1 Introduction

The MSCI MarketAxess Tradable Corporate Bond Indexes¹ ('the Tradable Bond Indexes') are designed to measure the performance of a selection of relatively liquid fixed income securities from the universe of corporate bonds defined by the underlying MSCI Corporate Bond Indexes ('the Parent Indexes').

The methodology uses the MarketAxess' Relative Liquidity Scores ("RLS") in conjunction with Size and Maturity criteria to identify and select liquid fixed income securities. The index methodology further incorporates appropriate buffers in index construction and rebalancing to limit monthly turnover. In addition, index methodology incorporates sector and credit rating allocation constraints, to capture credit market beta with limited basis risk vis-à-vis the Parent Indexes.

¹ The Indexes are governed by a set of methodology and policy documents ("Methodology Set"), including the present index methodology document. The Methodology Set for the Indexes can be accessed from MSCI's webpage <https://www.msci.com/index-methodology> in the section 'Search Methodology by Index Name or Index Code'. The Methodology Set includes a document 'ESG Factors in Methodology' that contains the list of environmental, social, and governance factors considered, and how they are applied in the methodology (e.g., selection, weighting or exclusion).

2 Index Construction Rules

2.1 Underlying Universe

The Selection Universe for the MSCI MarketAxess Tradable Corporate Bond Indexes is defined by the constituents of the underlying MSCI Corporate Bond Indexes.

Tradable Bond Index	Selection Universe
MSCI MarketAxess USD IG Tradable Corporate Bond Index (MSCI Index Code: 754697)	MSCI USD IG Corporate Bond Index (MSCI Index Code: 754867)
MSCI MarketAxess EUR IG Tradable Corporate Bond Index (MSCI Index Code: 754696)	MSCI EUR IG Corporate Bond Index (MSCI Index Code: 733885)
MSCI MarketAxess USD HY Tradable Corporate Bond Index (MSCI Index Code: 751812)	MSCI USD HY Corporate Bond Index (MSCI Index Code: 730306)
MSCI MarketAxess EUR HY Tradable Corporate Bond Index (MSCI Index Code: 754695)	MSCI EUR HY Corporate Bond Index (MSCI Index Code: 733886)

2.2 Eligibility Criteria

2.2.1 Liquidity Score Eligibility

To be eligible for inclusion in the Tradable Bond Index, a security must have a current MarketAxess Relative Liquidity Score (see section 4 – “MarketAxess Data” for more information) of greater than or equal to 3. In addition to having a minimum current RLS, a security must also have a minimum Monthly Average Relative Liquidity Score (“MRLS”).

The MRLS of a security is calculated as the simple average of MarketAxess RLS over a rolling 21-day window². MRLS is calculated only if the security has at least 11 valid observations³ in the defined window. Each Tradable Bond Index constituent must have a MRLS greater than or equal to a threshold value defined for each of the Tradable Bond Indexes as tabulated below. The minimum MRLS threshold is defined differently for new additions vis-à-vis already existing Tradable Bond Index constituents, where new additions have a relatively higher MRLS threshold.

² 21-day window is defined by using weekdays.

³ The observation is considered valid if the bond is scored by MarketAxess and belongs to the corresponding MarketAxess liquidity group, relative to which the RLS is computed. For example, for MSCI MarketAxess USD IG Tradable Corporate Bond Index the bond should belong to the MarketAxess USHG liquidity group.

Tradable Bond Index	Minimum MRLS for New Additions	Minimum MRLS for Existing Constituents
MSCI MarketAxess USD IG Tradable Corporate Bond Index	6.0	5.0
MSCI MarketAxess EUR IG Tradable Corporate Bond Index	6.0	5.0
MSCI MarketAxess USD HY Tradable Corporate Bond Index	5.5	4.5
MSCI MarketAxess EUR HY Tradable Corporate Bond Index	5.5	4.5

2.2.2 Size Eligibility

At a security level, size is defined by its notional amount outstanding, whereas at an issuer ticker level, it is defined by issuer ticker's total amount outstanding⁴.

