in accordance with the MSCI 10/40 Capped Methodology.

Notice and Disclaimer

The data, data feeds, databases, reports, text, graphs, charts, images, videos, recordings, models, metrics, analytics, indexes, ratings, scores, cases, estimates, assessments, software, websites, products, services and other information and materials contained herein or delivered in connection with this notice (collectively, the "Information") are copyrighted, trade secrets (when not publicly available), trademarks and proprietary property of MSCI Inc. or its subsidiaries (collectively, "MSCI"), MSCI's licensors, direct or indirect suppliers and authorized sources, and/or any third party contributing to the Information (collectively, with MSCI, the "Information Providers"). All rights in the Information are reserved by MSCI and its Information Providers and user(s) shall not, nor assist others to, challenge or assert any rights in the Information.

Unless you contact MSCI and receive its prior written permission, you must NOT use the Information, directly or indirectly, in whole or in part (i) for commercial purposes, (ii) in a manner that competes with MSCI or impacts its ability to commercialize the Information or its services, (iii) to provide a service to a third party, (iv) to permit a third party to directly or indirectly access, use or resell the Information, (v) to redistribute or resell the Information in any form, (vi) to include the Information in any materials for public dissemination such as fund factsheets, market presentations, prospectuses, and investor information documents (e.g. KIIDs or KIDs), (vii) to create or as a component of any financial products, whether listed or traded over the counter or on a private placement basis or otherwise, (viii) to create any indexes, ratings or other data products, including in derivative works combined with other indexes or data or as a policy, product or performance benchmarks for active, passive or other financial products, (ix) to populate a database, or (x) to train, use as an input to, or otherwise in connection with any artificial intelligence, machine learning, large language models or similar technologies except as licensed and expressly authorized under MSCI's AI Contracting Supplement at <https://www.msci.com/legal/supplemental-terms-for-client-use-of-artificial-intelligence>.

The intellectual property rights of MSCI and its Information Providers may not be misappropriated or used in a competitive manner through the use of third-party data or financial products linked to the Information, including by using an MSCI index-linked future or option in a competing third-party index to provide an exposure to the underlying MSCI index or by using an MSCI index-linked ETF to create a financial product that provides an exposure to the underlying MSCI index without obtaining a license from MSCI.

The user or recipient of the Information assumes the entire risk of any use it may make, permit or cause to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, SUITABILITY, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION. Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall MSCI or any other Information Provider have any liability arising out of or relating to any of the Information, including for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages, even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not be applicable law be excluded or limited.

The Information, including index construction, ratings, historical data, or analysis, is not a prediction or guarantee of future performance, and must not be relied upon as such. Past performance is not indicative of future results. The Information may contain back tested data. Back-tested performance based on back-tested data is not actual performance but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

The Information may include "Signals," defined as quantitative attributes or the product of methods or formulas that describe or are derived from calculations using historical data. Signals are inherently backward-looking because of their use of historical data, and they are inherently inaccurate, not intended to predict the future and must not be relied upon as such. The relevance, correlations and accuracy of Signals frequently change materially over time.

The Information may include data relating to indicative prices, evaluated pricing or other information based on estimates or evaluations (collectively, "Evaluations") that are not current and do not reflect real-time traded prices. No evaluation method, including those used by the Information Providers, may consistently generate evaluations or estimates that correspond to actual "traded" prices of any relevant securities or other assets. Evaluations are subject to change at any time without notice and without any duty to update or inform you, may not reflect prices at which actual transactions or collateral calls may occur or have occurred. The market price of securities, financial instruments, and other assets can be determined only if and when executed in the market. There may be no, or may not have been any, secondary trading market for the relevant securities, financial instruments or other assets. Private capital, equity, credit and other assets and their prices may be assessed infrequently, may not be priced on a secondary market, and shall not be relied upon as an explicit or implicit valuation of a particular instrument. Any reliance on fair value estimates and non-market inputs introduces potential biases and subjectivity. Internal Rate of Return metrics are not fully representative without full disclosure of fund cash flows, assumptions, and time horizons.

