

MSCI ACWI Select Agriculture Producers IMI (USD)

The MSCI ACWI Select Agriculture Producers Investable Market Index (IMI) aims to focus on companies in the agriculture industries that are highly sensitive to underlying prices of agricultural commodities. The index includes companies that are primarily engaged in the production of fertilizers & agricultural chemicals or agricultural products, or in the construction of farm machinery, or in packaged food & meats--as classified by the Global Industry Classification Standard GICS®. The index excludes companies that derive a majority of their revenues from the lower spectrum of the value chain (e.g., confectionaries and snacks). The index is derived from the ACWI IMI equity universe which includes large, mid and small cap securities across 23 Developed Markets (DM) and 23 Emerging Markets (EM) countries*.

The MSCI ACWI Select Agriculture Producers IMI was launched on Nov 30, 2010. Data prior to the launch date is back-tested data (i.e. calculations of how the index might have performed over that time period had the index existed). There are frequently material differences between back-tested performance and actual results. Past performance -- whether actual or back-tested -- is no indication or quarantee of future performance.

Index Methodology

The MSCI Select Commodity Producers Indexes aim to reflect commodity price movements by including companies that operate at or near the initial phase of commodity production and that are highly sensitive to underlying commodity prices. The indexes first capture the set of eligible commodity-producing companies as classified under the Global Industry Classification Standard (GICS®). MSCI ACWI Select Agriculture Producers IMI, for example, screens for companies directly involved in or near the initial phase of agricultural production as classified in one of the following categories: "Fertilizers & Agricultural Chemicals," "Agricultural Products," "Construction & Farm Machinery & Heavy Trucks," or "Packaged Foods & Meats." The index then screens out any companies that are not directly involved in primary agricultural production. The index is reviewed quarterly—in February, May, August and November—with the objective of reflecting change in the underlying equity markets in a timely manner, while limiting undue index turnover.