At rebalancing, each security included in the MSCI MarketAxess Tradable Corporate Bond Indexes should have security size and issuer size greater than or equal to thresholds as tabulated below.

Tradable Bond Index	Minimum Security Size	Minimum Issuer Size
MSCI MarketAxess USD IG Tradable Corporate Bond Index	USD 500 million	USD 10 billion
MSCI MarketAxess EUR IG Tradable Corporate Bond Index	EUR 500 million	EUR 10 billion
MSCI MarketAxess USD HY Tradable Corporate Bond Index	USD 300 million	USD 2 billion
MSCI MarketAxess EUR HY Tradable Corporate Bond Index	EUR 300 million	EUR 2 billion

2.2.3 Maturity Eligibility

Each Tradable Bond Index constituent at issuance must have had a time to maturity greater than or equal to 3 years.

Additionally, each Index constituent within the two Investment Grade (IG) Tradable Bond Indexes – USD IG and EUR IG – must have a remaining time to maturity less than or equal to 30 years. There is no time to maturity capping for the two High Yield (HY) Tradable Bond Indexes – USD HY and EUR HY.

⁴ Computed as sum of issuer amount outstanding of all the unique issuer ids mapped to an issuer ticker. Please refer to MSCI Fixed Income Data Methodology document (<https://www.msci.com/index-methodology>) for details on the calculation of Issuer amount outstanding.

2.3 Index Construction

2.3.1 Updating the Eligible Universe

The Eligible Universe for index construction is derived from the Selection Universe and is updated by applying the eligibility screens described in Section 2.2

2.3.2 Selection of Eligible Bonds

The two largest bonds by size are selected for each issuer ticker in the updated Eligible Universe. If there is only one bond for the issuer ticker in the universe, then only that one is included. Please refer to Appendix 1 for details on the bond selection algorithm.

2.4 Weighting Scheme

The Tradable Bond Index constituents are weighted in proportion of their market values. Additionally, constituent weights are sequentially constrained. First the weights are capped at the issuer ticker level, followed by application of constraints on the sector weights and finally constraints are applied on the credit rating weights.

2.4.1 Issuer Capping

Constituent weights are capped at 3% at the issuer ticker level to mitigate concentration risk. The excess weight after capping is redistributed across the remaining Index issuers in proportion of their market value. Within each issuer, the bonds are still weighted in proportion of their market values.

2.4.2 Sector Constraints

Within the Tradable Bond Index, Global Industry Classification Standard (GICS®)⁵ sector weights are capped/floored within ± 5 percentage points relative to the corresponding Parent Index sector weights, to reduce sector bias. For example, if we assume a sector weight in the Parent Index to be 12%, then that sector weight in the Tradable Bond Index should lie between 7% (12% - 5%) to 17% (12% + 5%). The excess (or lack of) weight after capping is redistributed across (or taken from) the remaining Tradable Bond Index sectors in proportion of their market value

2.4.3 Credit Rating Constraints

Similar to the sector constraints, the Tradable Bond Index credit rating weights are also capped/floored within ± 5 percentage points relative to the corresponding Parent Index credit rating

⁵ GICS, the global industry classification standard jointly developed by MSCI Inc. and S&P Dow Jones Indices.

weights, to mitigate any credit rating bias. To achieve the credit rating constraints, we first convert the MSCI Average Rating⁶ to a broad credit rating bucket and then apply the constraints on those credit rating buckets. Please refer to Appendix 2 for details. The excess (or lack of) weight after application of the constraints is redistributed across (or taken from) the remaining Tradable Bond Index credit rating buckets in proportion of their market value.

Note that the constraints on the issuer ticker weight, sector weight and credit rating weight are calculated for the pro forma Index as of the effective date, based on the closing prices as of the Index review announcement date.