The Information does not constitute, and must not be relied upon as, investment advice, credit ratings, or proxy advisory or voting services. None of the Information Providers, their products or services, are fiduciaries or make any recommendation, endorsement, or approval of any investment decision or asset allocation. Likewise, the Information does not represent an offer to sell, a solicitation to buy, or an endorsement of any security, financial product, instrument, investment vehicle, or trading strategy, whether or not linked to or in any way based on any MSCI index, rating, subcomponent, or other Information (collectively, "Linked Investments").

The Information should not be relied on and is not a substitute for the skill, judgment and experience of any user when making investment and other business decisions. MSCI is not responsible for any user's compliance with applicable laws and regulations. All Information is impersonal, not tailored to the needs of any person, entity or group of persons, not objectively verifiable in every respect, and may not be based on information that is important to any user.

It is not possible to invest in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI makes no assurance that any Linked Investments will accurately track index performance or provide positive investment returns. Index returns do not represent results of actual trading of investable assets/securities. MSCI maintains and calculates indexes but does not manage assets. The calculation of indexes and index returns may deviate from the stated methodology. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase securities underlying the index or Linked Investments. The imposition of these fees and charges would cause the performance of a Linked Investment to be different than the MSCI index performance.

Information provided by MSCI Solutions LLC and certain related entities ("MSCI Solutions"), including materials utilized in MSCI sustainability and climate products, have not been submitted to, nor received approval from any regulatory body. MSCI sustainability and climate offerings, research and data are produced by, and ratings are solely the opinion of MSCI Solutions. Other MSCI products and services may utilize information from MSCI Solutions, Barra LLC or other affiliates. More information can be found in the relevant methodologies on www.msci.com. MSCI Indexes are administered by MSCI Limited (UK) and MSCI Deutschland GmbH. No regulated use of any MSCI private real assets indexes in any jurisdiction is permitted without MSCI's express written authorization. The process for applying for MSCI's express written authorization can be found at: <https://www.msci.com/index-regulation>.

MSCI receives compensation in connection with licensing its indexes and other Information to third parties. MSCI Inc.'s revenue includes fees based on assets in Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of msci.com. Issuers mentioned in MSCI Solutions materials or their affiliates may purchase research or other products or services from one or more MSCI affiliates, manage financial products such as mutual funds or ETFs rated by MSCI Solutions or its affiliates or are based on MSCI Indexes. Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Constituents in MSCI Inc. equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. MSCI Solutions has taken steps to mitigate potential conflicts of interest and safeguard the integrity and independence of its research and ratings.

MIFID2/MIFIR notice: MSCI Solutions does not distribute or act as an intermediary for financial instruments or structured deposits, nor does it deal on its own account, provide execution services for others or manage client accounts. No MSCI product or service supports, promotes or is intended to support or promote any such activity. MSCI Solutions is an independent provider of sustainability and climate data. All use of indicative prices for carbon credits must comply with any rules specified by MSCI. All transactions in carbon credits must be traded "over-the-counter" (i.e. not on a regulated market, trading venue or platform that performs a similar function to a trading venue) and result in physical delivery of the carbon credits.

You may not remove, alter, or obscure any attribution to MSCI or notices or disclaimers that apply to the Information. MSCI, Barra, RiskMetrics, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and S&P Dow Jones Indices. "Global Industry Classification Standard (GICS)" is a service mark of MSCI and S&P Dow Jones Indices. Terms such as including, includes, for example, such as and similar terms used herein are without limitation.

MSCI and its Information Providers may use automated technologies and artificial intelligence to help generate content and output incorporated in the Information.

Privacy notice: For information about how MSCI collects and uses personal data, please refer to our Privacy Notice at: <https://www.msci.com/privacy-pledge>. For copyright infringement claims contact us at dmca@msci.com. This notice is governed by the laws of the State of New York without regard to conflict of laws principles.