Please note that, since the constraints are applied sequentially, the issuer capping and sector weight constraints could be partially reversed (e.g. in case of narrower indexes) and only the credit weight constraints may apply fully at rebalance.

Also, in cases where the pro-forma weight at issuer ticker level, sector level or credit rating level, breaches the set constraints, because of market price movements or corporate events between the announcement date and the effective date, the constraints are not applied again. Similarly, even if weight breaches the constraints because of market price movements or corporate events between two monthly reviews, the constraints are not re-applied.

⁶ MSCI sources credit ratings from Standard and Poor's Rating Services (S&P) or Moody's Investor Service (Moody's). The MSCI Average Rating is the average rating of S&P and Moody's, rounded up to the nearest integer, if a half value occurs. The MSCI average rating is based on the mappings and scores tabulated in Appendix Section 12.1.1 of the MSCI Fixed Income Data Methodology.

3 Index Maintenance

3.1 Monthly Index Review

The Index is reviewed monthly to coincide with the Monthly Index Review of the MSCI Corporate Bond Indexes.

The rebalanced Index composition is determined by the most recent data available three days prior to the Rebalancing Date, termed as the Cut-Off Date. If a security in the universe satisfies any inclusion or exclusion criteria after the Cut-Off Date, it will typically become effective at the next monthly rebalancing, provided conditions remain constant. In extraordinary circumstances, such as cases of input data correction, MSCI has the discretion to shorten the Cut-Off Date for Index rebalancing from T-3 to T-2, T-1, or T. In such scenarios, MSCI will inform Index clients of these changes through an announcement.

MSCI will disclose proforma index rebalancing results starting the second business day of each month. MSCI will freeze the proforma index rebalancing results as of the Cut-Off Date.

MSCI uses the latest available MarketAxess Relative Liquidity Score as of the Cut-Off Date for the rebalancing of the MSCI MarketAxess Tradable Corporate Bond Indexes.

At each Monthly Index Review, the Eligible Universe is updated, and the composition of the Index is reassessed based on methodology described in Section 2. In addition to this, for each Tradable Bond Index rebalancing a buffer rule is applied to control for rebalancing turnover.

Securities that are deleted from the Tradable Bond Index are "locked out" and hence are not eligible to be re-added to the Index for a period of next 12 months. For example, if a bond is dropped from the Index as of rebalancing month T, it cannot re-enter the Index up until T+11 months and will be considered for inclusion for the T+12-month rebalancing. Securities that enter the Tradable Bond Index and continue to qualify on current RLS, size and maturity eligibility criteria defined in Section 2.2.1, Section 2.2.2, and 2.2.3, respectively, are "locked in" i.e., remain in the Index for at least a period of 12 months.

Any cash that accrues within the index each month is re-invested on a pro-rata basis across the index constituents on the effective date of rebalancing. The opening index portfolio on the Rebalancing Date starts with zero accrued cash balance.

For further information on index total return calculation and corporate events handling please refer to the MSCI Fixed Income Index Calculation Methodology⁷. For the holiday calendar used in the index, please refer to the MSCI Fixed Income Data Methodology⁸.

3.2 Pricing

Historically, the Tradable Bond Index uses bid and offer prices from multiple data vendors with primary pricing source being Refinitiv. From January 2nd, 2023, onwards primary pricing source is transitioned from Refinitiv to MarketAxess CP+™.

⁷ Please refer to MSCI Fixed Income Index calculation methodology for further details on calculation of market value. Available at <https://www.msci.com/index-methodology>

⁸ Please refer to MSCI Fixed Income Index Data methodology for further details on the holiday calendar. Available at <https://www.msci.com/index-methodology>

4 MarketAxess Data

The MSCI MarketAxess Tradable Corporate Bond Indexes use the security-level Relative Liquidity Score product provided by MarketAxess Holdings Inc.

For details on MarketAxess' full suite of products, please refer to: <https://www.marketaxess.com/>.

4.1 Relative Liquidity Score

The MarketAxess Relative Liquidity Score provides a defined measurement of the current liquidity for individual bonds and highlights the potential ease that a trader can expect to transact in that instrument. The score ranges from 10, meaning the highest level of liquidity, down to 1.

MarketAxess combines data points from multiple sources – Inventory data, MarketAxess platform data, TRACE⁹ data, and Trax¹⁰ data, to calculate multiple bond-specific factors on a relative basis over a 30-day look back period. The proprietary model then aggregates the individual factors to derive the final relative liquidity score.

For more details on Relative Liquidity score, please refer to:
<https://www.marketaxess.com/price/relative-liquidity-score>.

⁹ TRACE, Trade Reporting and Compliance Engine, is the Financial Industry Regulatory Authority's (FINRA) fixed income market real-time price reporting and dissemination service.

¹⁰ Trax, a wholly owned subsidiary of MarketAxess Holdings, Inc., provides capital market data, trade matching and regulatory reporting services to the global securities market.

Appendix I: Guidelines on bond selection algorithm

The Tradable Bond Index selects up to two bonds for each issuer ticker in the Eligible Universe as defined by rules in Section 2.2. The underlying principle for the selection algorithm is to seek to select the most liquid subset, while aiming to mitigate high turnover.

The following rules are used in selecting at most two bonds for each issuer ticker. The preference order for selection is as follows:

1. Select bonds that entered the Tradable Bond Index over the past 11 months and continue to qualify on current RLS, size and maturity criteria as defined in Section 2.2.1, Section 2.2.2, and Section 2.2.3, respectively.
2. In case we have less than two bonds for an issuer ticker selected from Step 1, then select remaining bonds with higher security size.
3. In case we have multiple bonds with same security size, then following parameters in the given order are used as tiebreakers for selection.
 - Higher MRLS score
 - Higher Time to Maturity
 - Higher Coupon

Appendix II: Credit rating bucket mapping

MSCI sources credit ratings from Standard and Poor’s Rating Services (S&P) or Moody’s Investor Service (Moody’s). The MSCI Average Rating is the average rating of S&P and Moody’s, rounded up to the nearest integer, if a half value occurs. The MSCI average rating is converted to a broader credit rating bucket as per the table below.

MSCI Average Rating	Credit Rating Bucket (used for capping)
AAA	AAA
AA+, AA, AA-	AA
A+, A, A-	A
BBB+, BBB, BBB-	BBB
BB+, BB, BB-	BB
B+, B, B-	B
CCC+, CCC, CCC-	CCC
CC+, CC, CC-	CC
C+, C, C-	C
D	D

Appendix III: Methodology Set

The Indexes are governed by a set of methodology and policy documents (“Methodology Set”), including the present index methodology document as mentioned below:

- Description of methodology set –
<https://www.msci.com/index/methodology/latest/FIInfo>
- MSCI Fixed Income Data Methodology –
<https://www.msci.com/index/methodology/latest/FIDATA>
- MSCI Fixed Income Calculation Methodology –
<https://www.msci.com/index/methodology/latest/FIINDEXCALC>
- MSCI Fixed Income Glossary of Terms –
<https://www.msci.com/index/methodology/latest/FIGLOSS>
- MSCI Fixed Income Index Policies –
<https://www.msci.com/index/methodology/latest/FIINDEXPOLICY>
- MSCI Corporate Bond Indexes Methodology –
<https://www.msci.com/index/methodology/latest/FIIGCORP>

The Methodology Set for the Indexes can also be accessed from MSCI’s webpage <https://www.msci.com/index-methodology> in the section ‘Search Methodology by Index Name or Index Code’.

Appendix III: Changes to this Document

The following modifications have been made since October 2023:

- Updated to reflect the launch of the: MSCI MarketAxess EUR IG Tradable Corporate Bond Index, MSCI MarketAxess USD IG Tradable Corporate Bond Index and MSCI MarketAxess EUR HY Tradable Corporate Bond Index.
- Modification to Section 2 to reflect the methodology changes, that resulted from the MSCI MarketAxess USD HY Tradable Corporate Bond Index Consultation.

The following sections have been modified as of December 2023:

- Minor change in page 8, where the name MarketAxess Composite+™ was changed to MarketAxess CP+™.
- Clarified treatment of Cut Off Date for exceptional cases.

The following sections have been modified as of December 2024:

Appendix III: Methodology Set:

- Added details on the Methodology Set for the Index.

The following sections have been modified as of December 2025:

Updated branding template.

Notice and Disclaimer

The data, data feeds, databases, reports, text, graphs, charts, images, videos, recordings, models, metrics, analytics, indexes, ratings, scores, cases, estimates, assessments, software, websites, products, services and other information and materials contained herein or delivered in connection with this notice (collectively, the "Information") are copyrighted, trade secrets (when not publicly available), trademarks and proprietary property of MSCI Inc. or its subsidiaries (collectively, "MSCI"), MSCI's licensors, direct or indirect suppliers and authorized sources, and/or any third party contributing to the Information (collectively, with MSCI, the "Information Providers"). All rights in the Information are reserved by MSCI and its Information Providers and user(s) shall not, nor assist others to, challenge or assert any rights in the Information.

Unless you contact MSCI and receive its prior written permission, you must NOT use the Information, directly or indirectly, in whole or in part (i) for commercial purposes, (ii) in a manner that competes with MSCI or impacts its ability to commercialize the Information or its services, (iii) to provide a service to a third party, (iv) to permit a third party to directly or indirectly access, use or resell the Information, (v) to redistribute or resell the Information in any form, (vi) to include the Information in any materials for public dissemination such as fund factsheets, market presentations, prospectuses, and investor information documents (e.g. KIDs or KIDS), (vii) to create or as a component of any financial products, whether listed or traded over the counter or on a private placement basis or otherwise, (viii) to create any indexes, ratings or other data products, including in derivative works combined with other indexes or data or as a policy, product or performance benchmarks for active, passive or other financial products, (ix) to populate a database, or (x) to train, use as an input to, or otherwise in connection with any artificial intelligence, machine learning, large language models or similar technologies except as licensed and expressly authorized under MSCI's AI Contracting Supplement at <https://www.msci.com/legal/supplemental-terms-for-client-use-of-artificial-intelligence>.

The intellectual property rights of MSCI and its Information Providers may not be misappropriated or used in a competitive manner through the use of third-party data or financial products linked to the Information, including by using an MSCI index-linked future or option in a competing third-party index to provide an exposure to the underlying MSCI index or by using an MSCI index-linked ETF to create a financial product that provides an exposure to the underlying MSCI index without obtaining a license from MSCI.

The user or recipient of the Information assumes the entire risk of any use it may make, permit or cause to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, SUITABILITY, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION. Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall MSCI or any other Information Provider have any liability arising out of or relating to any of the Information, including for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages, even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not be applicable law be excluded or limited.

The Information, including index construction, ratings, historical data, or analysis, is not a prediction or guarantee of future performance, and must not be relied upon as such. Past performance is not indicative of future results. The Information may contain back tested data. Back-tested performance based on back-tested data is not actual performance but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy. The Information may include "Signals," defined as quantitative attributes or the product of methods or formulas that describe or are derived from calculations using historical data. Signals are inherently backward-looking because of their use of historical data, and they are inherently inaccurate, not intended to predict the future and must not be relied upon as such. The relevance, correlations and accuracy of Signals frequently change materially over time.

The Information may include data relating to indicative prices, evaluated pricing or other information based on estimates or evaluations (collectively, "Evaluations") that are not current and do not reflect real-time traded prices. No evaluation method, including those used by the Information Providers, may consistently generate evaluations or estimates that correspond to actual "traded" prices of any relevant securities or other assets. Evaluations are subject to change at any time without notice and without any duty to update or inform you, may not reflect prices at which actual transactions or collateral calls may occur or have occurred. The market price of securities, financial instruments, and other assets can be determined only if and when executed in the market. There may be no, or may not have been any, secondary trading market for the relevant securities, financial instruments or other assets. Private capital, equity, credit and other assets and their prices may be assessed infrequently, may not be priced on a secondary market, and shall not be relied upon as an explicit or implicit valuation of a particular instrument. Any reliance on fair value estimates and non-market inputs introduces potential biases and subjectivity. Internal Rate of Return metrics are not fully representative without full disclosure of fund cash flows, assumptions, and time horizons.

The Information does not constitute, and must not be relied upon as, investment advice, credit ratings, or proxy advisory or voting services. None of the Information Providers, their products or services, are fiduciaries or make any recommendation, endorsement, or approval of any investment decision or asset allocation. Likewise, the Information does not represent an offer to sell, a solicitation to buy, or an endorsement of any security, financial product, instrument, investment vehicle, or trading strategy, whether or not linked to or in any way based on any MSCI index, rating, subcomponent, or other Information (collectively, "Linked Investments"). The Information should not be relied on and is not a substitute for the skill, judgment and experience of any user when making investment and other business decisions. MSCI is not responsible for any user's compliance with applicable laws and regulations. All Information is impersonal, not tailored to the needs of any person, entity or group of persons, not objectively verifiable in every respect, and may not be based on information that is important to any user.

It is not possible to invest in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI makes no assurance that any Linked Investments will accurately track index performance or provide positive investment returns. Index returns do not represent results of actual trading of investible assets/securities. MSCI maintains and calculates indexes but does not manage assets. The calculation of indexes and index returns may deviate from the stated methodology. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase securities underlying the index or Linked Investments. The imposition of these fees and charges would cause the performance of a Linked Investment to be different than the MSCI index performance.

Information provided by MSCI Solutions LLC and certain related entities ("MSCI Solutions"), including materials utilized in MSCI sustainability and climate products, have not been submitted to, nor received approval from any regulatory body. MSCI sustainability and climate offerings, research and data are produced by, and ratings are solely the opinion of MSCI Solutions. MSCI India Domestic ESG Ratings are produced by MSCI ESG Ratings and Research Private Limited and offered domestically in India. Other MSCI products and services may utilize information from MSCI Solutions, Barra LLC or other affiliates. More information can be found in the relevant methodologies on www.msci.com. MSCI Indexes are administered by MSCI Limited (UK) and MSCI Deutschland GmbH. No regulated use of any MSCI private real assets indexes in any jurisdiction is permitted without MSCI's express written authorization. The process for applying for MSCI's express written authorization can be found at: <https://www.msci.com/index-regulation>.

MSCI receives compensation in connection with licensing its indexes and other Information to third parties. MSCI Inc.'s revenue includes fees based on assets in Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of msci.com. Issuers mentioned in MSCI Solutions materials or their affiliates may purchase research or other products or services from one or more MSCI affiliates, manage financial products such as mutual funds or ETFs rated by MSCI Solutions or its affiliates or are based on MSCI Indexes. Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Constituents in MSCI Inc. equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. MSCI Solutions has taken steps to mitigate potential conflicts of interest and safeguard the integrity and independence of its research and ratings.

MIFID2/MIFIR notice: MSCI Solutions does not distribute or act as an intermediary for financial instruments or structured deposits, nor does it deal on its own account, provide execution services for others or manage client accounts. No MSCI product or service supports, promotes or is intended to support or promote any such activity. MSCI Solutions is an independent provider of sustainability and climate data. All use of indicative prices for carbon credits must comply with any rules specified by MSCI. All transactions in carbon credits must be traded "over-the-counter" (i.e. not on a regulated market, trading venue or platform that performs a similar function to a trading venue) and result in physical delivery of the carbon credits.
